A GENUINE MERRIAM-WEBSTER

The name *Webster* alone is no guarantee of excellence. It is used by a number of publishers and may serve mainly to mislead an unwary buyer.

Merriam-Webster™ is the name you should look for when you consider the purchase of dictionaries or other fine reference books. It carries the reputation of a company that has been publishing since 1831 and is your assurance of quality and authority.

Preface

In 1898 an abridged dictionary titled Webster's Collegiate Dictionary took the place, in the Merriam-Webster line, of an earlier book titled Webster's National Pictorial Dictionary. The new book was based upon the 1890 edition of the Merriam-Webster Unabridged, and it aimed, its editors said, "to present the most essential parts of Webster's International Dictionary, in a compact and convenient form, suited to the general reader and especially to the college student." The change cannot have seemed momentous to the people involved; nonetheless, it inaugurated a series of editions that has continued for nearly a hundred years. The book you hold, Merriam-Webster's Collegiate Dictionary, Tenth Edition, is the very latest in that series. Its title is new, and its contents have undergone the most searching and extensive sort of review and modification over the two-year course of work, but it remains rooted as firmly as ever in the Merriam-Webster tradition of excellence in the making of dictionaries.

A word must be said about the new title, which breaks with tradition in beginning not with Webster's but with Merriam-Webster's. During the time that our Collegiate Dictionary has been in existence, we have seen the proliferation of dictionaries from other publishers bearing the designation Webster's in their titles. In 1982 we changed the name of our company from the G. & C. Merriam Company that it had borne since its inception in 1831 to Merriam-Webster, Incorporated. Events of the succeeding decade have brought us to believe that we must now place even greater emphasis on the Merriam-Webster combination, which is uniquely ours. The new title of a very prominent dictionary in our line reflects this belief.

Although Merriam-Webster's Collegiate Dictionary, Tenth Edition, may lack a familiar ring, this dictionary like all earlier editions is meant to serve the general public as its chief source of information about the words of our language. Its title may suggest a special appropriateness for the student, but those who work in offices and those who read, think, and write at home will equally find it a trustworthy guide to the English of our day.

The ever-expanding vocabulary of our language exerts inexorable pressure on the contents of any dictionary. Words and senses are born at a far greater rate than that at which they die out. The 1600 pages of this Collegiate make it the most comprehensive ever published. And its treatment of words is as nearly exhaustive as the compass of an abridged work permits. As in all Merriam-Webster dictionaries, the information given is based on the collection of 14,500,000 citations maintained in the offices of this company. These citations show words used in a wide range of printed sources, and the collection is constantly being augmented through the efforts of the editorial staff. Thus, the user of the dictionary may be confident that entries in the Collegiate are based on current as well as older material. The citation files held 4,500,000 more examples than were available to the editors of Webster's Third New International Dictionary, published in 1961, and 1,500,000 more than the editors of the Ninth Edition had at their disposal. The editors of this edition also had available to them for the first time a machine-readable corpus of over 20,000,000 words of text drawn from the wide and constantly changing range of publications that supply the paper slips in the citation files.

Those entries known to be trademarks or service marks are so labeled and are treated in accordance with a formula approved by the United States Trademark Association. No entry in this dictionary, however, should be regarded as affecting the validity of any trademark or service mark.

The best features of the vocabulary section in the last edition have been retained, reviewed, and improved for this one. Over a hundred additional pictorial illustrations are present, and many of them were drawn especially for this book in order to supplement and clarify definitions. To the synonym paragraphs brief verbal illustrations have consistently been added to assist with the understanding of the discrimination offered. Usage paragraphs, which appeared for the first time in the Ninth Edition, are here again, augmented in number and extensively revised in the light of the research and thought that produced Webster's Dictionary of English Usage about halfway between these editions. The dates of first use provided at most main entries, also new to the last edition, have proved to be very popular with users of the Collegiate. For the Tenth Edition, thousands of these dates have been pushed back in time, anywhere from a single year to several centuries from published materials not available ten years ago, from the continuing investigations of our own editors, and from the contributions of hundreds of interested readers.

The front matter of this book establishes a context for understanding what this dictionary is and how it came to be, as well as how it may be used most effectively. The Explanatory Notes address themselves to the latter topic. They answer the user's questions about the conventions, devices, and techniques by which the editors have been able to compress mountains of information about English words into little more than 1400 pages. All users of the dictionary are urged to read this section through and then consult it for special information as they need to. The brief essay on our language as it is recorded in Merriam-Webster dictionaries, and this Collegiate in particular, is meant to satisfy an interest in lexicography often expressed in the correspondence which our editors receive. The Guide to Pronunciation serves both to show how the pronunciations in this book are arrived at and to explain the mechanics of the respelling system in which they are set down.

The back matter retains six sections from the last edition of the Collegiate. These are Abbreviations and Symbols for Chemical Elements, Foreign Words and Phrases that occur frequently in English texts but have not become part of the English vocabulary; thousands of proper names brought together under the separate headings Biographical Names and Geographical Names; a gathering of important Signs and Symbols that cannot readily be alphabetized; and a Handbook of Style in which various stylistic conventions (as of punctuation and capitalization) are summarized and exemplified. All the sections are expanded in this edition.

Looking at a copy of that long-ago first Collegiate Dictionary, one is struck by how different it is, as a physical book and as a work of reference, from the present edition. The board covers are heavy, the margins of the page are wide, and the type is relatively large; at the same time it holds only about 1100 pages and only about half the number of vocabulary entries of this Tenth Edition. At that time the Merriam-Webster citation file was no more than in its infancy. Yet the editors of that book created it with the same careful, serious attention that the present editors have brought to their work.

The publishers said of their original Collegiate Dictionary, "For the book as a whole we venture to claim that in its class and for its purpose it has no superior and no equal." The trained, experienced, permanent staff of Merriam-Webster, Incorporated, who worked on this Tenth Edition and whose names are given on the facing page, have no less confidence in what they have created. They offer it to people everywhere who need information about the vocabulary of English, in the assurance that it will prove a reliable companion.

usage The past participle *proven*, orig. the past participle of *preve*, a Middle English variant of *prove* that survived in Scotland, has gradually worked its way into standard English over the past three and a half centuries. It seems to have first become established in legal use and to have come only slowly into literary use. Tennyson was one of its earliest frequent users, prob. for metrical reasons. It was disapproved by 19th century grammarians, one of whom included it in a list of "words that are not words." Surveys made some 40 or 50 years ago indicated that *proved* was about four times as frequent as *proven*. But our evidence from the last 20 or 25 years shows this no longer to be the case. As a past participle *proven* is now about as frequent as *proved* in all contexts. As an attributive adjective ⟨*proved* or *proven* gas reserves⟩ *proven* is much more common than *proved*.

Explanatory Notes

Entries

MAIN ENTRIES

A boldface letter or a combination of such letters, including punctuation marks and diacritics where needed, that is set flush with the left-hand margin of each column of type is a main entry or entry word. The main entry may consist of letters set solid, of letters joined by a hyphen or a diagonal, or of letters separated by one or more spaces:

^{1}**alone** . . . *adj*
au·to–da–fé . . . *n*
and/or . . . *conj*
automatic pilot *n*

The material in lightface type that follows each main entry on the same line and on succeeding indented lines explains and justifies its inclusion in the dictionary.

Variation in the styling of compound words in English is frequent and widespread. It is often completely acceptable to choose freely among open, hyphenated, and closed alternatives (as *life style, life-style,* or *lifestyle*). However, to show all the stylings that are found for English compounds would require space that can be better used for other information. So this dictionary limits itself to a single styling for a compound:

peace·mak·er
pell–mell
boom box

When a compound is widely used and one styling predominates, that styling is shown. When a compound is uncommon or when the evidence indicates that two or three stylings are approximately equal in frequency, the styling shown is based on the analogy of similar compounds.

ORDER OF MAIN ENTRIES

The main entries follow one another in alphabetical order letter by letter without regard to intervening spaces or hyphens: *battle royal* follows *battlement* and *earth-shattering* follows *earthshaking.* Those containing an Arabic numeral are alphabetized as if the numeral were spelled out: *3-D* comes between *three-color* and *three-decker.* Those that often begin with the abbreviation *St.* in common usage have the abbreviation spelled out: *Saint Anthony's fire.*

Full words come before parts of words made up of the same letters. Solid compounds come first and are followed by hyphenated compounds and then open compounds. Lowercase entries come before entries that begin with a capital letter:

^{3}**semi** . . . *n*
semi- . . . *prefix*
take·out . . . *n*
take–out . . . *adj*
take out *vt*
tim·o·thy . . . *n*
Tim·o·thy . . . *n*

HOMOGRAPHS

When one main entry has exactly the same written form as another, the two are distinguished by superscript numerals preceding each word:

^{1}**melt** . . . *vb*	^{1}**pine** . . . *n*
^{2}**melt** *n*	^{2}**pine** *vi*

Sometimes such homographs are related: the two entries *melt* are derived from the same root. Sometimes there is no relationship: the two entries *pine* are unrelated beyond the accident of spelling. The order of homographs is usually historical: the one first used in English is entered first. A homograph derived from an earlier homograph by functional shift, however, follows its parent immediately, with the result that occasionally one homograph appears ahead of another that is older in usage. For example, of the three entries *kennel* the second (a verb) is derived from the first (a noun). Even though the unrelated third entry *kennel* was used in English many years before the second, it follows the two related entries.

GUIDE WORDS

A pair of guide words is printed at the top of each page. The entries that fall alphabetically between the guide words are found on that page.

It is important to remember that alphabetical order rather than position of an entry on the page determines the selection of guide words. The first guide word is the alphabetically first entry on the page. The second guide word is usually the alphabetically last entry on the page:

academia • accession

The entry need not be a main entry. Another boldface word—a variant, an inflected form, or a defined or undefined run-on—may be selected as a guide word. For this reason the last printed main entry on a page is not always the last entry alphabetically:

iron curtain • irregularly

On the page where these guide words are used, *irregularity* is the last printed entry, but *irregularly,* a derivative word run on at *irregular,* is the last entry alphabetically and so has been chosen as the second guide word.

All guide words must themselves be in alphabetical order from page to page throughout the dictionary; thus, the alphabetically last entry on a page is not used if it follows alphabetically the first guide word on the next page:

protostar • providence

On the page where these guide words are found, *proving,* an inflection at the entry *prove,* is the last entry alphabetically, but it is not used as the second guide word because it follows alphabetically the entry *provident,* which is the first guide word on the next page. To use *proving* would violate the alphabetical order of guide words from page to page, and so the entry *providence* is the second guide word instead.

END-OF-LINE DIVISION

The centered dots within entry words indicate division points at which a hyphen may be put at the end of a line of print or writing. Thus the noun *pos·si·bil·i·ty* may be ended on one line with:

pos-

possi-

possibil-

possibili-

and continued on the next with:

sibility

bility

ity

ty

Centered dots are not shown after a single initial letter or before a single terminal letter because printers seldom cut off a single letter:

aswirl . . . *adj*

mouthy . . . *adj*

idea . . . *n*

Nor are they shown at second and succeeding homographs unless these differ among themselves:

^{1}**re·form** . . . *vb*

^{2}**reform** *n*

^{3}**reform** *adj*

^{1}**min·ute** . . . *n*

^{2}**minute** *vt*

^{3}**mi·nute** . . . *adj*

There are acceptable alternative end-of-line divisions just as there are acceptable variant spellings and pronunciations. It is, for example, all but impossible to produce a convincing argument that either of the divisions *aus·ter·i·ty, au·ster·i·ty* is better than the other. But space cannot be taken for entries like *aus·ter·i·ty or au·ster·i·ty,* and *au·s·ter·i·ty* would likely be confusing to many. No more than one division is, therefore, shown for an entry in this dictionary.

Many words have two or more common pronunciation variants, and the same end-of-line division is not always appropriate for each of them. The division *pi·an·ist,* for example, best fits the variant \pē-ˈa-nist\ whereas the division *pi·a·nist* best fits the variant \ˈpē-ə-nist\. In instances like this, the division falling farther to the left is used, regardless of the order of the pronunciations:

pi·a·nist \pē-ˈa-nist, ˈpē-ə-nist\

A double hyphen at the end of a line in this dictionary (as in the definition at *abstract expressionism*) stands for a hyphen that belongs at that point in a hyphenated word and that is retained when the word is written as a unit on one line.

VARIANTS

When a main entry is followed by the word *or* and another spelling, the two spellings are equal variants. Both are standard, and either one may be used according to personal inclination:

ocher *or* **ochre**

If two variants joined by *or* are out of alphabetical order, they remain equal variants. The one printed first is, however, slightly more common than the second:

plow *or* **plough**

When another spelling is joined to the main entry by the word *also,* the spelling after *also* is a secondary variant and occurs less frequently than the first:

can·cel·la·tion *also* **can·cel·ation**

Secondary variants belong to standard usage and may be used according to personal inclination. If there are two secondary variants, the second is joined to the first by *or.* Once the word *also* is used to signal a secondary variant, all following variants are joined by *or:*

^{1}**Shake·spear·ean** *or* **Shake·spear·ian** *also* **Shak·sper·ean** *or* **Shak·sper·ian**

Variants whose spelling places them alphabetically more than a column away from the main entry are entered at their own alphabetical places and usually not at the main entry:

^{1}**jibe** . . . *var of* GIBE

^{3}**rime, rime·ster** *var of* RHYME, RHYMESTER

Variants having a usage label appear only at their own alphabetical places:

metre . . . *chiefly Brit var of* METER

agin . . . *dial var of* AGAINST

RUN-ON ENTRIES

A main entry may be followed by one or more derivatives or by a homograph with a different functional label. These are run-on entries. Each is introduced by a lightface dash and each has a functional label. They are not defined, however, since their meanings are readily derivable from the meaning of the root word:

slay . . . *vb* . . . — **slay·er** *n*

spir·it·ed . . . *adj* . . . — **spir·it·ed·ly** *adv* — **spir·it·ed·ness** *n*

stac·ca·to . . . *adj* . . . — **staccato** *adv* — **staccato** *n*

A main entry may be followed by one or more phrases containing the entry word or an inflected form of it. These are also run-on entries. Each is introduced by a lightface dash but there is no functional label. They are, however, defined since their meanings are more than the sum of the meanings of their elements:

^{1}**hole** . . . *n* . . . — **in the hole 1** : . . .

^{1}**live** . . . *vb* . . . — **live it up** : . . .

Defined phrases of this sort are run on at the entry constituting the first major element in the phrase. The first major element is ordinarily a verb or a noun, but when these are absent another part of speech may serve instead:

^{1}**but** . . . *conj* . . . — **but what** : . . .

When there are variants, however, the run-on appears at the entry constituting the first major invariable element in the phrase:

^{1}**clock** . . . *n* . . . — **kill the clock** *or* **run out the clock** : . . .

^{1}**hand** . . . *n* . . . — **on all hands** *or* **on every hand** : . . .

A run-on entry is an independent entry with respect to function and status. Labels at the main entry do not apply unless they are repeated.

Attention is called to the definition of *vocabulary entry* in this book. The term *dictionary entry* includes all vocabulary entries as well as all boldface entries in the separate sections of the back matter headed "Abbreviations and Symbols for Chemical Elements," "Foreign Words and Phrases," "Biographical Names," and "Geographical Names."

Pronunciation

Pronunciation is indicated between a pair of reversed virgules \ \ following the entry word. The symbols used are listed in the chart printed inside the back cover of this dictionary and on the page facing the first page of the dictionary proper. An abbreviated list appears at the bottom of the second column of each right-hand page of the vocabulary. Explanations of the symbols are given in the Guide to Pronunciation.

SYLLABLES

A hyphen is used in the pronunciation to show syllabic division. These hyphens sometimes coincide with the centered dots in the entry word that indicate end-of-line division; sometimes they do not:

ab·sen·tee \ˌab-sən-ˈtē\

^{1}**met·ric** \ˈme-trik\

STRESS

A high-set mark \ˈ\ indicates primary (strongest) stress or accent; a low-set mark \ˌ\ indicates secondary (medium) stress or accent:

heart·beat \ˈhärt-ˌbēt\

The stress mark stands at the beginning of the syllable that receives the stress.

Stress marks are an indication of the relative prominence of the syllables in a word. In running speech the primary stress can vary in English words for several contextual and semantic reasons. Because the variation is so great, this book shows the primary stress of a word in its pronunciation as a single word out of context.

VARIANT PRONUNCIATIONS

The presence of variant pronunciations indicates that not all educated speakers pronounce words the same way. A second-place variant is not to be regarded as less acceptable than the pronunciation that is given first. It may, in fact, be used by as many educated speakers as the first variant, but the requirements of the printed page make one precede the other:

apri·cot \ˈa-prə-ˌkät, ˈā-\

for·eign \ˈfȯr-ən, ˈfär-\

A variant that is appreciably less common than the preceding variant is preceded by the word *also*:

^{1}**al·loy** \ˈa-ˌlȯi *also* ə-ˈlȯi\

A variant preceded by *sometimes* is even less common, though it does occur in educated speech:

in·vei·gle \in-ˈvā-gəl *sometimes* -ˈvē-\

Sometimes a regional label precedes a variant:

^{1}**great** \ˈgrāt, *Southern also* ˈgre(ə)t\

The label *dial* precedes a variant that is noteworthy or common in a dialect or dialects of American English, but that is not considered to be a standard pronunciation:

ask \ˈask, ˈȧsk; *dial* ˈaks\

The symbol \÷\ is placed before a pronunciation variant that occurs in educated speech but that is considered by some to be unacceptable:

cu·po·la \ˈkyü-pə-lə, ÷-ˌlō\

This symbol refers only to the immediately following variant and not to subsequent variants separated from it by a comma or a semicolon.

PARENTHESES IN PRONUNCIATIONS

Symbols enclosed by parentheses represent elements that are present in the pronunciation of some speakers but are absent from the pronunciation of other speakers, or elements that are present in some but absent from other utterances of the same speaker:

^{1}**twin·kle** \ˈtwiŋ-kəl\ *vb* . . . **twin·kling** \-k(ə-)liŋ\

sat·is·fac·to·ry \ˌsa-təs-ˈfak-t(ə-)rē\

re·sponse \ri-ˈspän(t)s\

Thus, the parentheses at *twinkling* mean that there are some who pronounce the \ə\ between \k\ and \l\ and others who do not pronounce it.

PARTIAL AND ABSENT PRONUNCIATIONS

When a main entry has less than a full pronunciation, the missing part is to be supplied from a pronunciation in a preceding entry or within the same pair of reversed virgules:

cham·pi·on·ship \-ˌship\

Ma·dei·ra \mə-ˈdir-ə, -ˈder-\

The pronunciation of the first three syllables of *championship* is found at the main entry *champion*:

^{1}**cham·pi·on** \ˈcham-pē-ən\

The hyphens before and after \ˈder\ in the pronunciation of *Madeira* indicate that both the first and the last parts of the pronunciation are to be taken from the immediately preceding pronunciation.

Partial pronunciations are usually shown when two or more variants have a part in common. When a variation of stress is involved, a partial pronunciation may be terminated at the stress mark which stands at the beginning of a syllable not shown:

di·verse \dī-ˈvərs, də-ˈ, ˈdī-ˌ\

an·cho·vy \ˈan-ˌchō-vē, an-ˈ\

In general, no pronunciation is indicated for open compounds consisting of two or more English words that have own-place entry:

witch doctor *n*

A pronunciation is shown, however, for any element of an open compound that does not have entry at its own alphabetical place:

Oc·cam's razor \ˈä-kəmz-\

sieve of Er·a·tos·the·nes \-ˌer-ə-ˈtäs-thə-ˌnēz\

Only the first entry in a sequence of numbered homographs is given a pronunciation if their pronunciations are the same:

^{1}**re·ward** \ri-ˈwȯrd\

^{2}**reward**

Pronunciations are shown for obsolete words only if they occur in Shakespeare:

clois·tress \ˈklȯi-strəs\ *n* . . . *obs*

The pronunciation of unpronounced derivatives and compounds run on at a main entry is a combination of the pronunciation at the main entry and the pronunciation of the suffix or final element as given at its alphabetical place in the vocabulary:

— **oval·ness** *n*

— **shot in the dark**

Thus, the pronunciation of *ovalness* is the sum of the pronunciations given at *oval* and *-ness;* that of *shot in the dark,* the sum of the pronunciation of the four elements that make up the phrase.

Functional Labels

An italic label indicating a part of speech or some other functional classification follows the pronunciation or, if no pronunciation is given, the main entry. The eight traditional parts of speech are indicated as follows:

^{1}**bold** . . . *adj*

hand·i·ly . . . *adv*

^{1}**but** . . . *conj*

oops . . . *interj*

bo·le·ro . . . *n*

^{2}**under** *prep*

some·one . . . *pron*

^{1}**shrink** . . . *vb*

If a verb is both transitive and intransitive, the labels *vt* and *vi* introduce the subdivisions:

flat·ten . . . *vb* . . . *vt* . . . **∼** *vi*

A boldface swung dash **∼** is used to stand for the main entry (as *flatten*) and separate the subdivisions of the verb. If there is no subdivision, *vt* or *vi* takes the place of *vb*:

^{2}**fleece** *vt*

ap·per·tain . . . *vi*

Labeling a verb as transitive, however, does not preclude occasional intransitive use (as in absolute constructions).

Other italicized labels used to indicate functional classifications that are not traditional parts of speech are:

poly- *comb form*

-logy *n comb form*

-iferous *adj comb form*

super- *prefix*

Gram·my . . . *service mark*

^{1}**-ic** *adj suffix*

^{2}**-ward** *or* **-wards** *adv suffix*

-itis *n suffix*

-ize *vb suffix*

Ly·cra . . . *trademark*

-nd *symbol*

^{1}**may** . . . *verbal auxiliary*

gid·dap . . . *vb imper*

me·thinks . . . *vb impersonal*

NC–17 . . . *certification mark*

Two functional labels are sometimes combined:

zilch . . . *adj or n*

afloat . . . *adj or adv*

Inflected Forms

In comparison with some other languages English does not have many inflected forms. Of those which it has, several are inflected forms of words belonging to small, closed groups (as the personal pronouns or the demonstratives). These forms can readily be found at their own alphabetical places with a full entry (as *whom,* the objective case form of *who*) or with a cross-reference in small capital letters to another entry (as *those,* the plural form of *that*).

Most other inflected forms, however, are covered explicitly or by implication at the main entry for the base form. These are the plurals of nouns, the principal parts of verbs (the past tense, the past participle when it differs from the past tense, and the present participle), and the comparative and superlative forms of adjectives and adverbs. In general, it may be said that when these inflected forms are created in a manner considered regular in English (as by adding *-s* or *-es* to nouns, *-ed* and *-ing* to verbs, and *-er* and *-est* to adjectives and adverbs) and when it seems that there is nothing about the formation likely to give the dictionary user doubts, the inflected form is not shown in order to save space for information more likely to be sought. Inflected forms are also not shown at undefined run-ons or at some entries bearing a limiting label:

gour·mand . . . *n* . . . — **gour·man·dize** . . . *vi*

^{1}**fem·i·nine** . . . *adj* . . . — **fem·i·nine·ness** . . . *n*

^{2}**lake** *n* . . . — **laky** . . . *adj*

^{2}**cote** . . . *vt* . . . *obs* : to pass by

crouse . . . *adj* . . . *chiefly Scot* : BRISK, LIVELY

On the other hand, if the inflected form is created in an irregular way or if the dictionary user is likely to have doubts about it (even though it is formed regularly), the inflected form is shown in boldface, either in full or cut back to a convenient and easily recognizable point. Full details about the kinds of entries at which inflected forms are shown and the kinds at which they are not shown are given in the three following sections.

NOUNS

The plurals of nouns are shown in this dictionary when suffixation brings about a change of final *-y* to *-i-,* when the noun ends in a consonant plus *-o* or in *-ey,* when the noun ends in *-oo,* when the noun has an irregular plural or a zero plural or a foreign plural, when the noun is a compound that pluralizes any element but the last, when a final consonant is doubled, when the noun has variant plurals, and when it is believed that the dictionary user might have reasonable doubts about the spelling of the plural or when the plural is spelled in a way contrary to expectations:

^{2}**spy** *n, pl* **spies**

si·lo . . . *n, pl* **silos**

^{1}**ro·deo** . . . *n, pl* **ro·de·os**

^{2}**shampoo** *n, pl* **shampoos**

^{1}**mouse** . . . *n, pl* **mice**

moose . . . *n, pl* **moose**

cri·te·ri·on . . . *n, pl* **-ria**

son–in–law . . . *n, pl* **sons–in–law**

^{1}**quiz** . . . *n, pl* **quiz·zes**

^{1}**fish** . . . *n, pl* **fish** *or* **fish·es**

cor·gi . . . *n, pl* **corgis**

^{3}**dry** *n, pl* **drys**

Cutback inflected forms are used when the noun has three or more syllables:

ame·ni·ty . . . *n, pl* **-ties**

The plurals of nouns are usually not shown when the base word is unchanged by suffixation, when the noun is a compound whose second element is readily recognizable as a regular free form entered at its own place, or when the noun is unlikely to occur in the plural:

^{1}night . . . *n*

^{2}crunch *n*

fore•foot . . . *n*

mo•nog•a•my . . . *n*

Nouns that are plural in form and that regularly occur in plural construction are labeled *n pl*:

munch•ies . . . *n pl*

Nouns that are plural in form but that are not always construed as plurals are appropriately labeled:

ro•bot•ics . . . *n pl but sing in constr*

two bits *n pl but sing or pl in constr*

A noun that is singular in construction takes a singular verb when it is used as a subject; a noun that is plural in construction takes a plural verb when it is used as a subject.

VERBS

The principal parts of verbs are shown in this dictionary when suffixation brings about a doubling of a final consonant or an elision of a final *-e* or a change of final *-y* to *-i-*, when final *-c* changes to *-ck* in suffixation, when the verb ends in *-ey*, when the inflection is irregular, when there are variant inflected forms, and when it is believed that the dictionary user might have reasonable doubts about the spelling of an inflected form or when the inflected form is spelled in a way contrary to expectations:

^{2}snag *vt* **snagged; snag•ging**

^{1}move . . . *vb* **moved; mov•ing**

^{1}cry . . . *vb* **cried; cry•ing**

^{2}frolic *vi* **frol•icked; frol•ick•ing**

^{1}sur•vey . . . *vb* **sur•veyed; sur•vey•ing**

^{1}drive . . . *vb* **drove** . . . ; **driv•en** . . . ; **driv•ing**

^{2}bus *vb* **bused** *or* **bussed; bus•ing** *or* **bus•sing**

^{2}visa *vt* **vi•saed** . . . ; **vi•sa•ing**

^{2}chagrin *vt* **cha•grined** . . . ; **cha•grin•ing**

The principal parts of a regularly inflected verb are shown when it is desirable to indicate the pronunciation of one of the inflected forms:

learn . . . *vb* **learned** \ˈlərnd, ˈlərnt\; **learn•ing**

rip•en . . . *vb* **rip•ened; rip•en•ing** \ˈrī-pə-niŋ, ˈrīp-niŋ\

Cutback inflected forms are often used when the verb has three or more syllables, when it is a disyllable that ends in *-l* and has variant spellings, and when it is a compound whose second element is readily recognized as an irregular verb:

elim•i•nate . . . *vt* **-nat•ed; -nat•ing**

^{3}quarrel *vi* **-reled** *or* **-relled; -rel•ing** *or* **-rel•ling**

^{1}re•take . . . *vt* **-took** . . . ; **-tak•en** . . . ; **-tak•ing**

The principal parts of verbs are usually not shown when the base word is unchanged by suffixation or when the verb is a compound whose second element is readily recognizable as a regular free form entered at its own place:

^{1}jump . . . *vb*

pre•judge . . . *vt*

Another inflected form of English verbs is the third person singular of the present tense, which is regularly formed by the addition of *-s* or *-es* to the base form of the verb. This inflected form is not shown except at a handful of entries (as *have* and *do*) for which it is in some way anomalous.

ADJECTIVES & ADVERBS

The comparative and superlative forms of adjectives and adverbs are shown in this dictionary when suffixation brings about a doubling of a final consonant or an elision of a final *-e* or a change of final *-y* to *-i-*, when the word ends in *-ey*, when the inflection is irregular, and when there are variant inflected forms:

^{1}red . . . *adj* **red•der; red•dest**

^{1}tame . . . *adj* **tam•er; tam•est**

^{1}kind•ly . . . *adj* **kind•li•er; -est**

^{1}ear•ly . . . *adv* **ear•li•er; -est**

dic•ey . . . *adj* **dic•i•er; -est**

^{1}good . . . *adj* **bet•ter** . . . ; **best**

^{1}bad . . . *adj* **worse** . . . ; **worst**

^{1}far . . . *adv* **far•ther** . . . *or* **fur•ther** . . . ; **far•thest** *or* **fur•thest**

The superlative forms of adjectives and adverbs of two or more syllables are usually cut back:

^{3}fancy *adj* **fan•ci•er; -est**

^{1}ear•ly . . . *adv* **ear•li•er; -est**

The comparative and superlative forms of regularly inflected adjectives and adverbs are shown when it is desirable to indicate the pronunciation of the inflected forms:

^{1}young . . . *adj* **youn•ger** \ˈyəŋ-gər\; **youn•gest** \ˈyəŋ-gəst\

The inclusion of inflected forms in *-er* and *-est* at adjective and adverb entries means nothing more about the use of *more* and *most* with these adjectives and adverbs than that their comparative and superlative degrees may be expressed in either way; *lazier* or *more lazy; laziest* or *most lazy.*

At a few adjective entries only the superlative form is shown:

^{3}mere . . . *adj, superlative* **mer•est**

The absence of the comparative form indicates that there is no evidence of its use.

The comparative and superlative forms of adjectives and adverbs are not shown when the base word is unchanged by suffixation or when the word is a compound whose second element is readily recognizable as a regular free form entered at its own place:

^{1}near . . . *adv*

un•wary . . . *adj*

The comparative and superlative forms of adverbs are not shown when they are identical with the inflected forms of a preceding adjective homograph:

^{1}hot . . . *adj* **hot•ter; hot•test**

^{2}hot *adv*

Capitalization

Most entries in this dictionary begin with a lowercase letter. A few of these have an italicized label *often cap,* which indicates that the word is as likely to be capitalized as not, that it is as acceptable with an uppercase initial as it is with one in lowercase. Some entries begin with an uppercase letter, which indicates that the word is usually capitalized. The absence of an initial capital or of an *often cap* label indicates that the word is not ordinarily capitalized:

lunk•head . . . *n*

gar•gan•tuan . . . *adj, often cap*

Mo•hawk . . . *n*

The capitalization of entries that are open or hyphenated compounds is similarly indicated by the form of the entry or by an italicized label:

obstacle course *n*

neo–Dar•win•ian . . . *adj, often cap N*

off–off–Broadway *n, often cap both Os*

un–Amer•i•can . . . *adj*

Dutch oven *n*

Old Glory *n*

A word that is capitalized in some senses and lowercase in others shows variations from the form of the main entry by the use of italicized labels at the appropriate senses:

re•nais•sance . . . *n* . . . **1** *cap* . . . **2** *often cap*

Shet•land . . . *n* . . . **2** *often not cap*

Trin•i•ty . . . *n* . . . **2** *not cap*

Attributive Nouns

The italicized label *often attrib* placed after the functional label *n* indicates that the noun is often used as an adjective equivalent in attributive position before another noun:

gold . . . *n, often attrib*

busi•ness . . . *n, often attrib*

Examples of the attributive use of these nouns are *gold chain* and *business ethics.*

While any noun may occasionally be used attributively, the label *often attrib* is limited to those having broad attributive use. This label is not used when an adjective homograph (as *iron* or *paper*) is entered. And it is not used at open compounds (as *health food*) that may be used attributively with an inserted hyphen (as in *health-food store*).

Etymology

The matter in boldface square brackets preceding the definition is the etymology. Meanings given in roman type within these brackets are not definitions of the entry, but are meanings of the Middle English, Old English, or non-English words within the brackets.

The etymology traces a vocabulary entry as far back as possible in English (as to Old English), tells from what language and in what form it came into English, and (except in the case of such words outside the general vocabulary of English as *bascule* and *zloty*) traces the pre-English source as far back as possible if the source is an Indo-European language. These etyma are printed in italics.

OLD, MIDDLE, AND MODERN ENGLISH

The etymology usually gives the Middle English and the Old English forms of words in the following style:

^{1}**nap** . . . *vi* . . . [ME *nappen,* fr. OE *hnappian* . . .]

^{1}**old** . . . *adj* [ME, fr. OE *eald* . . .]

An etymology in which a word is traced back to Middle English but not to Old English indicates that the word is found in Middle English but not in those texts that have survived from the Old English period:

^{1}**slab** . . . *n* [ME *slabbe*]

^{1}**stale** . . . *adj* . . . [ME, aged (of ale), not fresh; akin to MD *stel* stale]

An etymology in which a word is traced back directly to Old English with no intervening mention of Middle English indicates that the word has not survived continuously from Old English times to the present. Rather, it died out after the Old English period and has been revived in modern times:

ge•mot . . . *n* [OE *gemōt* . . .]

thegn . . . *n* [OE . . .]

An etymology is not usually given for a word created in English by the combination of existing constituents or by functional shift. This indicates that the identity of the constituents is expected to be self-evident to the user.

book•shelf . . . *n* . . . : an open shelf for holding books

^{1}**fire•proof** . . . *adj* . . . : proof against or resistant to fire

off–put•ting . . . *adj* . . . : that puts one off : REPELLENT, DISCONCERTING

penal code *n* . . . : a code of laws concerning crimes and offenses and their punishment

^{3}**stalk** *n* . . . **1** : the act of stalking

In the case of a family of words obviously related to a common English word but differing from it by containing various easily recognizable suffixes, an etymology is usually given only at the base word, even though some of the derivatives may have been formed in a language other than English:

^{1}**equal** . . . *adj* [ME, fr. L *aequalis,* fr. *aequus* level, equal] . . . **1 a** (1) : of the same measure, quantity, amount, or number as another

equal•i•ty . . . *n* . . . **1** : the quality or state of being equal

equal•ize . . . *vt* . . . **1** : to make equal

While *equalize* was formed in Modern English, *equality* was actually borrowed into Middle English (via Middle French) from Latin *aequalitas.*

LANGUAGES OTHER THAN ENGLISH

The etymology gives the language from which words borrowed into English have come. It also gives the form or a transliteration of the word in that language if the form differs from that in English:

^{1}**mar•ble** . . . *n* [ME, fr. OF *marbre,* fr. L *marmor,* fr. Gk *marmaros*]

pome•gran•ate . . . *n* [ME *poumgrenet,* fr. MF *pomme grenate,* lit., seedy apple]

souk . . . *n* [Ar *sūq* market]

In a few cases the expression "ultim. fr." replaces the more usual "fr." This expression indicates that one or more intermediate steps have been omitted in tracing the derivation of the form preceding the expression from the form following it:

tri•lo•bite . . . *n* [ultim. fr. Gk *trilobos* three-lobed, fr. *tri-* + *lobos* lobe]

Words cited from certain American Indian languages and from some other languages that are infrequently printed have been rendered with the phonetic symbols used by scholars of those languages. These symbols include the following: a raised dot to the right of a vowel letter to mark vowel length; a hook below a vowel letter to mark nasality; an apostrophe over a consonant letter to mark glottal release; a superscript *w* to the right of a consonant letter to mark labialization; the symbol ɔ to render \ȯ\; the symbol ɨ to render a high central vowel; the Greek letters *β*, *δ*, and *γ* to render voiced labial, dental, and velar fricatives; the symbol *x* to render \k̲\; the symbol ˀ to render a glottal stop; and the symbol ƛ ("crossed lambda") for a voiceless lateral affricate. Examples of these symbols can be found at etymologies for the words *Athabascan*, *babassu*, *coho*, *geoduck*, *muskellunge*, *obeah*, *potlatch*, and *sego lily*.

WORDS OF UNKNOWN ORIGIN

When the source of a word appearing as a main entry is unknown, the expression "origin unknown" is usually used. Only in exceptional circumstances (as with some ethnic names) does the absence of an etymology mean that it has not been possible to furnish an informative etymology. More often, it means that no etymology is believed to be necessary. This is the case, for instance, with most of the entries identified as variants and with many derivatives.

ETYMOLOGIES OF TECHNICAL WORDS

Much of the technical vocabulary of the sciences and other specialized studies consists of words or word elements that are current in two or more languages, with only such slight modifications as are necessary to adapt them to the structure of the individual language in each case. Many words and word elements of this kind have become sufficiently a part of the general vocabulary of English as to require entry in an abridged dictionary. Because of the vast extent of the relevant published material in many languages and in many scientific and other specialized fields, it is impracticable to ascertain the language of origin of every such term. Yet it would not be accurate to formulate a statement about the origin of any such term in a way that could be interpreted as implying that it was coined in English. Accordingly, whenever a term that is entered in this dictionary belongs recognizably to this class of internationally current terms and whenever no positive evidence is at hand to show that it was coined in English, the etymology recognizes its international status and the possibility that it originated elsewhere than in English by use of the label ISV (for International Scientific Vocabulary):

mega•watt . . . *n* [ISV]

phy•lo•ge•net•ic . . . *adj* [ISV, fr. NL *phylogenesis* . . .]

^{1}**-ol** *n suffix* [ISV, fr. *alcohol*]

COMPRESSION OF INFORMATION

An etymology giving the name of a language (including ME or OE) and not giving the foreign (or Middle English or Old English) form indicates that this form is the same as that of the entry word:

ka•pok . . . *n* [Malay]

^{1}**po•grom** . . . *n* [Yiddish, fr. Russ . . .]

^{1}**dumb** . . . *adj* [ME, fr. OE . . .]

An etymology giving the name of a language (including ME or OE) and the form in that language but not giving the foreign (or Middle English or Old English) meaning indicates that this meaning is the same as that expressed in the first definition in the entry:

^{1}**wea•ry** . . . *adj* . . . [ME *wery*, fr. OE *wērig* . . .] . . . **1** : exhausted in strength . . .

When a word from a foreign language (or Middle English or Old English) is a key element in the etymologies of several related entries that are found close together, the meaning of the word is usually given at only one of the entries:

ve•lo•ce . . . *adv or adj* [It, fr. L *veloc-*, *velox*]

ve•loc•i•pede . . . *n* [F *vélocipède*, fr. L *veloc-*, *velox* + *ped-*, *pes* foot — more at FOOT]

ve•loc•i•ty . . . *n* . . . [MF *velocité*, fr. L *velocitat-*, *velocitas*, fr. *veloc-*, *velox* quick; prob. akin to L *vegēre* to enliven — more at WAKE]

When an etymology includes the expression "by alter." and the altered form is not cited, the form is the term given in small capital letters as the definition:

crit•ter . . . *n* [by alter.] . . . : CREATURE

When the origin of a word is traced to the name of a person or place not further identified, additional information may be found in the Biographical Names or Geographical Names section in the back matter:

far•ad . . . *n* [Michael *Faraday*]

jodh•pur . . . *n* [*Jodhpur*, India]

RELATED WORDS

When a word of Indo-European origin has been traced back to the earliest language in which it is attested, words descended from the same Indo-European base in other languages (especially Old High German, Latin, Greek, and Sanskrit) are usually given:

na•vel . . . *n* [ME, fr. OE *nafela;* akin to OHG *nabalo* navel, L *umbilicus*, Gk *omphalos*]

^{1}**wind** . . . *n* . . . [ME, fr. OE; akin to OHG *wint* wind, L *ventus*, Gk *aēnai* to blow, Skt *vāti* it blows]

Sometimes, however, to avoid space-consuming repetition, the expression "more at" directs the user to another entry where the cognates are given:

ho•ly . . . *adj* . . . [ME, fr. OE *hālig;* akin to OE *hāl* whole — more at WHOLE]

Besides the use of "akin to" to denote relatedness, some etymologies make special use of "akin to" as part of a longer formula "of — origin; akin to —." This formula indicates that a word was borrowed from some language belonging to a group of languages whose name is inserted in the blank before the word *origin*, that it is impossible to say that the word in question is a borrowing of a particular attested word in a particular language of the source group, and that the form cited in the blank after the expression *akin to* is related to the word in question as attested within the source group:

ba•nana . . . *n* . . . [Sp or Pg; Sp, fr. Pg, of African origin; akin to Wolof *banäna* banana]

^{2}**brier** *n* [F *bruyère* heath, fr. MF *bruiere*, fr. (assumed) VL *brucaria*, fr. LL *brucus* heather, of Celt origin; akin to OIr *froech* heather; akin to Gk *ereikē* heather]

This last example shows the two contrasting uses of "akin to." The word cited immediately after "of Celt origin; akin to" is an attested Celtic word descended from the same etymon as the unattested Celtic source of the Latin word. The word cited after the second "akin to" is evidence that the Celtic etymon has deeper relations within Indo-European.

Dates

At most main entries a date will be found enclosed in parentheses immediately preceding the boldface colon or number that introduces the first sense:

som·bre·ro . . . *n* . . . [Sp, fr. *sombra* shade] (1599) : a high-crowned hat of felt or straw with a very wide brim worn esp. in the Southwest and Mexico

This is the date of the earliest recorded use in English, as far as it could be determined, of the sense which the date precedes. Several caveats are appropriate at this point. First, a few classes of main entries that are not complete words (as prefixes, suffixes, and combining forms) or are not generic words (as trademarks and names of figures from mythology) are not given dates. Second, the date given applies only to the first sense of the word entered in this dictionary and not necessarily to the word's very earliest meaning in English. Many words, especially those with long histories, have obsolete, archaic, or uncommon senses that are not entered in this dictionary, and such senses have been excluded from consideration in determining the date:

¹slur . . . *n* [obs. E dial. *slur* thin mud, fr. ME *sloor;* akin to MHG *slier* mud] (1609) **1 a** : an insulting or disparaging remark or innuendo : ASPERSION

The 1609 date is for a sense of *slur* synonymous with *aspersion. Slur* also has an obsolete sense, "thin mud," that was recorded as early as the fifteenth century; but since this sense is not entered, it is ignored for purposes of dating. Third, the printed date should not be taken to mark the very first time that the word—or even the sense—was used in English. Many words were certainly in spoken use for decades or even longer before they passed into the written language. The date is for the earliest written or printed use that the editors have been able to discover. This fact means further that any date is subject to change as evidence of still earlier use may emerge, and many dates given now can confidently be expected to yield to others in future printings and editions.

A date will appear in one of three different styles:

put·tee . . . *n* [Hindi *paṭṭī* strip of cloth, fr. Skt *paṭṭikā*] (1886) **1** : a cloth strip wrapped around the leg from ankle to knee

¹moon·light . . . *n* (14c) : the light of the moon

¹thrall . . . *n* [ME *thral,* fr. OE *thræl,* fr. ON *thræll*] (bef. 12c) **1 a** : a servant slave : BONDMAN; *also* : SERF

The style that names a year (as 1886) is the one used for the period from the sixteenth century to the present. The style that names only a century (as 14c) is the one used for the period from the twelfth century through the fifteenth century, a span that roughly approximates the period of Middle English. The style (bef. 12c) is used for the period before the twelfth century back to the earliest records of English, a span that approximates the period of Old English. Words first attested after 1500 can usually be dated to a single year because the precise dates of publication of modern printed texts are known. If a word must be dated from a modern text of uncertain chronology, it will be assigned the latest possible date of the text's publication prefixed by the abbreviation *ca.* (for *circa*). For words from the Old and Middle English periods the examples of use on which the dates depend very often occur in manuscripts which are themselves of uncertain date and which may record a text whose date of composition is highly conjectural. To date words from these periods by year would frequently give a quite misleading impression of the state of our knowledge, and so the broader formulas involving centuries are used instead.

Each date reflects a particular instance of the use of a word, most often within a continuous text. In cases where the earliest appearance of a word dated by year is not from continuous text but from a source (as a dictionary or glossary) that defines or explains the word instead of simply using it, the year is preceded by *ca.*:

magnesium sulfate *n* (ca. 1890) : a sulfate of magnesium . . .

In such instances, *ca.* indicates that while the source providing the date attests that the word was in use in the relevant sense at that time, it does not offer an example of the normal use of the word and thus gives no better than an approximate date for such use. For the example above no use has so far been found that is earlier than its appearance (spelled *magnesium sulphate*) as an entry in Webster's International Dictionary, published in 1890, so the date is given with the qualifying abbreviation.

Usage

USAGE LABELS

Three types of status labels are used in this dictionary—temporal, regional, and stylistic—to signal that a word or a sense of a word is not part of the standard vocabulary of English.

The temporal label *obs* for "obsolete" means that there is no evidence of use since 1755:

¹per·du . . . *n* . . . *obs*

gov·ern·ment . . . *n* . . . 2 *obs*

The label *obs* is a comment on the word being defined. When a thing, as distinguished from the word used to designate it, is obsolete, appropriate orientation is usually given in the definition:

¹cat·a·pult . . . *n* . . . **1** : an ancient military device for hurling missiles

far·thin·gale . . . *n* . . . : a support (as of hoops) worn esp. in the 16th century beneath a skirt to expand it at the hipline

The temporal label *archaic* means that a word or sense once in common use is found today only sporadically or in special contexts:

¹goody . . . *n* . . . *archaic*

lon·gi·tude . . . *n* . . . 2 *archaic*

A word or sense limited in use to a specific region of the U.S. has a regional label. Some regional labels correspond loosely to areas defined in Hans Kurath's *Word Geography of the Eastern United States.* The adverb *chiefly* precedes a label when the word has some currency outside the specified region, and a double label is used to indicate considerable currency in each of two specific regions:

pung . . . *n* . . . *NewEng*

ban·quette . . . *n* . . . **1** . . . **b** *Southern*

³pas·tor . . . *n* . . . *chiefly Southwest*

do·gie . . . *n* . . . *chiefly West*

gal·lery . . . *n* . . . **2** . . . **b** *Southern & Midland*

¹pot·latch . . . *n* . . . 2 *Northwest*

smear·case . . . *n* . . . *chiefly Midland*

crul·ler . . . *n* . . . 2 *Northern & Midland*

Words current in all regions of the U.S. have no label.

A word or sense limited in use to one of the other countries of the English-speaking world has an appropriate regional label:

cut·ty sark . . . *n* . . . *chiefly Scot*

lar·ri·kin . . . *n* . . . *chiefly Austral*

in·da·ba . . . *n* . . . *chiefly SoAfr*

spal·peen . . . *n* . . . *chiefly Irish*

¹bon·net . . . *n* . . . **2 a** *Brit*

book off *vi* . . . *Canad*

¹din·kum . . . *adj* . . . *Austral & NewZeal*

gar·ron . . . *n* . . . *Scot & Irish*

The label *dial* for "dialect" indicates that the pattern of use of a word or sense is too complex for summary labeling: it usually includes several regional varieties of American English or of American and British English:

least·ways . . . *adv* . . . *dial*

The label *dial Brit* indicates currency in several dialects of the Commonwealth; *dial Eng* indicates currency in one or more provincial dialects of England:

bo·gle . . . *n* . . . *dial Brit*

¹hob . . . *n* . . . **1** *dial Eng*

The stylistic label *slang* is used with words or senses that are especially appropriate in contexts of extreme informality, that are usually not limited to a particular region or area of interest, and that are composed typically of shortened or altered forms or extravagant or facetious figures of speech:

⁴barb *n* . . . *slang* : BARBITURATE

²skinny *n* . . . *slang* : inside information : DOPE

main squeeze *n* . . . *slang* : one's principal romantic partner

There is no satisfactory objective test for slang, especially with reference to a word out of context. No word, in fact, is invariably slang, and many standard words can be given slang applications.

The stylistic label *nonstand* for "nonstandard" is used for a few words or senses that are disapproved by many but that have some currency in reputable contexts:

learn . . . *vt* . . . **2 a** *nonstand*

ir·re·gard·less . . . *adv* . . . *nonstand*

The stylistic labels *disparaging, offensive, obscene,* and *vulgar* are used for those words or senses that in common use are intended to hurt or shock or that are likely to give offense even when they are used without such an intent:

grin·go . . . *n* . . . *often disparaging*

piss away *vt* . . . *sometimes vulgar*

A subject label or guide phrase is sometimes used to indicate the specific application of a word or sense:

knock·about . . . *adj* . . . **3** *of a sailing vessel*

²break *n* . . . **5** . . . **d** *mining*

²up *adj* . . . **5** *of a quark*

In general, however, subject orientation lies in the definition:

Di·do . . . *n* . . . : a legendary queen of Carthage in Virgil's *Aeneid* who kills herself when Aeneas leaves her

je·té . . . *n* . . . : a springing jump in ballet made from one foot to the other in any direction

ILLUSTRATIONS OF USAGE

Definitions are sometimes followed by verbal illustrations that show a typical use of the word in context. These illustrations are enclosed in angle brackets, and the word being illustrated is usually replaced by a lightface swung dash. The swung dash stands for the boldface entry word, and it may be followed by an italicized suffix:

¹key . . . *n* . . . **3 a** . . . ⟨the ∼ to a riddle⟩

nary . . . *adj* . . . ⟨∼ a person wanted to go⟩

²plummet *vi* . . . **2** . . . ⟨prices ∼*ed*⟩

weak . . . *adj* . . . **4** . . . **b** . . . **(2)** . . . ⟨history was my ∼*est* subject⟩

The swung dash is not used when the form of the boldface entry word is changed in suffixation, and it is not used for open compounds:

¹true . . . *adj* . . . **8** . . . ⟨in the *truest* sense⟩

turn off *vt* . . . **4** . . . ⟨*turn* the water *off*⟩

Illustrative quotations are also used to show words in typical contexts:

con·flict·ed . . . *adj* . . . ⟨this unhappy and ∼ modern woman —John Updike⟩

Omissions in quotations are indicated by suspension points:

alien·ation . . . *n* . . . ⟨∼ . . . from the values of one's society and family —S. L. Halleck⟩

USAGE NOTES

Definitions are sometimes followed by usage notes that give supplementary information about such matters as idiom, syntax, semantic relationship, and status. A usage note is introduced by a lightface dash:

²cry *n* . . . **11** : . . . — usu. used in the phrase *a far cry*

²drum . . . *vt* . . . **2** : . . . — usu. used with *out*

¹so . . . *adv* . . . **1 a** : . . . — often used as a substitute for a preceding clause

¹sfor·zan·do . . . *adj or adv* . . . : . . . — used as a direction in music

hajji . . . *n* . . . : . . . — often used as a title

Two or more usage notes are separated by a semicolon:

²thine *pron* . . . : that which belongs to thee — used without a following noun as a pronoun equivalent in meaning to the adjective *thy;* used esp. in ecclesiastical or literary language and still surviving in the speech of Friends esp. among themselves

Sometimes a usage note calls attention to one or more terms with the same denotation as the main entry:

water moccasin *n* . . . **1** : a venomous semiaquatic pit viper (*Agkistrodon piscivorus*) chiefly of the southeastern U.S. that is closely related to the copperhead — called also *cottonmouth, cottonmouth moccasin*

The called-also terms are shown in italic type. If such a term falls alphabetically more than a column away from the main entry, it is entered at its own place with the sole definition being a synonymous cross-reference to the entry where it appears in the usage note:

cot·ton·mouth . . . *n* . . . : WATER MOCCASIN

cottonmouth moccasin *n* . . . : WATER MOCCASIN

Sometimes a usage note is used in place of a definition. Some function words (as conjunctions and prepositions) have little or no semantic content; most interjections express feelings but are otherwise untranslatable into meaning; and some other words (as oaths and honorific titles) are more amenable to comment than to definition:

¹**of** . . . *prep* . . . **1** — used as a function word to indicate a point of reckoning

¹**oyez** . . . *vb imper* . . . — used by a court or public crier to gain attention before a proclamation

¹**or** . . . *conj* . . . **1** — used as a function word to indicate an alternative

gol·ly . . . *interj* . . . — used as a mild oath or to express surprise

sir . . . *n* . . . **2 a** — used as a usu. respectful form of address

USAGE PARAGRAPHS

Brief usage paragraphs have been placed at a number of entries for terms that are considered to present problems of confused or disputed usage. A usage paragraph typically summarizes the historical background of the item and its associated body of opinion, compares these with available evidence of current usage, and often adds a few words of suitable advice for the dictionary user.

Each paragraph is signaled by an indented boldface italic ***usage.*** Where appropriate, discussion is keyed by sense number to the definition of the meaning in question. Most paragraphs incorporate appropriate verbal illustrations and illustrative quotations to clarify and exemplify the points being made:

ag·gra·vate . . . *vt* . . . **1** *obs* **a** : to make heavy : BURDEN **b** : INCREASE **2** : to make worse, more serious, or more severe : intensify unpleasantly ⟨problems have been *aggravated* by neglect⟩ **3 a** : to rouse to displeasure or anger by usu. persistent and often petty goading **b** : to produce inflammation in

usage Although *aggravate* has been used in sense 3a since the 17th century, it has been the object of disapproval only since about 1870. It is used in expository prose ⟨when his silly conceit . . . about his not-very-good early work has begun to *aggravate* us —William Styron⟩ but seems to be more common in speech and casual writing ⟨a good profession for him, because bus drivers get *aggravated* —Jackie Gleason (interview, 1986)⟩ ⟨& now this letter comes to *aggravate* me a thousand times worse —Mark Twain (letter, 1864)⟩. Sense 2 is far more common than sense 3a in published prose. Such is not the case, however, with *aggravation* and *aggravating*. *Aggravation* is used in sense 3 somewhat more than in its earlier senses; *aggravating* has practically no use other than to express annoyance.

When a second word is also discussed in a paragraph, the main entry for that word is followed by a run-on ***usage*** see — which refers to the entry where the paragraph may be found:

²**af·fect** . . . *vb* . . . ***usage*** see EFFECT

Definitions

DIVISION OF SENSES

A boldface colon is used in this dictionary to introduce a definition:

¹**coo·per** . . . *n* . . . **:** one that makes or repairs wooden casks or tubs

It is also used to separate two or more definitions of a single sense:

un·cage . . . *vt* . . . **:** to release from or as if from a cage **:** free from restraint

Boldface Arabic numerals separate the senses of a word that has more than one sense:

²**savage** *n* . . . **1 :** a person belonging to a primitive society **2 :** a brutal person **3 :** a rude or unmannerly person

Boldface lowercase letters separate the subsenses of a word:

¹**grand** . . . *adj* . . . **5 a :** LAVISH, SUMPTUOUS . . . **b :** marked by a regal form and dignity **c :** fine or imposing in appearance or impression **d :** LOFTY, SUBLIME

Lightface numerals in parentheses indicate a further division of subsenses:

take out *vt* . . . **1 a** (1) **:** DEDUCT, SEPARATE (2) **:** EXCLUDE, OMIT (3) **:** WITHDRAW, WITHHOLD

A lightface colon following a definition and immediately preceding two or more subsenses indicates that the subsenses are subsumed by the preceding definition:

²**crunch** *n* . . . **3 :** a tight or critical situation: as **a :** a critical point in the buildup of pressure between opposing elements . . . **b :** a severe economic squeeze . . . **c :** SHORTAGE

se·quoia . . . *n* . . . **:** either of two huge coniferous California trees of the bald cypress family that may reach a height of over 300 feet (90 meters): **a :** BIG TREE **b :** REDWOOD 3a

The word *as* may or may not follow the lightface colon. Its presence (as at *²crunch*) indicates that the following subsenses are typical or significant examples. Its absence (as at *sequoia*) indicates that the subsenses which follow are exhaustive.

The system of separating the various senses of a word by numerals and letters is a lexical convenience. It reflects something of their semantic relationship, but it does not evaluate senses or set up a hierarchy of importance among them.

Sometimes a particular semantic relationship between senses is suggested by the use of one of four italic sense dividers: *esp, specif, also,* or *broadly.*

The sense divider *esp* (for *especially*) is used to introduce the most common meaning subsumed in the more general preceding definition:

²**slick** *adj* . . . **3 a :** characterized by subtlety or nimble wit **:** CLEVER; *esp* **:** WILY

The sense divider *specif* (for *specifically*) is used to introduce a common but highly restricted meaning subsumed in the more general preceding definition:

pon·tiff . . . *n* . . . **2 :** BISHOP; *specif, often cap* **:** POPE 1

The sense divider *also* is used to introduce a meaning that is closely related to but may be considered less important than the preceding sense:

chi·na . . . *n* . . . **1 :** PORCELAIN; *also* **:** vitreous porcelain wares (as dishes, vases, or ornaments) for domestic use

The sense divider *broadly* is used to introduce an extended or wider meaning of the preceding definition:

flot·sam . . . *n* . . . **1 :** floating wreckage of a ship or its cargo; *broadly* **:** floating debris

ORDER OF SENSES

The order of senses within an entry is historical: the sense known to have been first used in English is entered first. This is not to be taken to mean, however, that each sense of a multisense word developed from the immediately preceding sense. It is altogether possible that sense 1 of a word has given rise to sense 2 and sense 2 to sense 3, but frequently sense 2 and sense 3 may have arisen independently of one another from sense 1.

When a numbered sense is further subdivided into lettered subsenses, the inclusion of particular subsenses within a sense is based upon their semantic relationship to one another, but their order is likewise historical: subsense 1a is earlier than 1b, 1b is earlier than 1c, and so forth. Divisions of subsenses indicated by lightface numerals in parentheses are also in historical order with respect to one another. Subsenses may be out of historical order, however, with respect to the broader numbered senses:

^{1}**job** . . . *n* . . . (ca. 1627) **1 a** : a piece of work; *esp* : a small miscellaneous piece of work undertaken on order at a stated rate **b** : the object or material on which work is being done **c** : something produced by or as if by work ⟨do a better ~ next time⟩ **d** : an example of a usu. specified type : ITEM ⟨this ~ is round-necked and sleeveless —Lois Long⟩ **2 a** : something done for private advantage ⟨suspected the whole incident was a put-up ~⟩ **b** : a criminal enterprise; *specif* : ROBBERY **c** : a damaging or destructive bit of work ⟨did a ~ on him⟩ **3 a** (1) : something that has to be done : TASK (2) : an undertaking requiring unusual exertion ⟨it was a real ~ to talk over that noise⟩ **b** : a specific duty, role, or function **c** : a regular remunerative position **d** *chiefly Brit* : state of affairs — used with *bad* or *good* ⟨it was a good ~ you didn't hit the old man —E. L. Thomas⟩

At *job* the date indicates that the earliest unit of meaning, sense 1a, was born in the seventeenth century, and it is readily apparent how the following subsenses are linked to it and to each other by the idea of work. Even subsense 1d is so linked, because while it does not apply exclusively to manufactured items, it often does so, as the illustrative quotation suggests. Yet 1d did not exist before the 1920s, while 2a and 3a (1) both belong to the seventeenth century, although they are later than 1a. Even the very last subsense, 3d, is earlier than 1d, as it is found in the works of Dickens.

Historical order also determines whether transitive or intransitive senses are given first at verbs which have both kinds. If the earliest sense is transitive, all the transitive senses precede all the intransitive senses.

OMISSION OF A SENSE

Occasionally the dictionary user, having turned to an entry, may not find a particular sense that was expected or hoped for. This usually means no more than that the editors judged the sense insufficiently common or otherwise important to include in a dictionary of this scope. Such a sense will frequently be found at the appropriate entry in a dictionary (as Webster's Third New International Dictionary) that has room for less common words and meanings. One special case is worth noting, however.

At times it would be possible to include the definition of a meaning at more than one entry (as at a simple verb and a verb-adverb collocation or at a verb and an adjective derived from a participle of that verb). To save space for other information such double coverage is avoided, and the meaning is generally defined only at the base form. For the derivative term the meaning is then considered to be essentially self-explanatory and is not defined. For example *cast off* has a sense "to get rid of" in such typical contexts as "cast off all restraint," and so has the simple verb *cast* in contexts like "cast all restraint to the winds." This meaning is defined as sense 1e(2) of *cast* and is omitted from the entry *cast off,* where the dictionary user will find a number of senses that cannot be considered self-explanatory in relation to the entries for *cast* and *off.* Likewise, the entry for the adjective *picked* gives only one sense—"CHOICE, PRIME"—which is not the meaning of *picked* in such a context as "the picked fruit lay stacked in boxes awaiting shipment." A definition suitable for this use is not given at *picked* because one is given at the first homograph *pick,* the verb from which the adjective *picked* is derived, as sense 3a—"to gather by plucking."

INFORMATION AT INDIVIDUAL SENSES

Information coming between the entry word and the first definition of a multisense word applies to all senses and subsenses. Information applicable only to some senses or subsenses is given between the appropriate boldface numeral or letter and the symbolic colon. A variety of kinds of information is offered in this way:

^{2}**palm** *n* . . . 3 [L *palmus,* fr. *palma*]

^{2}**rally** *n* . . . 4 *also* **ral•lye**

^{1}**disk** *or* **disc** . . . *n* . . . **4** . . . **b** *usu disc*

cru•ci•fix•ion . . . *n* . . . **1 a** *cap*

^{1}**tile** . . . *n* . . . **1** *pl* **tiles** *or* **tile** **a** . . .

del•i•ca•tes•sen . . . *n pl* . . . **1** . . . **2** *sing, pl* **delicatessens**

fix•ing . . . *n* . . . **2** *pl*

^{2}**die** . . . *n, pl* **dice** . . . *or* **dies** . . . **1** *pl dice* . . . **2** *pl dies* . . . **3** *pl dies*

^{1}**folk** . . . *n, pl* **folk** *or* **folks** . . . **4** *folks pl*

At *palm* the subetymology indicates that the third sense, while ultimately derived from the same source (Latin *palma*) as the other senses of the word, has a different immediate etymon (Latin *palmus*), from which it receives its meaning. At *rally* one is told that in the fourth sense the word has a variant spelling not used for other senses and that this variant is a secondary or less common one. At *disk* the italic label of sense 4b indicates that, while the spelling *disk* is overall somewhat the more common (since it precedes *disc* out of alphabetical order at the beginning of the entry), *disc* is the usual spelling for this particular sense. At *crucifixion* the label *cap* points out the one meaning of the word in which it is capitalized. At the first homograph *tile* no plural is shown at the beginning of the entry because the usual plural, *tiles,* is regular. The subsenses of sense 1, however, have a zero plural as well as the usual one, and so both plurals appear in boldface at sense 1. At *delicatessen* the situation is different: the entry as a whole is labeled a plural noun, but sense 2 is used as a singular. In this sense *delicatessen* can take the plural ending *-s* when needed, a fact that is indicated by the appearance of the plural in boldface at the sense. At *fixing* the italic abbreviation simply means that when used in this sense the word is always written in its plural form, *fixings.* At the second homograph *die* the actual distribution of the variant plurals can be given sense by sense in italic type because both variants are shown in boldface earlier in the entry. At the first homograph *folk* a singular noun is shown with variant plurals of nearly equal frequency, when all senses are taken into account. The fourth sense, however, is unique in being always plural in form and construction. The form of the plural for this sense is *folks,* as shown, and the placement of the form before the label instead of after it (as at the senses of *die*) means that this sense is always plural.

When an italicized label or guide phrase follows a boldface numeral, the label or phrase applies only to that specific numbered sense and its subsenses. It does not apply to any other boldface numbered senses:

^{1}**boot** . . . *n* . . . **1** *archaic* . . . **2** *chiefly dial* . . . **3** *obs* . . .

^{1}**fa•vor** . . . *n* . . . **2** *archaic* **a** . . . **b** (1) . . . (2) . . . **3**

At *boot* the *archaic* label applies only to sense 1, the *chiefly dial* label only to sense 2, and the *obs* label only to sense 3. At *favor* the *archaic* label applies to all the subsenses of sense 2 but not to sense 3.

When an italicized label or guide phrase follows a boldface letter, the label or phrase applies only to that specific lettered sense and its subsenses. It does not apply to any other boldface lettered senses:

^{2}**stour** *n* . . . **1 a** *archaic* . . . **b** *dial Brit*

The *archaic* label applies to sense 1a but not to sense 1b. The *dial Brit* label applies to sense 1b but not to sense 1a.

When an italicized label or guide phrase follows a parenthesized numeral, the label or phrase applies only to that specific numbered sense:

in·car·na·tion . . . *n* . . . **1 a** (1) . . . (2) *cap*

The *cap* label applies to sense 1a(2) and to no other subsenses of the word.

Names of Plants & Animals

The entries that define the common or vernacular names (as *peach* and *lion*) of plants and animals or sometimes a related term (as *streptomycin*), if a common name is rare or does not exist, employ in part the formal, codified, New Latin vocabulary of biological systematics. This vocabulary has been developed and used by biologists in accordance with international codes of botanical and zoological nomenclature for the purpose of identifying and indicating the relationships of plants and animals. This system of names classifies organisms into a hierarchy of groups—taxa—with each kind of organism having one—and only one—correct name and belonging to one—and only one—taxon at each level of classification in the hierarchy.

This contrasts with the system of common or vernacular names which is determined by popular usage and in which one organism may have several names (as *mountain lion, cougar,* and *painter*), different organisms may have the same name (as *dolphin*), and there may be variation in meaning or overlapping of the categories denoted by the names (as *whale, dolphin,* and *porpoise*).

The fundamental taxon is the genus. It includes a group of closely related kinds of plants (as *Prunus,* which includes the wild and cultivated cherries, apricots, peaches, and almonds) or animals (as *Canis,* which includes domestic dogs, coyotes, jackals, and wolves). The genus name is a capitalized singular noun.

The unique name of each kind of organism or species—the binomial or species name—consists of a singular capitalized genus name combined with an uncapitalized specific epithet. The name for a variety or subspecies—the trinomial, variety name, or subspecies name—adds a similar varietal or subspecific epithet. The cultivated cabbage (*Brassica oleracea capitata*), the cauliflower (*Brassica oleracea botrytis*), and brussels sprouts (*Brassica oleracea gemmifera*) belong to the same species (*Brassica oleracea*) of cole.

Names of taxa higher than the genus (as family, order, and class) are capitalized plural nouns that are often used with singular verbs and that are not abbreviated in normal use. No two genera of animals in good standing are permitted to have the same name, nor are any two genera of plants in good standing. Since the botanical and zoological codes are independent, however, a plant genus and an animal genus may have the same name. Thus, a number of cabbage butterflies (as *Pieris rapae*) are placed in a genus of animals with the same name as the plant genus to which the Japanese andromeda (*Pieris japonica*) belongs. Although no two higher taxa of plants are permitted to have the same name, the rules of zoological nomenclature do not apply to taxa above the family so that rarely some widely separated groups may receive the same taxonomic name (as the ordinal name Decapoda in the entry *decapod*) from different specialists.

The taxonomic names of biological nomenclature used in this dictionary are enclosed in parentheses and usually come immediately after the primary orienting noun. Genus names as well as binomials and trinomials are italicized, but names of taxa above the genus are not italicized:

¹bee·tle . . . *n* . . . **1** : any of an order (Coleoptera) of insects having four wings of which the outer pair are modified into stiff elytra that protect the inner pair when at rest

rob·in . . . *n* . . . **1 a** : a small chiefly European thrush (*Erithacus rubecula*) resembling a warbler and having a brownish olive back and orangish face and breast **b** : any of various Old World songbirds that are related to or resemble the European robin **2** : a large No. American thrush (*Turdus migratorius*) with olivaceous to slate gray upperparts, blackish head and tail, black and whitish streaked throat, and dull reddish breast and underparts

strep·to·my·cin . . . *n* . . . : an antibiotic organic base $C_{21}H_{39}N_7O_{12}$ produced by a soil actinomycete (*Streptomyces griseus*), active against many bacteria, and used esp. in the treatment of infections (as tuberculosis) by gram-negative bacteria

Sometimes two or more different New Latin names can be found used in current literature for the same organism or group. This happens when older monographs and field guides are kept in print after name changes occur, when there are legitimate differences of opinion about the validity of names, and when the rules of priority do not apply or are not applied. To help the reader in recognizing an organism or group, some entries in this dictionary give two taxonomic names connected by "syn." for synonym:

li·on . . . *n* . . . **1 a** . . . : a large heavily-built social cat (*Panthera leo* syn. *Leo leo*) of open or rocky areas chiefly of sub-Saharan Africa . . .

Taxonomic names are used in this dictionary to provide precise technical identifications through which defined terms may be pursued in technical writings. Because of their specialized nature taxonomic names do not have separate entry. However, many common names are derived directly from the names of taxa and especially genera with little or no modification. It is particularly important to distinguish between a common name and the genus name from which it is derived without a change in spelling, as these names appear in print. The common name (as clostridium or drosophila) is not usually capitalized or italicized but does have a plural (as clostridia or drosophilas) which often has an ending different from that of the singular. In contrast the genus name (as *Clostridium* or *Drosophila*) is capitalized and italicized but never takes a plural. A common name in plural form (as coleoptera) may sometimes be spelled like the name of a taxon, but it is not usually capitalized.

The entries defining the names of plants and animals are usually oriented to higher taxa by other vernaculars (as by *alga* at *seaweed* or *thrush* at *robin*) or by technical adjectives (as by *composite* at *daisy, leguminous* at *pea,* or *oscine* at *warbler*) so that the name of a higher taxon may often be found by consulting an entry defining a more inclusive common name or a term related to it. Among the higher plants, except for the composites and legumes and a few tropical groups, such orientation is by a vernacular family name linked at the corresponding taxonomic entry to its technical equivalent:

²rose . . . *n* . . . **1 a** : any of a genus (*Rosa* of the family Rosaceae, the rose family) of usu. prickly shrubs with pinnate leaves and showy flowers . . .

ap·ple . . . *n, often attrib* . . . **1** : the fleshy usu. rounded and red, yellow, or green edible pome fruit of a tree (genus *Malus*) of the rose family; *also* : an apple tree

A genus name may be abbreviated to its initial letter when it is used more than once in senses not separated by a boldface number:

nas·tur·tium . . . *n* . . . : any of a genus (*Tropaeolum* of the family Tropaeolaceae, the nasturtium family) of herbs of Central and So. America with showy spurred flowers and pungent seeds; *esp* : either of two widely cultivated ornamentals (*T. majus* and *T. minus*)

Cross-Reference

Four different kinds of cross-references are used in this dictionary: directional, synonymous, cognate, and inflectional. In each instance the cross-reference is readily recognized by the lightface small capitals in which it is printed.

A cross-reference following a lightface dash and beginning with *see* or *compare* is a directional cross-reference. It directs the dictionary user to look elsewhere for further information. A *compare* cross-reference is regularly appended to a definition; a *see* cross-reference may stand alone:

wel·ter·weight . . . *n* . . . — compare LIGHTWEIGHT, MIDDLEWEIGHT

^{1}**ri·al** . . . *n* . . . — see MONEY table

A cross-reference immediately following a boldface colon is a synonymous cross-reference. It may stand alone as the only definitional matter for an entry or for a sense or subsense of an entry; it may follow an analytical definition; it may be one of two synonymous cross-references separated by a comma:

gar·ban·zo . . . *n* . . . **:** CHICKPEA

^{1}**ne·glect** . . . *vt* . . . **1 :** to give little attention or respect to **:** DISREGARD

^{2}**main** *adj* . . . **1 :** CHIEF, PRINCIPAL

A synonymous cross-reference indicates that a definition at the entry cross-referred to can be substituted as a definition for the entry or the sense or subsense in which the cross-reference appears.

A cross-reference following an italic *var of* is a cognate cross-reference:

kaf·tan *var of* CAFTAN

Sometimes a cognate cross-reference has a limiting label preceding *var of* as a specific indication that the variant is not standard English:

haul·ier . . . *Brit var of* HAULER

^{2}**hist** . . . *dial var of* HOIST

sher·ris . . . *archaic var of* SHERRY

A cross-reference following an italic label that identifies an entry as an inflected form of a noun, of an adjective or adverb, or of a verb is an inflectional cross-reference. Inflectional cross-references appear only when the inflected form falls at least a column away from the entry cross-referred to:

calves *pl of* CALF

^{3}**wound** . . . *past and past part of* WIND

When guidance seems needed as to which one of several homographs or which sense of a multisense word is being referred to, a superscript numeral may precede the cross-reference or a sense number may follow it or both:

^{1}**toss** . . . *vt* . . . **3** . . . **c :** MATCH 5a

Synonyms

Brief paragraphs discriminating words of closely associated meaning from one another have been placed at a number of entries. They are signaled by an indented boldface italic ***syn***. Each paragraph begins with a list of the words to be discussed in it, followed by a concise statement of the element of meaning that the words have in common. The discriminations themselves are amplified with verbal illustrations:

^{2}**answer** *vb* . . .
syn ANSWER, RESPOND, REPLY, REJOIN, RETORT mean to say, write, or do something in return. ANSWER implies the satisfying of a question, demand, call, or need ⟨*answered* all the questions⟩. RESPOND may suggest an immediate or quick reaction ⟨*responded* eagerly to a call for volunteers⟩. REPLY implies making a return commensurate with the original question or demand ⟨an invitation that requires you to *reply*⟩. REJOIN often implies sharpness or quickness in answering ⟨"who asked you?" she *rejoined*⟩. RETORT suggests responding to an explicit charge or criticism by way of retaliation ⟨he *retorted* to the attack with biting sarcasm⟩.

When a word is included in a synonym paragraph, the main entry for that word is followed by a run-on ***syn*** see — which refers to the entry where the synonym paragraph appears:

^{2}**respond** *vb* . . . ***syn*** see ANSWER

When a word is a main entry at which there is a synonym paragraph and is also included in another paragraph elsewhere, the paragraph at the main entry is followed by a run-on ***syn*** see in addition — which refers to the entry where the other paragraph may be found:

^{1}**nat·u·ral** . . . *adj* . . .
syn NATURAL, INGENUOUS, NAIVE, UNSOPHISTICATED, ARTLESS mean free from pretension or calculation . . . ***syn*** see in addition REGULAR

^{1}**reg·u·lar** . . . *adj* . . .
syn REGULAR, NORMAL, TYPICAL, NATURAL mean being of the sort or kind that is expected as usual, ordinary, or average . . .

Combining Forms, Prefixes & Suffixes

An entry that begins or ends with a hyphen is a word element that forms part of an English compound:

mega- *or* **meg-** *comb form* . . . **1** . . . **b** . . . ⟨*mega*hit⟩

-logy *n comb form* . . . **1** . . . ⟨phraseo*logy*⟩

-lyze *vb comb form* . . . ⟨electro*lyze*⟩

-like *adj comb form* . . . ⟨bell-*like*⟩ ⟨lady*like*⟩

pre- *prefix* . . . **1 a** (1) . . . ⟨*pre*historic⟩

^{1}**-ory** *n suffix* . . . **1** . . . ⟨observat*ory*⟩

^{1}**-ic** *adj suffix* . . . **2 a** . . . ⟨alderman*ic*⟩

^{2}**-ly** *adv suffix* . . . **1 a** . . . ⟨slow*ly*⟩

-ize *vb suffix* . . . **2 a** . . . ⟨crystall*ize*⟩

Combining forms, prefixes, and suffixes are entered in this dictionary for three reasons: to make easier the writing of etymologies of words in which these word elements occur over and over again; to make understandable the meaning of many undefined run-ons which for reasons of space would be omitted if they had to be given etymologies and definitions; and to make recognizable the meaningful elements of new words that are not well enough established in the language to warrant dictionary entry.

Lists of Undefined Words

Lists of undefined words occur after the entries of these prefixes and combining forms:

anti-
co-
counter-
hyper-
inter-
mis-
multi-
non-
out-
over-
post-
pre-
re-
self-
sub-
super-
ultra-
un-

These words are not defined because they are self-explanatory; their meanings are simply the sum of a meaning of the prefix or combining form and a meaning of the root word. Centered dots are shown to save the dictionary user the trouble of consulting another entry. The lists are not exhaustive of all the words that might be, or actually have been, formed with these prefixes and combining forms. The dictionary has room for only the most common or important examples.

The English Language in the Dictionary

In the offices where Merriam-Webster's Collegiate Dictionary, Tenth Edition, was edited, several thousand letters are received each year. The topics they articulate are enormously varied. Some letters merely ask for a particular bit of information about the English language that has been sought but not found in the dictionary. A few others are in hot pursuit of a special interest. Still others, their writers having come to think of the dictionary as an all-purpose reference book, ask questions about many other subjects besides words. A surprising number of correspondents, however, express considerable curiosity about how their dictionary—that formidably long and closely printed work with its many special abbreviations, symbols, and devices and its multitude of uses—came to be just the book it is.

They may ask quite directly such questions as how words make it into the dictionary or what it is that lexicographers do when they are editing or reediting a dictionary. But even questions of a very different sort on the surface may unwittingly reveal much the same interest. "Why did you fail to include word *x* in your book?" and "Why don't you still use the system of transcribing pronunciations with which I grew up instead of the present one with its 'up-side down *e*'?" may be in part expressions of annoyance at what is seen (not always accurately) as the dictionary's failure to do its job, but they are just as truly demands to know how dictionary editors make the decision to exclude some words from a given dictionary or to revise a long-standing feature of earlier editions. What follows is an effort to present a brief overview of the English language and its history and to provide brief and necessarily somewhat general answers to a few of the questions that users of this dictionary probably have about it, the processes that went into its making, and its relation to that fascinating and sometimes maddening marvel which we call the English language.

Language is the object of study of the academic discipline known as linguistics. Although the roots of linguistic science are found in earlier centuries, it is in most respects a modern creation, and the understanding of language that it offers us differs in a number of fundamental ways from the conceptions of language held by thinkers of the ancient and medieval worlds, the Renaissance, or the Enlightenment. This understanding does not differ, however, in every way. The use of language is still seen by linguists as a peculiarly human activity. We often use the word *language* to refer to the limited stock of movements or utterances by which some animals communicate a limited number of messages, but in doing so we recognize that we are speaking of something different in kind from our own language. Moreover, modern definitions of language are just as likely as earlier definitions to emphasize its functional aspect: language enables human beings, at least those who share a particular language, to communicate with each other by stating ideas, expressing feelings, and exchanging information.

Modern definitions of language, though, are more likely than older ones to stress some other aspects. One is the arbitrary nature of the relationship between the conventional sounds or other signs which serve as the vehicle of language and the meaning being conveyed by them. A few naive souls may believe that domestic swine are called pigs because their habits are so dirty, but it is clear to most that no inherent or necessary connection exists between the sequence of sounds \p\ plus \i\ plus \g\ and "any of various stout-bodied short-legged omnivorous mammals (family Suidae) with a thick bristly skin and a long mobile snout." A similarly naive Frenchman or German could insist with neither more nor less reason that *cochon* or *Schwein* is the word that naturally expresses the essential piggishness of the animal.

A linguistically oriented definition would also be likely to emphasize the systematic nature of language. Were it not for highly organized systems operating within any natural language, it could hardly be the subtle and effective tool of communication that it is. These systems are enormously complex both in themselves and in their mutual interaction, so complex indeed that no language has yet had its workings fully described; yet, paradoxically, and fortunately for the human race, any child with a normal ability to learn can, within a very few years, master at least the essentials of these systems for any one language with which it is in daily contact (or even two languages if the child's environment is bilingual). It is uncertain whether this is so because, as some linguists believe, at a profound level of structure the details that make English so different from other languages are unimportant and the systems of all languages are largely the same, but the fact that we learn our native language almost effortlessly up to a certain basic level of control is hardly to be denied.

The Systems of Language

The major systems that make up the broad comprehensive system of language itself are four in number: lexicon, grammar, semantics, and phonology. The one that dictionary editors and dictionary users are most directly concerned with is the vocabulary or *lexicon,* the collection of words and word elements which we put together in various ways to form larger units of discourse: phrases, clauses, sentences, paragraphs, and so forth. All languages have a lexicon, and all lexicons are governed by rules that permit some kinds of word formation, make others dubious, and render still others clearly impossible. In English we might say *versatileness* without hesitation if we needed such a word and could not for the moment think of *versatility,* even though the former is not normally part of our everyday working vocabulary; but *versatilize* might give us pause, and *nessversatile* we would simply never utter. The size of the lexicon varies considerably from language to language. The language of an isolated people, for example, may be perfectly adequate with a relatively small and fixed vocabulary, since it has no need of the coinages attendant upon modern technology, while English and other major languages have enormous stocks of words, to which they add year by year at a great rate. Since the dictionary is concentrated upon the lexicon, our discussion of the other systems of language, as it proceeds, will be largely concerned with how they are related to the lexicon and thus are important within the dictionary.

The grammatical system of language governs the way in which words are put together to form the larger units of discourse mentioned earlier. Grammar, of course, varies a great deal from language to language just as the lexicon does: in English, word order is a dominant factor in determining meaning, while the use of inflectional endings to mark the grammatical function of individual words within a sentence plays a clearly subordinate role, though important in some ways (as in indicating the number of a noun, the case of a personal pronoun, or the tense of a verb). Other languages show markedly different patterns, such as Latin with its elaborate set of paradigms for nouns, verbs, adjectives, and pronouns and its highly flexible word order. The semantic system of a language has to do with meanings and thus with the relation between the conventionalized symbols that constitute language and the external reality about which we need to communicate through language. The phonological system of a language is what allows a speaker of that language to transform a grammatical unit embodying a meaning into a flow of uttered sounds that can be heard and interpreted (accurately, if all goes well) by another speaker of the language. This system is always very tightly organized. The inventory of basic meaningful units of sound within a language (called *phonemes* by linguists) is never very large compared with the number of words and word elements in the lexicon; most speakers of English get by with about 40. Phonemes are identified by the fact that in some pairs of words they create a contrast that signals a difference in meaning: we consider the vowel sounds of *trip* and *trap* to be different phonemes because the difference in vowel sounds is the sole determinant of their being distinct words. Their consonant sounds are identical. Similarly, the initial consonant sounds of *pull* and *bull, tie* and *die,* and *come* and *gum* are contrasting phonemes. On the other hand, the sound at the beginning of *pit* and at the end of *tip* are phonetically quite different, but as they do not contrast meaningfully we do not perceive them as distinct phonemes. The combinations of these phonemes permitted in a given language are severely restricted, as are the ways in which speech sounds occur in conjunction with other significant elements of the phonological system such as stress (force or intensity) and intonation (the rise and fall in pitch of the voice as it moves through an utterance). In English, for example, it is possible for the consonants \str\ to occur in succession, but only at the beginning of a word (as in *strict*) or in the middle (as in *monstrous*), not at the end, and the sequence \pgr\ cannot occur at either the beginning or the end of a word but may occur in the middle (as in *upgrade*).

Variation and Change in Language

All of the systems of language are constantly in operation, and in a given language at a given time they may seem almost to be monolithic or at least to have sufficient identity that it makes sense, for example, to talk of *the* grammar of English. And, indeed, how could it be otherwise? Language would be a far more imperfect tool of communication than it is if the speakers of a language were not functioning within a system sufficiently unified to permit almost constant mutual intelligibility. Yet the impression of unity which we receive when we take a broad descriptive look at a single language at a particular time (taking a *synchronic* point of view, as linguists say) is more than a little misleading because it has failed to take account of the enormous variation that exists within the language.

Each of us speaks a distinctive form of English that is not identical in every particular with the form spoken by anyone else; linguists call this individual variety of a language an *idiolect.* Those whose idiolects share certain features of vocabulary, grammar, and phonology that are distinctively different from corresponding features shared by others who live in a different geographical area or belong to a different social group or who differ in some other way that affects their language are said to speak a *dialect* of the language. Researchers have identified a number of different geographical dialect areas within the United States, rather clearly marked on the Eastern seaboard but progressively less well defined as one moves west; yet, the dialects of American English do not differ overall very greatly from one another; some dialects of Great Britain are more strikingly divergent in phonology, for example, than are any two dialects within this country, and some dialects of other languages approach the condition of mutual unintelligibility that is often taken to divide separate dialects from separate languages.

Nor is variation in language by any means confined to matters of idiolect or dialect. Variation may also be related to the several functional varieties of a language that people take up and discard as their roles and relationships change from moment to moment throughout the day. Such variation can involve vocabulary, pronunciation, and even grammar. A worker who queries one colleague concerning the whereabouts of another with "Seen John?" from which both the auxiliary verb *have* and the subject *you* have been deleted may not put the question in the same casual way to a superior.

If variation is one of the most prominent aspects of language as one considers it today, the inescapable fact that emerges from considering language historically (taking a *diachronic* point of view, as linguists say) is change. No living language stands still, however much we might wish at times that it would. Change over the short run is most readily noticed in the lexicon, as a comparison of successive editions of any modern dictionary will show; in grammar and phonology the forces of change typically operate much more slowly. Still, the cumulative effect of changes that are imperceptible as they occur can be impressive when measured across the centuries. The English of one's great-great-grandfather might not sound so very different from one's own. Perhaps it might seem a bit stiff and formal, a bit old-fashioned in its vocabulary, but the differences would not be dramatic. If we could somehow listen to an English-speaker of King Alfred's time, however, we would hear what all but a few scholars of historical English would take to be a foreign tongue.

The History of English

The history of English is conventionally, if perhaps too neatly, divided into three periods usually called Old English (or Anglo-Saxon), Middle English, and Modern English. The earliest period begins with the migration of certain Germanic tribes from the Continent to Britain in the fifth century A.D., though no records of their language survive from before the seventh century, and it continues until the end of the eleventh century or a bit later. By that time Latin, Old Norse (the language of the Viking invaders), and especially the Anglo-Norman French of the dominant class after the Norman Conquest in 1066 had begun to have a substantial impact on the lexicon, and the well-developed inflectional system that typifies the grammar of Old English had begun to break down. The following brief sample of Old English prose illustrates several of the significant ways in which change has so transformed English that we must look carefully to find points of resemblance between the language of the tenth century and our own. It is taken from Aelfric's "Homily on St. Gregory the Great" and concerns the famous story of how that pope came to send missionaries to convert the Anglo-Saxons to Christianity after seeing Anglo-Saxon boys for sale as slaves in Rome:

> Eft he axode, hu ðære ðeode nama wære þe hi of comon. Him wæs geandwyrd, þæt hi Angle genemnode wæron. þa cwæð he, "Rihtlice hi sind Angle gehatene, for ðan ðe hi engla wlite habbað, and swilcum gedafenað þæt hi on heofonum engla geferan beon."

A few of these words will be recognized as identical in spelling with their modern equivalents—*he, of, him, for, and, on*—and the resemblance of a few others to familiar words may be guessed—*nama* to *name, comon* to *come, wære* to *were, wæs* to *was*—but only those who have made a special study of Old English will be able to read the passage with understanding. The sense of it is as follows: "Again he [St. Gregory] asked what might be the name of the people from which they came. It was answered to him that they were named Angles. Then he said, 'Rightly are they called Angles because they have the beauty of angels, and it is fitting that such as they should be angels' companions in heaven.' " Some of the words in the original have survived in altered form, including *axode (asked), hu (how), rihtlice (rightly), engla (angels), habbað (have), swilcum (such), heofonum (heaven),* and *beon (be).* Others, however, have vanished from our lexicon, mostly without a trace, including several that were quite common words in Old English: *eft* "again," *ðeode* "people, nation," *cwæð* "said, spoke," *gehatene* "called, named," *wlite* "appearance, beauty," and *geferan* "companions." Recognition of some words is naturally hindered by the presence of two special characters, þ, called "thorn," and ð, called "edh," which served in Old English to represent the sounds now spelled with *th.*

Other points worth noting include the fact that the pronoun system did not yet, in the late tenth century, include the third person plural forms beginning with *th-: hi* appears where we would use *they.* Several aspects of word order will also strike the reader as oddly unlike ours. Subject and verb are inverted after an adverb—*þa cwæð he* "Then said he"—a phenomenon not unknown in Modern English but now restricted to a few adverbs such as *never* and requiring the presence of an auxiliary verb like *do* or *have.* In subordinate clauses the main verb must be last, and so an object or a preposition may precede it in a way no longer natural: *þe hi of comon* "which they from came," *for ðan ðe hi engla wlite habbað* "because they angels' beauty have."

Perhaps the most distinctive difference between Old and Modern English reflected in Aelfric's sentences is the elaborate system of inflections, of which we now have only remnants. Nouns, adjectives, and even the definite article are inflected for gender, case, and number: *ðære ðeode* "(of) the people" is feminine, genitive, and singular, *Angle* "Angles" is masculine, accusative, and plural, and *swilcum* "such" is masculine, dative, and plural. The system of inflections for verbs was also more elaborate than ours: for example, *habbað* "have" ends with the *-að* suffix characteristic of plural present indicative verbs. In addition, there were two imperative forms, four subjunctive forms (two for the present tense and two for the preterit, or past, tense), and several others which we no longer have. Even where Modern English retains a particular category of inflection, the form has often changed. Old English present participles ended in *-ende* not *-ing,* and past participles bore a prefix *ge-* (as *geandwyrd* "answered" above).

The period of Middle English extends roughly from the twelfth century through the fifteenth. The influence of French (and Latin, often by way of French) upon the lexicon continued throughout this period, the loss of some inflections and the reduction of others (often to a final unstressed vowel spelled *-e*) accelerated, and many changes took place within the phonological and grammatical systems of the language. A typical prose passage, especially one from the later part of the period, will not have such a foreign look to us as Aelfric's prose has; but it will not be mistaken for contemporary writing either. The following brief passage is drawn from a work of the late fourteenth century called *Mandeville's Travels.* It is fiction in the guise of travel literature, and, though it purports to be from the pen of an English knight, it was originally written in French and later translated into Latin and English. In this extract Mandeville describes the land of Bactria, apparently not an altogether inviting place, as it is inhabited by "full yuele [evil] folk and full cruell."

> In þat lond ben trees þat beren wolle, as þogh it were of scheep; whereof men maken clothes, and all þing þat may ben made of wolle. In þat contree ben many ipotaynes, þat dwellen som tyme in the water, and somtyme on the lond: and þei ben half man and half hors, as I haue seyd before; and þei eten men, whan þei may take hem. And þere ben ryueres and watres þat ben fulle byttere, þree sithes more þan is the water of the see. In þat contré ben many griffounes, more plentee þan in ony other contree. Sum men seyn þat þei han the body vpward as an egle, and benethe as a lyoun: and treuly þei seyn soth þat þei ben of þat schapp. But o griffoun hath the body more gret, and is more strong, þanne eight lyouns, of suche lyouns as ben o this half; and more gret and strongere þan an hundred egles, suche as we han amonges vs. For o griffoun þere wil bere fleynge to his nest a gret hors, ʒif he may fynde him at the poynt, or two oxen ʒoked togidere, as þei gon at the plowgh.

The spelling is often peculiar by modern standards and even inconsistent within these few sentences (*contré* and *contree, o* [*griffoun*] and *a* [*gret hors*], *þanne* and *þan,* for example). Moreover, there is in addition to thorn another old character ʒ, "yogh," to make difficulty. It can represent several sounds but here may be thought of as equivalent to *y.* Even the older spellings (including those where *u* stands for *v* or vice versa) are recognizable, however, and there are only a few words like *ipotaynes* "hippopotamuses" and *sithes* "times" that have dropped out of the language altogether. We may notice a few words and phrases that have meanings no longer common such as *byttere* "salty," *o this half* "on this side of the world," and *at the poynt* "to hand," and the effect of the centuries-long dominance of French on the vocabulary is evident in many familiar words which could not have occurred in Aelfric's writing even if his subject had allowed them, words like *contree, ryueres, plentee, egle,* and *lyoun.*

In general word order is now very close to that of our time, though we notice constructions like *hath the body more gret* and *three sithes more þan is the water of the see.* We also notice that present tense verbs still receive a plural inflection as in *beren, dwellen, han,* and *ben* and that while nominative *þei* has replaced Aelfric's *hi* in the third person plural, the form for objects is still *hem.* All the same, the number of inflections for nouns, adjectives, and verbs has been greatly reduced, and in most respects Mandeville is closer to Modern than to Old English.

The period of Modern English extends from the sixteenth century to our own day. The early part of this period saw the completion of a revolution in the phonology of English that had begun in late Middle English and that effectively redistributed the occurrence of the vowel phonemes to something approximating their present pattern. (Mandeville's English would have sounded even less familiar to us than it looks.) Other important early developments include the stabilizing effect on spelling of the printing press and the beginning of the direct influence of Latin and, to a lesser extent, Greek on the lexicon. Later, as English came into contact with other cultures around the world and distinctive dialects of English developed in the many areas which Britain had colonized, numerous other languages made small but interesting contributions to our word-stock.

The historical aspect of English really encompasses more than the three stages of development just under consideration. English has what might be called a prehistory as well. As we have seen, our language did not simply spring into existence; it was brought from the Continent by Germanic tribes who had no form of writing and hence left no records. Philologists know that they must have spoken a dialect of a language that can be called West Germanic and that other dialects of this unknown language must have included the ancestors of such languages as German, Dutch, Low German, and Frisian. They know this because of certain systematic similarities which these languages share with each other but do not share with, say, Danish. However, they have had somehow to reconstruct what that language was like in its lexicon, phonology, grammar, and semantics as best they can through sophisticated techniques of comparison developed chiefly during the last century. Similarly, because ancient and modern languages like Old Norse and Gothic or Icelandic and Norwegian have points in common with Old English and Old High German or Dutch and English that they do not share with French or Russian, it is clear that there was an earlier unrecorded language that can be called simply Germanic and that must be reconstructed in the same way. Still earlier, Germanic was just a dialect (the ancestors of Greek, Latin, and Sanskrit were three other such dialects) of a language conventionally designated Indo-European, and thus English is just one relatively young member of an ancient family of languages whose descendants cover a fair portion of the globe. (For more detail on the Indo-European languages and their relationships, see the table having that title in the dictionary.)

The Dictionary and the Systems of English

By far the largest part of this volume is called "A Dictionary of the English Language" and so is naturally concerned with the systems of English that we have cursorily surveyed in their synchronic and diachronic aspects. In fact, information related to all four systems is given at most entries in the dictionary, as well as information related to what could reasonably be considered a fifth system of English and many other (though not all) languages —writing. The writing system provides an alternative to speech that permits long-distance transmission and visual reception of a communication and also enables a record to be kept for much longer than human memory can keep it. The writing system of Modern English allows for considerable variation, as is shown by the persistence of variant spellings like *veranda* and *verandah* or *judgment* and *judgement* and by the fact that many compound words have open, hyphenated, and solid stylings all in common use concurrently (as *decision maker, decision-maker,* and *decisionmaker*). At the same time, however, it tends to be a force for standardization and unification because recorded language creates a precedent for future language use and provides a basis on which language use can be taught to the younger members of a community. This conservative effect is one reason why spelling reformers have so far met with but modest success in their efforts.

We may now begin to look at the ways in which the specific systems of our language are treated in the dictionary and at the processes of lexicography which produce the information about these systems that the dictionary user encounters. A dictionary is necessarily and obviously concerned with the lexicon above all, and the information it can convey about the language systems is confined to the level of the word or short phrase. The result is that no dictionary of English, however good it may be, can provide all of the information about the English language that one might wish to have at one time or another. Thus, for example, details about such important aspects of phonology as the patterns of sentence stress and sentence intonation cannot be accommodated in a work of reference organized in terms of words, nor can grammatical topics such as word order in subordinate clauses or the structural relation of interrogative to declarative sentences.

The History of English in the Dictionary

A similar limitation applies to the treatment of the historical aspect of English; yet, Merriam-Webster's Collegiate Dictionary, Tenth Edition is able to offer a good deal of historical information about words. What we earlier called the prehistory of English is encountered in the etymologies that appear in square brackets ahead of the definitional material at many entries. An etymology tells us what is known of an English word before it became the word we enter in the dictionary; that is, if the word was created in English the etymology shows, to whatever extent is not already obvious from the shape of the word, what materials were used to form it, and if the word was borrowed into English the etymology traces the steps of the borrowing process backward from the point at which the word entered English to the earliest recorded ancestral language. Where it is most relevant, note is made of one or several words from other languages that are related ("akin") to the entry word but are not in the direct line of borrowing. Thus, a word like Aelfric's *heofon* (ignoring for the moment the dative plural inflection *-um* that it bears in the passage we looked at earlier) appears as part of this dictionary's etymology for the modern word *heaven:* [ME *heven,* fr. OE *heofon;* akin to OHG *himil* heaven]. Since *heaven* is a native English word, it has only two recorded ancestors, Middle English *heven* and Old English *heofon.* Beyond those forms lie only the hypothetical, reconstructed forms of West Germanic, Germanic, and Indo-European. In this case one related West Germanic word is shown, Old High German *himil*, which is the parent of Modern German *Himmel* but only a second cousin of our English word. Similarly Mandeville's *contree* appears as the first element in the etymology of its modern descendant *country:* [ME *contree,* fr. OF *contrée,* fr. ML *contrata,* fr. L *contra* against, on the opposite side]. Here we see that our word can be traced back through three nouns of Middle English, Old French, and Medieval Latin (all of which had the same basic meaning as the Modern English noun and so are not glossed) to a Latin preposition (which has a different meaning and so is glossed). The two etymological patterns are, as we would expect from what we know of the history of the English vocabulary, among the most common and are repeated with differing details at entry after entry throughout the book. Of course, borrowings that have occurred within the Modern English period are more various, and we find such exotic language names as Nahuatl (at *chocolate*), Taino (at ²*barbecue*), Tagalog (at *boondocks*), Malay (at ¹*amok*), and Kimbundu (at *banjo*) as well as the more familiar Russian (at *troika*), Italian (at ¹*ballot*), Arabic (at *mullah*), Spanish (at ¹*macho*), and Japanese (at *tycoon*).

An etymologist must know a good deal about the history of English and also about the relationships of sound and meaning and their changes over time that underlie the reconstruction of the Indo-European family, but even that considerable learning is not enough to do all that must be done to provide etymologies of English words in a dictionary such as this. A knowledge is also needed of the various processes by which words are created within Modern English: among the most important processes are shortening, or clipping (see ¹*prom*), functional shift (as the noun *commute* from the verb *commute*), back-formation (see *grid*), combination of initial letters (see *radar*), transfer of personal or place names (see *silhouette* and *denim*), imitation of sounds (see ¹*whiz*), folk etymology (see *Jerusalem artichoke*), and blending of two words (see *motel*). Also available to one who feels the need for a new word to name a new thing or express a new idea is the very considerable store of prefixes, suffixes, and combining forms that already exist in English. Some of these are native and others are borrowed from French, but the largest number have been taken directly from Latin or Greek, and they have been combined in many different ways often without any special regard for matching two elements from the same original language. The combination of these word elements has produced many scientific and technical terms of Modern English. Once in a while a word is created spontaneously out of the creative play of sheer imagination. (For examples of the latter sort of creation see the etymologies of *boondoggle* and *googol* in the dictionary. Such invention is common, as Merriam-Webster editors know from their mail, which frequently includes requests from coiners that their brand-new words be entered in the dictionary. Very few coinages of this kind ever come into common enough use to justify dictionary entry, however.)

An etymologist working on a new edition of the Collegiate Dictionary must review the etymologies at existing main entries and prepare such etymologies as are required for the main entries being added to the new edition. In the course of the former activity adjustments must sometimes be made either to incorporate a useful piece of information that has previously been overlooked or to revise the account of the word's origin in the light of new evidence. Such evidence may be unearthed by the etymologist or may be the product of published research by scholars of historical linguistics and others. In writing new etymologies this editor must, of course, be alive to the possible languages from which a new term may have been borrowed and to the possible ways in which one may have been created. New scientific and technical terms sometimes pose special difficulties. While they are most often formed from familiar word elements, occasionally a case like *methotrexate* presents itself in which one part (here *-trexate*) resists identification.

When all attempts to provide a satisfactory etymology have failed, the editor has recourse to the formula "origin unknown." This formula seldom means that the editor is unaware of various speculations about the origin of the term but instead usually means that no single theory conceived by the etymologist or proposed by others is well enough backed by evidence to include in a serious work of reference, even when qualified by "probably" or "perhaps." Thus, our editors frequently have to explain to correspondents that the dictionary fails to state that the origin of *posh* is in the initial letters of the phrase "port out, starboard home"—supposedly a shipping term for the cooler accommodations on steamships plying between Britain and India from the mid-nineteenth century on—not because the story is unknown to us but because no evidence to support it has yet been produced. Some evidence exists that casts strong doubt on it; the word is not known earlier than 1918 (in a source unrelated to shipping), and the acronymic explanation does not appear until 1935. It therefore seems reasonable to consider the acronymic explanation a modern invention and assign *posh* the etymology [origin unknown]. The etymologist must sift such theories, often several conflicting theories of greater or lesser likelihood, and try to evaluate the evidence conservatively but fairly in arriving at the soundest possible etymology that the available information permits. Occasionally time will prove the result to be somewhat (or even quite) mistaken, and the etymology will need to be replaced by something better. This can happen even when the etymologist felt quite certain of the original etymology, and it is just one reason why dictionaries must be reedited from time to time if they are to remain reliable.

Historical information about words is also provided by the date appearing in parentheses just before the first or only definition at most main entries. The date given is for the earliest recorded use known to our editors of the first entered sense of that entry. In most cases the date is also, in effect, for the earliest use of the word itself that we know of. Some words, however, had early senses that later passed from common use without gaining special literary importance, and these senses are omitted from this dictionary. Because it would be misleading to give a date for a sense that the dictionary does not show, the date is always for the first sense actually defined at the entry. Because the senses of any word having more than one are always presented in historical order, with the one known to have been used first given first, the date serves as a link between the prehistory of the word shown in the etymology and its later recorded history of semantic development within the language as reflected in the order of definitions.

Evidence for the dates has come from a number of sources. Especially for words that have been a part of the language since before this century, the most important sources have been the major historical dictionaries of English. These works include for each sense dated examples of use from one or several authors including the earliest one available to the editors. Chief among these dictionaries is the majestic twenty-volume Oxford English Dictionary, Second Edition. Also of great importance have been the Middle English Dictionary, A Dictionary of American English, A Dictionary of Americanisms, The Scottish National Dictionary, and A Dictionary of the Older Scottish Tongue. Other dictionaries and studies that include dated quotations and have proved helpful in particular cases include Hobson-Jobson (a glossary of Anglo-Indian terms), The Stanford Dictionary of Anglicised Words and Phrases, Bailey's Early Modern English, Schäfer's Early Modern English Lexicography, Wright's English Dialect Dictionary, Cassidy and Le Page's Dictionary of Jamaican English, Branford's Dictionary of South African English, Avis's Dictionary of Canadianisms on Historical Principles, Cassidy's Dictionary of American Regional English, Wentworth's American Dialect Dictionary, Wentworth and Flexner's Dictionary of American Slang, and the several editions of The Barnhart Dictionary of New English. The Century Dictionary and Cyclopedia and the successive editions of Merriam-Webster's unabridged dictionaries and their supplements of new words have also provided much assistance, for while these dictionaries do not incorporate dated quotations, an entry in one or another of them is sometimes earlier than any example of the word from running text that we have been able to find.

The other major source of dates, especially for the period from 1890 to the present, is the Merriam-Webster file of examples of words used in context, which are called citations. More will be said of this collection later. Here it need only be noted that among the more than 14,500,000 slips which the file contains frequently appear one or more examples of a given word that are earlier than any quoted in other sources. And, of course, our citations have been essential to the dating of a considerable number of entries not included in any of the dictionaries mentioned above. The date of 1949 at *classical conditioning* is a case of the first sort, the earliest example in a reference source being from 1964, while the date of 1979 at *elevator music* is of the second sort. Some of the older books in our editorial library and in other libraries to which our editors have access have occasionally supplemented the resources of the citation file in supplying dates.

Almost from the appearance of the first volume of The Oxford English Dictionary, scholars have been discovering earlier dates for particular words and senses by examining works not searched for examples by the dictionary's readers or by reading some works a second time and publishing the results of their findings in various journals. Many hundreds of entries in this dictionary include a date derived from one of these articles, and while far too many scholars and other interested students have participated in this work for a listing here to be practical, some collective acknowledgment of our debt to them is necessary. The date of 1676 at *menagerie* may be cited as an example of one derived from a source of this kind; the quotation discovered by this scholar is 36 years older than the earliest example that had previously been found.

The style of the date is determined by the period of English to which the sense being dated belongs: for entries from Old English we indicate simply that the example is from the period before the twelfth century (bef. 12c); for those from Middle English we indicate their century, as (14c); for those from Modern English we give a single year, as (1742).

Some caution needs to be exercised in interpreting the significance of a date. It is never meant to indicate the exact point at which a word entered the language. For one thing, words have often been in spoken use for many years before they come to be written down. For another, many texts from the earlier periods in which they might have been written down have not survived. Then, too, not all surviving texts, even for the earlier periods, have been read to collect examples for any historical dictionary, and obviously for the modern era only a very small sample of all published material has been examined in that way. One can perhaps with some justification think of the date as indicating a time by which one can be sure that the word was in use, but it will be safest simply to remember that the date actually belongs to the earliest occurrence known to the editors of this dictionary of the first entered sense of the word.

Leaving the historical aspect of English aside now, we may consider how information about the systems of English as they presently exist is recorded in this dictionary. The phonological system needs little more than a mention here. Its role in this dictionary is discussed in some detail in the "Guide to Pronunciation," which immediately follows this section, as is the way in which the pronunciations shown in the dictionary have been determined.

Semantics in the Dictionary

In turning to consider the coverage of the semantic system in the dictionary, we face several difficult problems. If one function of a dictionary is more important than its many others, surely that function is to define the meaning of words. But while definition is central to the dictionary and quite obviously is involved with semantics, for the most part it deals with individual words in isolation from other words and thus ignores, to a considerable extent, the systematic, relational side of English semantics. Another problem is that although we know quite a lot about the system of English phonology and a good deal (though less) about the grammatical system, our understanding of the semantic system is very imperfect, and much of what we do know about it does not come very obviously into play in a dictionary. Still, we will have a glimpse of this system when we consider the dictionary treatment of synonyms, and in the meantime there is much to be said about the defining of words. Perhaps the first thing that we need to remind ourselves of is that when we speak of the meaning of a word we are employing an artificial, if highly useful, convention. Meaning does not truly reside within the word but in the minds of those who hear or read it. This fact alone guarantees that meaning will be to a great degree amorphous; no two people have had exactly the same experience with what a word refers to and so the meaning of the word will be slightly or greatly different for each of us. It is obvious, then, that a dictionary which set itself the task of defining the meanings of words in their entirety would be a foolhardy enterprise. So dictionary editors invoke the traditional distinction between *denotation*—the direct and specific part of meaning which is sometimes indicated as the total of all the referents of a word and is shared by all or most people who use the word—and *connotation*—the more personal associations and shades of meaning that gather about a word as a result of individual experience and which may not be widely shared. The dictionary concerns itself essentially with the denotations of words.

For the editors of this dictionary the defining process began long before they actually sat down to examine critically the definitions of the last edition and to formulate trial definitions. It began with an activity that is called in our offices "reading and marking". Ordinarily each editor spends a portion of the working day reading a variety of newspapers, magazines, and books, looking for anything that might be useful to a definer of English words. Because both time and staff are limited and the scope of English seems nearly unlimited, changes in subject matter, geographical area covered, and individual publications must be made from time to time in a way carefully calculated to ensure the breadth and depth as well as the continuity of our coverage of the vocabulary of English. An editor who is reading and marking will, of course, be looking for examples of new words and for unusual applications of familiar words that suggest the possible emergence of a new meaning but will also be concerned to provide evidence of the current status of variant spellings, inflected forms, and the stylings of compound words, to collect examples that may be quotable as illustrations of typical use in the dictionary, and to record many other useful kinds of information. In each instance the reader will underline the word or phrase that is of interest and mark off as much context as is considered helpful in clarifying the meaning. This example of a word used in context is called a *citation* of the word. Ideally the editor would like all citations to illuminate the meaning of the word, but some passages will remain obscure no matter how far they extend, and sometimes one must mark a citation simply for the occurrence of the word or meaning (especially when it is new), trusting that the reading-and-marking process will yield more helpful examples in the long run. In the case of ephemeral words, of course, this may never happen, but truly ephemeral words will not need to be defined for a dictionary. At this early stage of the dictionary-making process, editors do not make judgments about the likelihood of a word's establishing itself in the language. If a possible citation has even the barest potential to be useful at a later time, it is marked.

These samples of words in bracketed context are put onto 3 × 5 slips of paper, and the citation slips are placed in alphabetical order in rows of filing cabinets. (In recent years new citations have also been preserved in machine-readable form.) The slips will be used, as needed, by the editors in their roles as writers of definitions and certain other parts of dictionary entries. The editors engaged in this tenth edition of the Collegiate reviewed every one of the nearly million and a half citations that had been gathered since the ninth edition was prepared in the early 1980s. When necessary, they also drew upon the additional resources of what are called the "consolidated" files, those that contain all the citations (over thirteen million) that had been accumulated in our offices since the late nineteenth century and had been used in the editing of the many dictionaries this company published before the present one.

The actual defining process begins with a number of special assignments called "group defining projects," which may range from a small set of words like those for the days of the week or the letters of the English alphabet (for which parallel, formulaic definitions are required) to the vocabulary of a large subject area such as music or anthropology. When these assignments have been completed, defining proceeds alphabetically, with the editors responsible for the terminology of the life sciences or the physical sciences and related technologies working independently of the editors responsible for defining the general vocabulary.

If you were a definer, you would typically be working at a given moment with a group of citations covering a relatively short segment of the alphabet, *gri-* to *gro-*, for example, and with the entries of the dictionary being reedited that fall within the same segment. Your job would be to determine, under the guidance of the citations, which existing entries could remain in the new edition essentially unchanged because their usage showed no significant alteration, which entries needed to be revised either by modification of existing definitions or by the addition of new ones, which old entries were expendable for the new edition, and what new entries should be added to keep coverage of the lexicon up-to-date. You would begin by reading and sorting out the citation slips, first by grammatical function, in the case of a word like *groom* that is both noun and verb, and then by meaning within each part of speech. For each group of citations that was covered by an adequate existing definition, you would need only to indicate that you had examined them and would do nothing to the definition. For definitions needing adjustment, you would indicate the change to be made. In many cases, you would have some citations left over that were not covered by an existing definition, and it would then be your job to determine whether that segment of meaning was perhaps relatively uncommon and not backed by a sufficient range and number of citations and so not needed for the dictionary or whether in fact it was a sense that dictionary users are entitled to find suitably defined when they come looking for it. In the former case you would reject the citations, and eventually they would find their way back to the files to await review for another dictionary (by which time perhaps the citational backing would be stronger and a definition needed). In the latter case the responsibility to frame the kind of definition that will adequately convey that particular segment of meaning to the dictionary user would be yours.

In writing that definition, you could follow any of a number of paths marked out by the instructions given to each definer. These include both the general policies and practices that govern all Merriam-Webster dictionaries and the more specific directions and prohibitions contained in the "style file," as it is called, for this particular dictionary.

The kind of definition that you would write in most cases is called an analytical definition. It consists in its purest form of the statement of a class to which the term being defined is assigned and a number of characteristics which differentiate the individual from other members of the class. For example, the first sense of *grove* is defined in this Collegiate as "a small wood without underbrush," assigning a grove to the more general class of woods and using "small" and "without underbrush" to indicate in what ways a grove is unlike other kinds of woods. Another possibility would be for you to define a synonym, as is done at the sixth sense of the noun *grip,* where the definition is "STAGEHAND." Defining by synonym tends to be inexact because even true synonyms do not have just the same meaning and is perhaps most useful in cases like the one just mentioned where one kind of referent has two or more names, a situation that occurs frequently with the common names of plants and animals. For this reason we link any synonym definition to an analytical definition by making the synonym a cross-reference (in small capital letters) to another entry where an analytical definition suitable for both words is given: at *stagehand* is the definition "a stage worker who handles scenery, properties, or lights," which is also a good definition of the sixth sense of *grip*.

Within these basic defining patterns many variations are permitted. Some analytical definitions may justifiably be truncated by the use of a related word within the definition in order to save precious space for more entries. For example, *grievance committee* can be defined as "a committee formed by a labor union or by employer and employees jointly to discuss and where possible to eliminate grievances" because the second sense of *grievance* is "a cause of distress (as an unsatisfactory working condition) felt to afford reason for complaint or resistance," and so the definition of *grievance committee* need not give that information a second time.

It is also possible to add a synonomous cross-reference to an analytical definition and thereby incorporate at little cost of space a second version of the meaning that looks at it from a slightly different aspect. It is possible, as in the definition of *grievance* just cited, to add a parenthetical element that specifies one or several of the typical referents of the word or that indicates the sole or a typical object of a transitive verb. One may begin an adjective definition with one of a wide variety of formulas but others are forbidden. It is clear already that definers' instructions are elaborately detailed, and it would be tedious to rehearse them here. Their purpose is to assist in developing the definer's native talent so that the definitions that he or she writes are consistently good ones. What is a good definition? Many qualities could be mentioned, and probably different definers would rank the relative importance of those on any list differently; but all definers want a sufficient range and number of their definitions to be objective in reflecting what the word means as it is actually used rather than what the definer or someone else thinks it ought to mean, and they want their definitions to be accurate, clear, informative, and concise. In short, they want their definitions to have the qualities that users have in mind when they call a dictionary they admire "authoritative."

In the course of your defining, you would have an opportunity fairly often to make another kind of decision: whether to include or omit a new candidate for main entry. Let us take as an example the word *greenmail*, which is one of many entries new to this edition of the Collegiate Dictionary. If you had been the definer who handled that word, you would have been faced with a group of over three dozen citations to read covering a span of nine years, with the greatest concentration in the five years from 1984 to 1988 but continuing to the present. They would include extracts from such publications as *The New York Times, TV Guide, Newsweek, Art in America, The Boston Globe, The New Yorker, Fortune, The Christian Science Monitor, Vogue, The Wall Street Journal,* and *Harper's*. In reading the citations you would notice that while they varied in many details of context, they seemed to be describing a single kind of situation in the corporate world but that *greenmail* itself might refer either to the practice as a whole or (much less often) to the money paid to buy back the stock. You might then have produced the following definition incorporating those two meanings: "the practice of buying enough of a company's stock to threaten a hostile takeover and reselling it to the company at a price above market value; *also* : the money paid for such stock."

The number and time span of the citations and the variety of the sources would already have told you that this was a very strong, and perhaps even an essential, candidate for entry in the new edition. There is no magic number of citations that guarantees entry and no particular span of years that must be reached. To a great extent the judgment made here must rest on your insight and experience as a definer who has seen the citational backing for many words, who has most likely defined words for other Merriam-Webster dictionaries in the past, and who thus has some sense of the relative importance and degree of establishment of new entries within the lexicon and of their likely staying power.

You would have noticed that in addition to the evidence for the noun *greenmail* there were also nine citations for *greenmail* used as a verb and nineteen for an agent noun *greenmailer*. Seeing both that they were less important than the noun (though also well backed by citations) and that their meanings were easy to infer from the meaning of the main entry word, you would have added them to your new main entry as undefined run-ons.

To take one further example of a somewhat different kind, if you had been the life-sciences definer responsible for handling the term *magnetic resonance imaging*, you would have read 30 citations. Many of these would have been from sources such as *The Journal of the American Medical Association* and *Science News,* likely to be seen chiefly by people with specialized interests; but you would also have seen examples from *Sports Illustrated, Discover, The New York Times,* and *Business Week*. In other words, the term is likely to be encountered by people with general interests and, given its nature, will probably be looked up in a dictionary fairly often. Such considerations would have led you to propose entry for the term and with a much higher priority than if the citational backing had been nearly all technical.

It is worth noting briefly that in the course of your work as a definer you would have been concerned with what the citations reveal about a word in addition to its meaning. The definer is initially responsible for most of the framework of the entry including not only spelling variants and run-ons but also inflected forms, usage notes, verbal illustrations, and temporal, regional, stylistic, and subject labels.

The other important part of the entries in this dictionary that is concerned with English semantics is the synonym paragraph. These paragraphs are not written by each individual definer as particular entries are encountered but are rather the special assignment of usually one editor, who decides which words will be included in a single paragraph and at which entry the paragraph will be placed. The synonym editor has a number of responsibilities in addition to the actual writing or revising of the synonym paragraph. Each entry for a term discussed in a paragraph must be checked to ensure that the definition of a given sense is fully consonant with its treatment in the paragraph, and the editor has the authority to make small adjustments of definitions so that no discrepancies which might puzzle a user remain.

Like the definer, this editor must read citations very carefully to see that the opening statement of the core meaning shared by the synonyms includes neither too much nor too little, that each discrimination of one word from the others is accurate, and that typical examples are chosen as a basis on which to frame verbal illustrations. It is particularly in these paragraphs that the dictionary user comes into contact with the systematic side of English semantics because here the concern is with the relationship of meanings instead of the meanings themselves as discrete entities. For example, the synonym paragraph at *splendid* in this dictionary states that *splendid, resplendent, gorgeous, glorious, sublime,* and *superb* mean "extraordinarily or transcendently impressive." This statement of meaning is at once too broad and too narrow to be a good definition for any of the words; it trims away the particular elements of meaning that make each word distinctive (the most important of which are stated in the following discussion). It does, however, give us an accurate notion of the point at which these words come into a precise semantic relationship with each other.

Grammar and Usage in the Dictionary

The last of the four systems of English whose reflection we may see, at least briefly and occasionally, in the dictionary is the grammatical system. As we saw earlier, this system involves chiefly the relationship between words as they form more complex units rather than individual words themselves. A descriptive grammar of English is a very different kind of book from a dictionary. Nevertheless, virtually every entry in this dictionary contains at least one piece of information about its grammatical nature and the kinds of relationships it can enter into, namely, the functional label which typically indicates the part of speech of the entry or, in the case of terminal word elements, the part of speech of the words that they form. If an entry is labeled *adv*, we know that it can describe the action of a verb but cannot itself be the main verb of a sentence, while an entry labeled *n* cannot link the subject of a sentence with a predicate adjective but can be the subject. Other parts of the entry also give us information that is grammatical in nature. One sort of information is offered by the boldface inflected forms that are shown at every entry for which they are irregular exceptions to the ordinary patterns of English inflection or may present some other sort of problem to the dictionary user. Another is offered by the undefined run-on entries. They illustrate the complex patterns by which one word or a number of words can be derived from a single base by means of affixation or functional shift. Certain kinds of usage notes following or standing in place of definitions also present grammatical information. Typical of the former kind of usage note is the one given at sense 3c of *boy*, "often used interjectionally to express intensity of feeling," and the one given at sense 2b of the verb ³*conk*, "usu. used with *off* or *out*." Typical of the latter are the several usage notes at the entry for the preposition *for*, "used as a function word to indicate duration of time or extent of space" at sense 9, for example.

Usage is a concept that embraces many aspects of and attitudes toward language. Grammar is certainly only a small part of what goes to make up usage, though some people use one term for the other, as when they label what is really a controversial point of usage a grammatical error. Usage guidance is offered in this dictionary in many ways; it would be little exaggeration to say that any information a user seeks and finds in this book can offer some guidance as to usage. But usage information is chiefly conveyed through three devices: usage notes; temporal, regional, and stylistic labels; and usage paragraphs. The first two are developed by definers from their examination of citations, including sometimes (and particularly in the case of the labels) citations found in historical, dialect, and slang dictionaries as well as those in Merriam-Webster's citation file. The usage paragraphs like the synonym paragraphs are the result of a special project chiefly in the hands of one editor with assistance from several others. The editors attempted to select particular problems of confused or disputed usage that would be of broad general interest and could be treated at individual entries in the dictionary. The great majority of them involve words that have traditionally been points of dispute (a few of these are now probably more traditional than truly the subjects of heated dispute), but some are relatively new items for this kind of consideration. Several paragraphs deal with pronunciation, a subject rarely treated in books about usage.

The editors who wrote the paragraphs used several kinds of material: books describing one or another aspect of the history of usage as a problem in English; books and articles ruling on particular points of usage, whether the product of one person or a group; historical and other dictionaries; and above all citations of usage itself from our file. In digesting this mass of information and presenting it in a very brief compass, the editors have typically combined information on the history of the controversy, the current state of expressed opinion, illustrations of both old and modern use (often quoted), and practical advice. These paragraphs have profited greatly from the extensive research in the same materials that was carried out in the course of work on Merriam-Webster's Dictionary of English Usage.

It has been close to 250 years since Dr. Johnson published his great dictionary and well over 150 years since Noah Webster's American Dictionary of the English Language appeared. Even the more modest Collegiate series will be approaching its hundredth birthday in just a few years. It seems clear that the long tradition of English dictionaries is not likely to wither and die. Indeed, dictionaries are likely to become, if anything, even more important to the general public in the future, at least as long as the vocabulary of English continues the rapid growth which began earlier in this century and which seems now to intensify year by year. As long as they are edited with a proper regard for the right of the dictionary user to have accurate information about what English words actually mean and how they are actually used, those dictionaries will continue to serve a useful purpose and to be needed. Though they are incomplete as descriptions of the systems of English and are edited by fallible humans whose best intentions sometimes fall short of the mark, such dictionaries will continue to form, as the best dictionaries have always done, a helpful bridge between what we know about language and how we use it. Movement across such a bridge is, of course, in both directions: our use of language furnishes the basis for our knowledge of it, but our knowledge of it also helps us to use it more effectively.

Guide to Pronunciation

Pronunciation is not an intrinsic component of the dictionary. For some languages, such as Spanish, Swahili, and Serbo-Croatian, the correspondence between orthography and pronunciation is so close that a dictionary need only spell a word correctly to indicate its pronunciation. Modern English, however, displays no such consistency in sound and spelling, and so a dictionary of English must devote considerable attention to the pronunciation of the language. The English lexicon contains numerous eye rhymes such as *love, move,* and *rove,* words which do not sound alike despite their similar spellings. On the other hand, it also contains rhyming words such as *breeze, cheese, ease, frieze,* and *sleaze* whose rhymes are all spelled differently.

This grand mismatch between words that look alike and words that sound alike does at least serve to record something of the history of the English-speaking peoples and their language. Spelling often indicates whether a word comes down from the native Anglo-Saxon word stock or was adopted in successive ages from the speech of a missionary monk chanting Latin, a seafaring Viking dickering in Old Norse, a Norman nobleman giving orders in French, or a young immigrant to turn-of-the-century America. For example, the sound \sh\ is spelled as *sh* in native English *shore,* as *ch* in the French loan *champagne,* as *sk* in one pronunciation of the Norwegian loan *ski,* as *si* in the Renaissance Latin loan *emulsion,* and as *sch* in the recent Yiddish loan *schlepp.* English vowels present different complexities of sound and spelling, due in large part to the fact that William Caxton introduced printing to England in A.D. 1476, many decades before the sound change known as the Great Vowel Shift had run its course. With the rise of printing came an increasingly fixed set of spelling conventions, but the conventionalized spellings soon lost their connection to pronunciation as the vowel shift continued. The stressed vowels of *sane* and *sanity* are therefore identical in spelling though now quite different in quality. For the trained observer the vagaries of English orthography contain a wealth of linguistic history; for most others, however, this disparity between sound and spelling is just a continual nuisance at school or work.

Readers often turn to the dictionary wanting to learn the exact pronunciation of a word, only to discover that the word may have several pronunciations, as is the case for *deity, economic, envelope,* and *greasy,* among many others. The inclusion of variant pronunciations disappoints those who want their dictionary to list one "correct" pronunciation. In truth, though, there can be no objective standard for correct pronunciation other than the usage of thoughtful and, in particular, educated speakers of English. Among such speakers one hears much variation in pronunciation.

Dictionaries of English before the modern era usually ignored pronunciation variants, instead indicating a single pronunciation by marking the entry word with diacritics to indicate stress and letter values. These systems were cumbersome, however, and reflected the dialectal biases of the editors more than the facts about how a word was actually spoken. Lexicographers came eventually to recognize the need for separate respellings which could record the entire range of accepted variants along with appropriate notes about dialectal distribution or usage.

This dictionary records many types of variation in pronunciation. Distinctions between British and American speech are frequently noted, as are differences among the three major dialect areas of the U.S.—Northern, Southern, and Midland. Words that have distinctive pronunciations in Canada, such as *decal* and *khaki,* have those pronunciations duly noted. Pronunciations peculiar to certain spheres of activity are also represented, as for example the variants of *athwart* and *tackle* heard in nautical use. Finally, a wide range of unpredictable variations are included, such as the pronunication of *economic* with either \e\ or \ē\. Unpredictable variations frequently cut across the boundaries of geographical dialects, sometimes running along the lines of social class, ethnicity, or gender instead. In fine, this dictionary attempts to include—either explicitly or by implication—all pronunciation variants of a word that are used by educated speakers of the English language.

The pronunciations in this dictionary are informed chiefly by the Merriam-Webster pronunciation file. This file contains citations that are transcriptions of words used by native speakers of English in the course of utterances heard in speeches, interviews, and conversations. In this extensive collection of 3 × 5 slips of paper, one finds the pronunciations of a host of people: politicians, professors, curators, artists, musicians, doctors, engineers, preachers, activists, journalists, and many others. The Merriam-Webster pronunciation editors have been collecting these citations from live speech and from radio, television, and shortwave broadcasts since the 1930s. It is primarily on the basis of this large and growing file that questions of usage and acceptability in pronunciation are answered. All of the pronunciations recorded in this book can be documented as falling within the range of generally acceptable variation, unless they are accompanied by a restricting usage note or symbol or a regional label.

No system of indicating pronunciation is self-explanatory. The following discussion sets out the signification and use of the pronunciation symbols in this book, with special attention to those areas where experience has shown that dictionary users may have questions. More detailed information can be found in the Guide to Pronunciation in Webster's Third New International Dictionary. The order of symbols discussed below is the same as the order on the page of Pronunciation Symbols, with the exception that the symbols which are not letter characters are here listed first. Those characters which have corresponding symbols in the International Phonetic Alphabet (IPA) are shown with their IPA equivalents.

**\ ** All pronunciation information is printed between reversed virgules. Pronunciation symbols are printed in roman type and all other information, such as labels and notes, is printed in italics.

**\ ˈ ˌ ** A high-set stress mark precedes a syllable with primary (strongest) stress; a low-set mark precedes a syllable with secondary (medium) stress; a third level of weak stress requires no mark at all: \ˈpen-mən-ˌship\.

Since the nineteenth century the International Phonetics Association has recommended that stress marks precede the stressed syllable, and linguists worldwide have adopted this practice on the basic principle that before a syllable can be uttered the speaker must know what degree of stress to give it. In accordance with the practice of French phoneticians, no stress marks are shown in the transcription of words borrowed from French whose pronunciations have not been anglicized, as at *ancien régime* and *émeute*.

**\ - ** Hyphens are used to separate syllables in pronunciation transcriptions. In actual speech, of course, there is no pause between the syllables of a word. The placement of hyphens is based on phonetic principles, such as vowel length, nasalization, variation due to the position of a consonant in a syllable, and other nuances of the spoken word. The syllable breaks shown in this book reflect the careful pronunciation of a single word out of context. Syllabication tends to change in rapid or running speech: a consonant at the end of a syllable may shift into a following syllable, and unstressed vowels may be elided. The numerous variations in pronunciation that a word may have in running speech are of interest to phoneticians but are well outside the scope of a dictionary of general English.

The centered dots in boldface entry words indicate potential end-of-line division points and not syllabication. These division points are determined by considerations of both morphology and pronunciation, among others. A detailed discussion of end-of-line division is contained in the article on Division in Boldface Entry Words in Webster's Third New International Dictionary. In this book a consistent approach has been pursued, both toward word division based on traditional formulas and toward syllabication based on phonetic principles. As a result, the hyphens indicating syllable breaks and the centered dots indicating end-of-line division often do not fall in the same places.

**\ ( ) ** Parentheses are used in pronunciations to indicate that whatever is symbolized between them is present in some utterances but not in others; thus *factory* \ ˈfak-t(ə-)rē\ is pronounced both \ˈfak-tə-rē\ and \ˈfak-trē\, *industry* \ˈin-(ˌ)dəs-trē\ is pronounced both \ˈin-dəs-trē\ and \ˈin-ˌdəs-trē\. In some phonetic environments, as in *fence* \ˈfen(t)s\ and *boil* \ˈbȯi(ə)l\, it may be difficult to determine whether the sound shown in parentheses is or is not present in a given utterance; even the usage of a single speaker may vary considerably.

**\ , ; ** Variant pronunciations are separated by commas; groups of variants are separated by semicolons. The order of variants does not mean that the first is in any way preferable to or more acceptable than the others. All of the variants in this book, except those restricted by a regional or usage label, are widely used in acceptable educated speech. If evidence reveals that a particular variant is used more frequently than another, the former will be given first. This should not, however, prejudice anyone against the second or subsequent variants. In many cases the numerical distribution of variants is equal but one of them, of course, must be printed first.

**\ ÷ ** The obelus, or division sign, is placed before a pronunciation variant that occurs in educated speech but that is considered by some to be questionable or unacceptable. This symbol is used sparingly and primarily for variants that have been objected to over a period of time in print by commentators on usage, in schools by teachers, or in correspondence that has come to the Merriam-Webster editorial department. In most cases the objection is based on orthographic or etymological arguments. For instance, the second variant of *cupola* \ˈkyü-pə-lə, ÷-ˌlō\, though used frequently in speech, is objected to because *a* is very rarely pronounced \ō\ in English. The pronunciations \ˈfe-byə-ˌwer-ē\ and \ˈfe-bə-ˌwer-ē\ (indicated simultaneously by the use of parentheses) are similarly marked at the entry for *February* \÷ˈfe-b(y)ə-ˌwer-ē, ˈfe-brə-\, even though they are the most frequently heard pronunciations, because some people insist that both *r*'s should be pronounced. The obelus applies only to that portion of the transcription which it immediately precedes and not to any other variants following.

\ ə ** in unstressed syllables as in **banana, **collide**, **abut** (IPA [ə]). This neutral vowel, called *schwa*, may be represented orthographically by any of the letters *a, e, i, o, u, y,* and by many combinations of letters. In running speech unstressed vowels are regularly pronounced as \ə\ in American and British speech. Unstressed \ə\ often intrudes between a stressed vowel and a following \l\ or \r\ though it is not represented in the spelling, as in *eel* \ˈē(ə)l\ and *sour* \ˈsau̇(-ə)r\.

\ˈə, ˌə in stressed syllables as in **humdrum**, **abut**. (IPA [ʌ]).

\ ᵊ ** immediately preceding \l\, \n\, \m\, \ŋ\, as in **battle, **cotton**, and one pronunciation of **open** \ˈō-pᵊm\ and of **and** \ᵊŋ\ as in one pronunciation of the phrase *lock and key* \ˌläk-ᵊŋ-ˈkē\. The symbol \ᵊ\ preceding these consonants does not itself represent a sound. It signifies instead that the following consonant is syllabic; that is, the consonant itself forms the nucleus of a syllable that does not contain a vowel.

In the pronunciation of some French or French-derived words \ᵊ\ is placed immediately after \l\, \m\, \r\ to indicate one nonsyllabic pronunciation of these consonants, as in the French words **table** "table," **prisme** "prism," and **titre** "title," each of which in isolation and in some contexts is a one-syllable word.

\ ər ** as in **further, **merger**, **bird** (IPA [ɝ, ɚ]). (See the section on \r\.) The anglicized pronunciation of the vowel \œ\ is represented in this book as \ə(r)\. (See the section on \œ\.)

\ˈər-, ˈə-r as in two different pronunciations of *hurry*. Most U.S. speakers pronounce \ˈhər-ē\ with the \ər\ representing the same sounds as in *bird* \ˈbərd\. Usually in metropolitan New York and southern England and frequently in New England and the southeastern U.S. the vowel is much the same as the vowel of *hum* followed by a syllable-initial variety of \r\. This pronunciation of *hurry* is represented as \ˈhə-rē\ in this book. Both types of pronunciation are shown for words composed of a single meaningful unit (or *morpheme*) as in *current, hurry,* and *worry*. In words such as *furry, stirring,* and *purring* in which a vowel or vowel-initial suffix is added to a word ending in *r* or *rr* (as *fur, stir,* and *purr*), the second type of pronunciation outlined above is heard only occasionally and is not shown in this dictionary.

\ a ** as in **mat, **map**, **mad**, **gag**, **snap**, **patch** (IPA [æ]). Some variation in this vowel is occasioned by the consonant that follows it; thus, for some speakers *map, mad,* and *gag* have noticeably different vowel sounds. There is a very small number of words otherwise identical in pronunciation that these speakers may distinguish solely by variation of this vowel, as in the two words *can* (put into cans; be able) in the sentence "Let's can what we can." However, this distinction is sufficiently infrequent that the traditional practice of using a single symbol is followed in this book.

\ ā ** as in day**, f**a**de, d**a**te, **a**orta, dr**a**pe, c**a**pe (IPA [e, eɪ, ei]). In most English speech this is actually a diphthong. In lowland South Carolina, in coastal Georgia and Florida, and occasionally elsewhere \ā\ is pronounced as a monophthong. As a diphthong \ā\ has a first element \e\ or monophthongal \ā\ and a second element \i\.

\ ä ** as in bo**ther, c**o**t, and, with most American speakers, f**a**ther, c**a**rt (IPA [ɑ]). The symbol \ä\ represents the vowel of *cot, cod,* and the stressed vowel of *collar* in the speech of those who pronounce this vowel differently from the vowel in *caught, cawed,* and *caller,* represented by \ȯ\. In U.S. speech \ä\ is pronounced with little or no rounding of the lips, and it is fairly long in duration, especially before voiced consonants. In southern England \ä\ is usually accompanied by some lip rounding and is relatively short in duration. The vowel \ȯ\ generally has appreciable lip rounding. Some U.S. speakers (a perhaps growing minority) do not distinguish between *cot—caught, cod—cawed,* and *collar—caller,* usually because they lack or have less lip rounding in the words transcribed with \ȯ\. Though the symbols \ä\ and \ȯ\ are used throughout this book to distinguish the members of the above pairs and similar words, the speakers who rhyme these pairs will automatically reproduce a sound that is consistent with their own speech.

In words such as *card* and *cart* most U.S. speakers have a sequence of sounds that we transcribe as \är\. Most speakers who do not pronounce \r\ before another consonant or a pause, however, do not rhyme *card* with either *cod* or *cawed* and do not rhyme *cart* with either *cot* or *caught.* The pronunciation of *card* and *cart* by such speakers, although not shown in this dictionary, would be transcribed as \ˈkȧd\ and \ˈkȧt\. Speakers of r-dropping dialects will automatically substitute \ȧ\ for the transcribed \är\. (See the sections on \ȧ\ and \r\.)

\ ȧ ** as in fa**ther as pronounced by those who do not rhyme it with *bother* (IPA [a, ɐ]). The pronunciation of this vowel varies regionally. In eastern New England and southern England it is generally pronounced farther forward in the mouth than \ä\ but not as far forward as \a\. In New York City and the southeastern U.S. it may have much the same quality as \ä\ but somewhat greater duration.

In areas in which \r\ is not pronounced before another consonant or a pause, \ȧ\ occurs for the sequence transcribed in this book as \är\. (See the sections on \ä\ and \r\.) In these areas \ȧ\ also occurs with varying frequency in a small group of words in which *a* in the spelling is followed by a consonant letter other than *r* and is not preceded by *w* or *wh,* as in *father, calm, palm,* and *tomato* but not in *watch, what,* or *swap* (though \ȧ\ does sometimes occur in *waft*). Especially in southern England and, less consistently, in eastern New England \ȧ\ occurs in certain words in which \a\ is the usual American vowel and in most of which the vowel is followed by \f\, \th\, \s\, or by \n\ and another consonant, as in the words *after*, *bath*, *mask*, and *slant*.

The symbol \ȧ\ is also used in the transcription of some foreign-derived words and names. This vowel, as in French *patte* "paw" and *chat* "cat," is intermediate between \a\ and \ä\ and is similar in quality to the \ȧ\ heard in eastern New England.

\ au̇ ** as in now**, l**ou**d, **ou**t (IPA [aʊ, au]). The initial element of this diphthong may vary from \a\ to \ȧ\ or \ä\, the first being more common in Southern and south Midland speech than elsewhere. In coastal areas of the southern U.S. and in parts of Canada this diphthong is often realized as \əu̇\ when immediately preceding a voiceless consonant, as in the noun *house* and in *out*.

\ b ** as in **ba**b**y, ri**b** (IPA [b]).

\ ch ** as in **chin, na**t**ure \ˈnā-chər\ (IPA [ʧ]). Actually, this sound is \t\ + \sh\. The distinction between the phrases *why choose* and *white shoes* is maintained by a difference in the syllabication of the \t\ and the \sh\ in each case and the consequent use of different varieties (or *allophones*) of \t\.

\ d ** as in **di**d**, a**dd**er (IPA [d]). (See the section on \t\ below for a discussion of the flap allophone of \d\.)

\ e ** as in be**t, b**e**d, p**e**ck (IPA [ɛ]). In Southern and Midland dialects this vowel before nasal consonants often has a raised articulation that approximates \i\, so that *pen* has nearly the pronunciation \ˈpin\.

\ ˈē, ˌē ** in stressed syllables as in bea**t, nosebl**ee**d, **e**venly, **ea**sy (IPA [i]).

\ ē ** in unstressed syllables, as in easy**, meal**y** (IPA [i, ɪ, ɨ]). Though the fact is not shown in this book, some dialects such as southern British and southern U.S. often, if not usually, pronounce \i\ instead of unstressed \ē\.

\ f ** as in **fi**f**ty, cu**ff** (IPA [f]).

\ g ** as in **go, bi**g**, **g**ift (IPA [g]).

\ h ** as in **hat, a**h**ead (IPA [h]).

\ hw ** as in **whale as pronounced by those who do not have the same pronunciation for both *whale* and *wail.* Most U.S. speakers distinguish these two words as \ˈhwā(ə)l\ and \ˈwā(ə)l\ respectively, though frequently in the U.S. and usually in southern England \ˈwā(ə)l\ is used for both. Some linguists consider \hw\ to be a single sound, a voiceless \w\ (IPA [ʍ]).

\ i ** as in ti**p, ban**i**sh, act**i**ve (IPA [ɪ]).

\ ī ** as in si**te, s**i**de, b**uy**, tr**i**pe (IPA [aɪ, ai, ɑɪ, ɑi]). Actually, this sound is a diphthong, usually composed of \ä\ + \i\ or \ȧ\ + \i\. In Southern speech, especially before a pause or voiced consonant, as in *shy* and *five,* the second element \i\ may not be pronounced (IPA [a:]). Chiefly in eastern Virginia, coastal South Carolina, and parts of Canada the diphthong is approximately \ˈə\ + \i\ before voiceless consonants, as in *nice* and *write* (IPA [ʌɪ]).

\ j ** as in **job, **g**em, e**dg**e, **j**oin, **j**u**dg**e. Actually, this sound is \d\ + \zh\ (IPA [ʤ]). Assuming the anglicization of *Jeanne d'Arc* as \zhän-ˈdärk\, the distinction between the sentences *They betray John Dark* and *They betrayed Jeanne d'Arc* is maintained by a difference in the syllabication of the \d\ and the \zh\ in each case and the consequent use of different varieties (or *allophones*) of \d\.

\ k ** as in **kin, **c**oo**k**, a**ch**e (IPA [k]).

\ k̲ ** as in German ich** "I," Bu**ch** "book," and one pronunciation of English lo**ch**. Actually, there are two distinct sounds in German; the \k̲\ in *ich* (IPA [ç]) is pronounced toward the front of the mouth and the \k̲\ in *Buch* is pronounced toward the back (IPA [x]). In English, however, no two words otherwise identical are distinguished by these two varieties of \k̲\, and therefore only a single symbol is necessary.

\ l ** as in **li**l**y, poo**l** (IPA [l, ɫ]). In words such as *battle* and *fiddle* the \l\ is a syllabic consonant (IPA [l̩]). (See the section on \ᵊ\ above.)

\m as in **m**ur**m**ur, di**m**, ny**m**ph (IPA [m]). In pronunciation variants of some words, such as *open* and *happen,* \m\ is a syllabic consonant (IPA [m̩]). (See the section on \ᵊ\ above.)

\ n ** as in **no, ow**n** (IPA [n]). In words such as *cotton* and *sudden,* the \n\ is a syllabic consonant (IPA [n̩]). (See the section on \ᵊ\ above.)

**\ ⁿ ** indicates that a preceding vowel or diphthong is pronounced with the nasal passages open, as in French *un bon vin blanc* \œⁿ-bōⁿ-vaⁿ-bläⁿ\ "a good white wine."

\ ŋ ** as in sing** \ˈsiŋ\, si**ng**er \ˈsiŋ-ər\, fi**n**ger \ˈfiŋ-gər\, i**n**k \ˈiŋk\ (IPA [ŋ]). In some rare contexts \ŋ\ may be a syllabic consonant (IPA [ŋ̍]). (See the section on \ᵊ\ above.)

\ ō ** as in bo**ne, kn**ow**, b**eau** (IPA [o, oʊ, ou]). Especially in positions of emphasis, such as when it is word final or when as primary stress, \ō\ tends to become diphthongal, moving from \ō\ toward a second element \u̇\. In southern England and in some U.S. speech, particularly in the Philadelphia area and in the Pennsylvania-Ohio-West Virginia border area, the first element is often approximately \ə\. In coastal South Carolina, Georgia, and Florida stressed \ō\ is often monophthongal when final, but when a consonant follows it is often a diphthong moving from \ō\ to \ə\. In this book the symbol \ō\ represents all of the above variants. As an unstressed vowel before another vowel, \ō\ is often pronounced as a schwa with slight lip rounding that is separated from the following vowel by the glide \w\, as in *following* \fä-lə-wiŋ\. This reduced variant is not usually shown at individual entries.

\ ȯ ** as in saw**, **a**ll, gn**aw**, c**au**ght (IPA [ɔ]). (See the section on \ä\.)

\ œ ** as in French boeu**f "beef," German H**ö**lle "hell" (IPA [œ]). This vowel, which occurs only in foreign-derived terms and names, can be approximated by attempting to pronounce the vowel \e\ with the lips moderately rounded as for the vowel \u̇\. This vowel is often anglicized as the \ər\ of *bird* by those who do not "drop their r's" or as the corresponding vowel of *bird* used by those who do (see the section on \r\). Where this anglicization is shown, it is represented as \ə(r)\.

\ œ̄ ** as in French feu** "fire," German H**ö**hle "hole" (IPA [ø]). This vowel, which occurs primarily in foreign-derived terms and names, can be approximated by attempting to pronounce a monophthongal vowel \ā\ with the lips fully rounded as for the vowel \ü\. This vowel also occurs in Scots and thus is used in the pronunciation of *guidwillie,* mainly restricted to Scotland.

\ ȯi ** as in coi**n, destr**oy** (IPA [ɔɪ, ɔi]). In some Southern speech, especially before a consonant in the same word, the second element may disappear or be replaced by \ə\. Some utterances of *drawing* and *sawing* have a sequence of vowel sounds identical to that in *coin,* but because *drawing* and *sawing* are analyzed by many as two-syllable words they are transcribed with a parenthesized hyphen: \ˈdrȯ(-)iŋ\, \ˈsȯ(-)iŋ\.

\ p ** as in **pe**pp**er, li**p** (IPA [p]).

\ r ** as in **red, **r**a**r**ity, ca**r**, bea**r**d. What is transcribed here as \r\ in reality represents several distinct sounds. Before a stressed vowel \r\ denotes a continuant produced with the tongue tip slightly behind the teethridge (IPA [ɹ]). This sound is usually voiceless when it follows a voiceless stop, as in *pray, tree,* and *cram.* After a vowel in the same syllable \r\ is most often a semivowel characterized by retroflexion of the tongue tip. The sequences \ar\, \är\, \er\, \ir\, \ȯr\, \u̇r\, and \ər\ may then be considered diphthongs. In some speech the retroflexion of the \r\ occurs throughout the articulation of the vowel, but in other cases the first vowel glides into a retroflex articulation. In the latter cases a brief transition vowel is sometimes heard; this variable and nondistinctive glide is not transcribed in this book, but is considered implicit in the symbol \r\.

In Received Pronunciation \r\ is sometimes pronouned as a flap (IPA [ɾ]) in the same contexts in which \t\ and \d\ occur as flaps in American English. (See the section on \t\ below.) Occasionally the flap may be heard after consonants, as in *bright* and *grow.* In other dialects of British English, particularly Scots, \r\ may be pronounced as an alveolar trill (IPA [r]) or as a uvular trill (IPA [ʀ]). In some dialects, especially those of the southeastern U.S., eastern New England, New York City, and southern England, \r\ is not pronounced after a vowel in the same syllable. This is often, if somewhat misleadingly, referred to as r-dropping. In these dialects *r* is pronounced as a nonsyllabic \ə\ when it occurs in these positions or there may be no sound corresponding to the *r*; thus *beard, corn,* and *assured* may be pronounced as \ˈbiəd\, \ˈkȯən\, and \ə-ˈshu̇əd\ or, usually with some lengthening of the vowel sound, as \ˈbid\, \kȯn\, and \ə-ˈshu̇d\. In *car, card,* and *cart* those who do not pronounce \r\ generally have a vowel which we would transcribe as \ȧ\, usually pronounced with some lengthening and without a following \ə\. (See the sections on \ä\ and \ȧ\.) The stressed vowel of *bird* and *hurt* in r-dropping speech is similar to the vowel used by r-keepers in the same words but without the simultaneous raising of the center and/or tip of the tongue. In the U.S. most speakers of r-dropping dialects will pronounce \r\ before consonants in some words or in some contexts. Because it is determined by the phonetic context, r-dropping is not explicitly represented in this dictionary; speakers of r-dropping dialects will automatically substitute the sounds appropriate to their own speech.

\ s ** as in **sour**c**e, le**ss** (IPA [s]).

\ sh ** as in **shy, mi**ssi**on, ma**ch**ine, spe**ci**al (IPA [ʃ]). Actually, this is a single sound, not two. When the two sounds \s\ and \h\ occur in sequence, they are separated by a hyphen in this book, as in *grasshopper* \ˈgras-ˌhä-pər\.

\ t ** as in **tie, a**tt**ack, la**t**e, la**t**er, la**tt**er (IPA [t]). In some contexts, as when a stressed or unstressed vowel precedes and an unstressed vowel or \ᵊl\ follows, the sound represented by *t* or *tt* is pronounced in most American speech as a voiced flap produced by the tongue tip tapping the teethridge (IPA [ɾ]). In similar contexts the sound represented by *d* or *dd* has the same pronunciation. Thus, the pairs *ladder* and *latter*, *leader* and *liter*, *parody* and *parity* are often homophones. At the end of a syllable \t\ often has an incomplete articulation with no release, or it is accompanied or replaced by a glottal closure. When \t\ occurs before the syllabic consonant \ᵊn\ as in *button* \ˈbə-tᵊn\, the glottal allophone is often heard. This may reflect a syllabication of \t\ with the preceding stressed syllable (i.e. \ˈbət-ᵊn\).

\ th ** as in **thin, e**th**er (IPA [θ]). Actually, this is a single sound, not two. When the two sounds \t\ and \h\ occur in sequence they are separated by a hyphen in this book, as in *knighthood* \ˈnīt-ˌhu̇d\. In some dialects of American English this sound is regularly replaced by \f\.

\ t̲h̲ ** as in **then, ei**th**er, **th**is (IPA [ð]). Actually, this is a single sound, not two. The difference between \th\ and \t̲h̲\ is that the former is pronounced without and the latter with vibration of the vocal cords.

\ ü ** as in ru**le, y**ou**th, union \ˈyün-yən\, few \ˈfyü\ (IPA [u]). As an unstressed vowel before another vowel, \ü\ is often pronounced as a schwa with slight lip rounding that is separated from the following vowel by the glide \w\, as *valuing* \ˈval-yə-wiŋ\. This reduced variant is not usually shown at individual entries. Younger speakers of American English often use a more centralized and less rounded pronunciation of \ü\ in certain words (as *news* and *musician*), both in stressed and especially in unstressed syllables.

\ u̇ ** as in pu**ll, w**oo**d, b**oo**k, curable \ˈkyu̇r-ə-bəl\, fury \ˈfyu̇r-ē\ (IPA [ʊ]).

\ ᵫ ** as in German fü**llen "to fill," h**ü**bsch "handsome" (IPA [ʏ]). This vowel, which occurs only in foreign-derived terms and names, can be approximated by attempting to pronounce the vowel \i\ with the lips moderately rounded as for the vowel \u̇\.

\ ᵫ̄ ** as in French rue** "street," German f**üh**len "to feel" (IPA [y]). This vowel, which occurs only in foreign-derived terms and names, can be approximated by attempting to pronounce the vowel \ē\ with the lips fully rounded as for the vowel \ü\.

\ v ** as in **vi**v**id, in**v**ite (IPA [v]).

\ w ** as in **we, a**w**ay (IPA [w]).

\ y ** as in **yard, **y**oung, cue \ˈkyü\, curable \ˈkyu̇r-ə-bəl\, few \ˈfyü\, fury \ˈfyu̇r-ē\, union \ˈyün-yən\ (IPA [j]). The sequences \lyü\, \syü\, and \zyü\ in the same syllable, as in *lewd, suit,* and *presume,* are common in southern British speech but are rare in American speech and only \lü\, \sü\, and \zü\ are shown in this dictionary. A sequence of \h\ and \y\ as in *hue* and *huge* is pronounced by some speakers as a \k̲\ articulated toward the front of the mouth (IPA [ç]).

In English \y\ does not occur at the end of a syllable after a vowel. In a few words of French origin whose pronunciation has not been anglicized, a postvocalic \y\ is transcribed, as in *mille-feuille* \mēl-fœy\ and in *rouille* \ˈrü-ē, rüy\. The sound represented is the consonantal \y\ of *yard.*

**\ ʸ ** indicates that during the articulation of the preceding consonant the tongue has substantially the position it has for the articulation of the \y\ of *yard,* as in French *digne* \dēnʸ\ "worthy." Thus \ʸ\ does not itself represent a sound but rather modifies the preceding symbol.

\ z ** as in **zone, rai**s**e (IPA [z]).

\ zh ** as in vis**ion, a**z**ure \ˈa-zhər\ (IPA [ʒ]). Actually, this is a single sound, not two. When the two sounds \z\ and \h\ occur in sequence, they are separated by a hyphen in this book, as in *hogshead* \ˈhȯgz-ˌhed, ˈhägz-\.

ə	banana, collide, abut
ˈə, ˌə	humdrum, abut
ᵊ	immediately preceding \l\, \n\, \m\, \ŋ\, as in battle, mitten, eaten, and sometimes open \ˈō-pᵊm\, lock and key \-ᵊŋ-\; immediately following \l\, \m\, \r\, as often in French table, prisme, titre
ər	further, merger, bird
ˈər- ˈə-r	as in two different pronunciations of hurry \ˈhər-ē, ˈhə-rē\
a	mat, map, mad, gag, snap, patch
ā	day, fade, date, aorta, drape, cape
ä	bother, cot, and, with most American speakers, father, cart
ȧ	father as pronounced by speakers who do not rhyme it with *bother*; French patte
au̇	now, loud, out
b	baby, rib
ch	chin, nature \ˈnā-chər\
d	did, adder
e	bet, bed, peck
ˈē, ˌē	beat, nosebleed, evenly, easy
ē	easy, mealy
f	fifty, cuff
g	go, big, gift
h	hat, ahead
hw	whale as pronounced by those who do not have the same pronunciation for both *whale* and *wail*
i	tip, banish, active
ī	site, side, buy, tripe
j	job, gem, edge, join, judge
k	kin, cook, ache
k̲	German ich, Buch; one pronunciation of loch
l	lily, pool
m	murmur, dim, nymph
n	no, own
ⁿ	indicates that a preceding vowel or diphthong is pronounced with the nasal passages open, as in French *un bon vin blanc* \œⁿ-bōⁿ-vaⁿ-bläⁿ\
ŋ	sing \ˈsiŋ\, singer \ˈsiŋ-ər\, finger \ˈfiŋ-gər\, ink \ˈiŋk\
ō	bone, know, beau
ȯ	saw, all, gnaw, caught
œ	French boeuf, German Hölle
œ̄	French feu, German Höhle
ȯi	coin, destroy
p	pepper, lip
r	red, car, rarity
s	source, less
sh	as in shy, mission, machine, special (actually, this is a single sound, not two); with a hyphen between, two sounds as in *grasshopper* \ˈgras-ˌhä-pər\
t	tie, attack, late, later, latter
th	as in thin, ether (actually, this is a single sound, not two); with a hyphen between, two sounds as in *knighthood* \ˈnīt-ˌhu̇d\
t͟h	then, either, this (actually, this is a single sound, not two)
ü	rule, youth, union \ˈyün-yən\, few \ˈfyü\
u̇	pull, wood, book, curable \ˈkyu̇r-ə-bəl\, fury \ˈfyu̇r-ē\
ᵫ	German füllen, hübsch
ᵫ̄	French rue, German fühlen
v	vivid, give
w	we, away
y	yard, young, cue \ˈkyü\, mute \ˈmyüt\, union \ˈyün-yən\
ʸ	indicates that during the articulation of the sound represented by the preceding character the front of the tongue has substantially the position it has for the articulation of the first sound of *yard*, as in French *digne* \dēnʸ\
z	zone, raise
zh	as in vision, azure \ˈa-zhər\ (actually, this is a single sound, not two); with a hyphen between, two sounds as in *hogshead* \ˈhȯgz-ˌhed, ˈhägz-\
\	reversed virgule used in pairs to mark the beginning and end of a transcription: \ˈpen\
ˈ	mark preceding a syllable with primary (strongest) stress: \ˈpen-mən-ˌship\
ˌ	mark preceding a syllable with secondary (medium) stress: \ˈpen-mən-ˌship\
-	mark of syllable division
( )	indicate that what is symbolized between is present in some utterances but not in others: *factory* \ˈfak-t(ə-)rē\
÷	indicates that many regard as unacceptable the pronunciation variant immediately following: *cupola* \ˈkyü-pə-lə, ÷-ˌlō\

A Dictionary of the English Language

A

^{1}a \ˈā\ *n, pl* **a's** *or* **as** \ˈāz\ *often cap, often attrib* (bef. 12c) **1 a :** the 1st letter of the English alphabet **b :** a graphic representation of this letter **c :** a speech counterpart of orthographic *a* **2 :** the 6th tone of a C-major scale **3 :** a graphic device for reproducing the letter *a* **4 :** one designated *a* esp. as the 1st in order or class **5 a :** a grade rating a student's work as superior in quality **b :** one graded or rated with an A **6 :** something shaped like the letter A

^{2}a \ə, (ˈ)ā, *Canad* ˈa\ *indefinite article* [ME, fr. OE *ān* one — more at ONE] (bef. 12c) **1** — used as a function word before singular nouns when the referent is unspecified ⟨*a* man overboard⟩ and before number collectives and some numbers ⟨*a* dozen⟩ **2 :** the same ⟨birds of *a* feather⟩ ⟨swords all of *a* length⟩ **3 a** — used as a function word before a singular noun followed by a restrictive modifier ⟨*a* man who was here yesterday⟩ **b :** ANY ⟨*a* man who is sick can't work⟩ **c** — used as a function word before a mass noun to denote a particular type or instance ⟨*a* bronze made in ancient times⟩ ⟨glucose is *a* simple sugar⟩ **d** — used as a function word before a proper noun representing an example or type ⟨the attractions of *a* Boston or *a* Cleveland⟩ **4** — used as a function word with nouns to form adverbial phrases of quantity, amount, or degree ⟨felt *a* little tired⟩

usage In speech and writing *a* is used before a consonant sound ⟨*a* door⟩ ⟨*a* human⟩. Before a vowel sound *an* is usual ⟨*an* icicle⟩ ⟨*an* honor⟩ but esp. in speech *a* is used occasionally, more often in some dialects than in others ⟨*a* apple⟩ ⟨*a* hour⟩ ⟨*a* obligation⟩. Before a consonant sound represented by a vowel letter *a* is usual ⟨*a* one⟩ ⟨*a* union⟩ but *an* also occurs though less frequently now than formerly ⟨*an* unique⟩ ⟨such *an* one⟩. Before unstressed or weakly stressed syllables with initial *h* both *a* and *an* are used in writing ⟨*a* historic⟩ ⟨*an* historic⟩ but in speech *an* is more frequent whether \h\ is pronounced or not. In the King James Version of the Old Testament and occasionally in writing and speech *an* is used before *h* in a stressed syllable ⟨*an* huntress⟩ ⟨*an* hundred⟩ ⟨children are *an* heritage of the Lord —Ps 127:3(AV)⟩.

^{3}a \ə *also* (ˈ)ā\ *prep* [ME, fr. OE *a-, an, on*] (bef. 12c) **1** *chiefly dial* **:** ON, IN, AT **2 :** in, to, or for each ⟨twice *a* week⟩ ⟨five dollars *a* dozen⟩ ***usage*** see ^{2}A

^{4}a \ə, (ˌ)a\ *vb* [ME, contr. of *have*] (14c) *archaic* : HAVE ⟨I might *a* had husbands afore now —John Bunyan⟩

^{5}a \ə\ *prep* [ME, by contr.] (15c) : OF — often attached to the preceding word ⟨kind*a*⟩ ⟨lott*a*⟩

^{1}a- \ə\ *prefix* [ME, fr. OE] **1 :** on : in : at ⟨*a*bed⟩ **2 :** in (such) a state or condition ⟨*a*fire⟩ **3 :** in (such) a manner ⟨*a*loud⟩ **4 :** in the act or process of ⟨gone *a*-hunting⟩ ⟨*a*tingle⟩

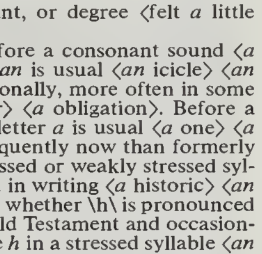
^{2}a- \(ˈ)ā *also* (ˈ)a *or* (ˈ)ä\ *or* **an-** \(ˈ)an\ *prefix* [L & Gk; L, fr. Gk — more at UN-] : not : without ⟨*a*sexual⟩ — *a-* before consonants other than *h* and sometimes even before *h*, *an-* before vowels and usu. before *h* ⟨*a*chromatic⟩ ⟨*a*historical⟩ ⟨*an*astigmatic⟩ ⟨*an*hydrous⟩

-a- *comb form* [ISV] : replacing carbon esp. in a ring ⟨az*a*-⟩

-a \ə\ *n suffix* [NL, fr. *-a* (as in *magnesia*)] : OXIDE ⟨silic*a*⟩

aah \ˈä, *often prolonged and/or followed by* ə\ *vi* (1953) **:** to exclaim in amazement, joy, or surprise ⟨one finds oneself oohing and ⁓*ing* over the exciting new TV commercials —Walter Goodman⟩ — **aah** *n*

aard·vark \ˈärd-ˌvärk\ *n* [obs. Afrik (now *erdvark*), fr. Afrik *aard* earth + *vark* pig] (1827) **:** a large burrowing nocturnal ungulate mammal (*Orycteropus afer*) of sub-Saharan Africa that has a long snout, extensile tongue, powerful claws, large ears, and heavy tail and feeds esp. on termites and ants



aardvark

aard·wolf \-ˌwu̇lf\ *n* [Afrik, fr. *aard* + *wolf*] (1833) **:** a maned striped nocturnal mammal (*Proteles cristatus*) of southern and eastern Africa that resembles the related hyenas and feeds chiefly on insects and esp. termites

Aar·on \ˈar-ən, ˈer-\ *n* [LL, fr. Gk *Aarōn*, fr. Heb *Ahărōn*] **:** a brother of Moses and high priest of the Hebrews

Aa·ron·ic \a-ˈrä-nik, e-\ *adj* (ca. 1828) **1 :** of or stemming from Aaron **2 :** of or relating to the lower order of the Mormon priesthood

ab \ˈab\ *n* (1983) : an abdominal muscle — usu. used in pl.

Ab \ˈäb, ˈäv, ˈȯv\ *n* [Heb *Ābh*] (ca. 1771) : the 11th month of the civil year or the 5th month of the ecclesiastical year in the Jewish calendar — see MONTH table

ab- \(ˌ)ab, əb\ *prefix* [ME, fr. OF & L; OF, fr. L *ab-, abs-, a-,* fr. *ab, a* — more at OF] : from : away : off ⟨*ab*axial⟩

aba \ə-ˈbä, ä-ˈba\ *n* [Ar *ʽabā*] (1811) **1 :** a loose sleeveless outer garment worn as traditional dress by men in the Middle East **2 :** a fabric woven from the hair of camels or goats

ab·a·ca \ˌa-bə-ˈkä, ˈa-bə-ˌ\ *n* [Sp *abacá*, fr. Tag *abaká*] (ca. 1818) **1 :** a strong fiber obtained from the leafstalk of a banana (*Musa textilis*) native to the Philippines — called also *Manila hemp* **2 :** the plant that yields abaca

aback \ə-ˈbak\ *adv* (bef. 12c) **1** *archaic* **:** BACKWARD, BACK **2 :** in a position to catch the wind upon the forward surface of a square sail **3 :** by surprise : UNAWARES ⟨was taken ⁓ by her sharp retort⟩

abac·te·ri·al \ˌā-(ˌ)bak-ˈtir-ē-əl\ *adj* (ca. 1935) : not caused by or characterized by the presence of bacteria ⟨⁓ prostatitis⟩

aba·cus \ˈa-bə-kəs, ə-ˈba-\ *n, pl* **aba·ci** \ˈa-bə-ˌsī, -ˌkē; ə-ˈba-ˌkī\ *or* **aba·cus·es** [L, fr. Gk *abak-, abax,* lit., slab] (14c) **1 :** an instrument for performing calculations by sliding counters along rods or in grooves **2 :** a slab that forms the uppermost member or division of the capital of a column

^{1}abaft \ə-ˈbaft\ *prep* [^{1}*a-* + *baft* (aft)] (1594) **:** to the rear of; *specif* : toward the stern from

^{2}abaft *adv* (1628) : toward or at the stern : AFT

ab·a·lo·ne \ˌa-bə-ˈlō-nē, ˈa-bə-ˌ\ *n* [AmerSp *abulón*, fr. usage Although *aggravate* has been used in sense 3a since the 17th century, it has been the object of disapproval only since about 1870. It is used in expository prose ⟨when his silly conceit . . . about his not-very-good early work has begun to *aggravate* us —William Styron⟩ but seems to be more common in speech and casual writing ⟨a good profession for him, because bus drivers get *aggravated* —Jackie Gleason (interview, 1986)⟩ ⟨& now this letter comes to *aggravate* me a thousand times worse —Mark Twain (letter, 1864)⟩. Sense 2 is far more common than sense 3a in published prose. Such is not the case, however, with *aggravation* and *aggravating*. *Aggravation* is used in sense 3 somewhat more than in its earlier senses; *aggravating* has practically no use other than to express annoyance.

ain \ˈān\ *adj* [prob. fr. ON *eiginn*] (1721) *Scot* : OWN

ain't \ˈānt\ [contr. of *are not*] (1778) **1** : am not : are not : is not **2** : have not : has not **3** : do not : does not : did not — used in some varieties of Black English

usage Although widely disapproved as nonstandard and more common in the habitual speech of the less educated, *ain't* in senses 1 and 2 is flourishing in American English. It is used in both speech and writing to catch attention and to gain emphasis ⟨the wackiness of movies, once so deliciously amusing, *ain't* funny anymore —Richard Schickel⟩ ⟨I am telling you—there *ain't* going to be any blackmail —R. M. Nixon⟩. It is used esp. in journalistic prose as part of a consistently informal style ⟨the creative process *ain't* easy —Mike Royko⟩. This informal *ain't* is commonly distinguished from habitual *ain't* by its frequent occurrence in fixed constructions and phrases ⟨well—class it *ain't* —Cleveland Amory⟩ ⟨for money? say it *ain't* so, Jimmy! —Andy Rooney⟩ ⟨you *ain't* seen nothing yet⟩ ⟨that *ain't* hay⟩ ⟨two out of three *ain't* bad⟩ ⟨if it *ain't* broke, don't fix it⟩. In fiction *ain't* is used for purposes of characterization; in familiar correspondence it tends to be the mark of a warm personal friendship. It is also used for metrical reasons in popular songs ⟨*Ain't* She Sweet⟩ ⟨It *Ain't* Necessarily So⟩. Our evidence shows British use to be much the same as American.

syn ALONE, SOLITARY, LONELY, LONESOME, LONE, FORLORN, DESOLATE mean isolated from others. ALONE stresses the objective fact of being by oneself with slighter notion of emotional involvement than most of the remaining terms ⟨everyone needs to be *alone* sometimes⟩. SOLITARY may indicate isolation as a chosen course ⟨glorying in the calm of her *solitary* life⟩ but more often it suggests sadness and a sense of loss ⟨left *solitary* by the death of his wife⟩. LONELY adds to SOLITARY a suggestion of longing for companionship ⟨felt *lonely* and forsaken⟩. LONESOME heightens the suggestion of sadness and poignancy ⟨an only child often leads a *lonesome* life⟩. LONE may replace LONELY or LONESOME but typically is as objective as ALONE ⟨a *lone* robin pecking at the lawn⟩. FORLORN stresses dejection, woe, and listlessness at separation from one held dear ⟨a *forlorn* lost child⟩. DESOLATE implies inconsolable grief at loss or bereavement ⟨*desolate* after her brother's death⟩.

1 See ALEPH, BETH, etc., in the vocabulary. Where two forms of a letter are given, the one at the right is the form used at the end of a word. 2 Not represented in transliteration when initial. 3 The left column shows the form of each Arabic letter that is used when it stands alone, the second column its form when it is joined to the preceding letter, the third column its form when it is joined to both the preceding and the following letter, and the right column its form when it is joined to the following letter only. In the names of the Arabic letters, *ā*, *ī*, and *ū* respectively are pronounced like *a* in *father*, *i* in *machine*, *u* in *rude*. 4 Hebrew and Arabic are written from right to left. The Hebrew and Arabic letters are all primarily consonants; a few of them are also used secondarily to represent certain vowels, but full indication of vowels, when provided at all, is by means of a system of dots or strokes adjacent to the consonantal characters. 5 Alif represents no sound in itself, but is used principally as an indicator of the presence of a glottal stop (transliterated ’ medially and finally; not represented in transliteration when initial) and as the sign of a long *a*. 6 When ه has two dots above it (ة), it is called *tā marbūṭa* and, if it immediately precedes a vowel, is transliterated *t* instead of *h*. 7 See ALPHA, BETA, GAMMA, etc., in the vocabulary. The letter gamma is transliterated *n* only before velars; the letter upsilon is transliterated *u* only as the final element in diphthongs. 8 See CYRILLIC in the vocabulary. 9 This sign indicates that the immediately preceding consonant is not palatalized even though immediately followed by a palatal vowel. 10 This sign indicates that the immediately preceding consonant is palatalized even though not immediately followed by a palatal vowel. 11 The alphabet shown here is the Devanagari. When vowels are combined with preceding consonants they are indicated by various strokes or hooks instead of by the signs here given, or, in the case of short *a*, not written at all. Thus the character क represents *ka;* the character का, *kā;* the character कि, *ki;* the character की, *kī;* the character कु, *ku;* the character कू, *kū;* the character कृ, *kṛ;* the character कॄ, *kṝ;* the character के, *ke;* the character कै, *kai;* the character को, *ko;* the character कौ, *kau;* and the character क्, *k* without any following vowel. There are also many compound characters representing combinations of two or more consonants.

syn AMATEUR, DILETTANTE, DABBLER, TYRO mean a person who follows a pursuit without attaining proficiency or professional status. AMATEUR often applies to one practicing an art without mastery of its essentials ⟨a painting obviously done by an *amateur*⟩; in sports it may also suggest not so much lack of skill but avoidance of direct remuneration ⟨remained an *amateur* despite lucrative offers⟩. DILETTANTE may apply to the lover of an art rather than its skilled practitioner but usu. implies elegant trifling in the arts and an absence of serious commitment ⟨had no patience for *dilettantes*⟩. DABBLER suggests desultory habits of work and lack of persistence ⟨a *dabbler* who started novels but never finished them⟩. TYRO implies inexperience often combined with audacity with resulting crudeness or blundering ⟨shows talent but is still a mere *tyro*⟩.

usage Many grammarians take issue with the senses of *awful* and *awfully* that do not convey the etymological connection with *awe.* However, senses 3 and 4 of the adjective were used in speech and casual writing by the late 18th century ⟨it is an *awful* while since you have heard from me —John Keats (letter)⟩ ⟨there was an *awful* crowd —Sir Walter Scott (letter)⟩ ⟨this is an *awful* thing to say to oil painters —William Blake⟩. Adverbial use of *awful* as an intensifier began to appear in print in the early 19th century, as did the senses of *awfully* corresponding to senses 3 and 4 of the adjective. Both adverbs remain in widespread use ⟨a sad state of affairs and *awful* tough on art —H. L. Mencken⟩ ⟨the *awfully* rich young American —Henry James⟩ ⟨decided to play it so *awfully* safe —A. M. Schlesinger *b*1917⟩.

usage A body of opinion favors *in* with the "interest, benefit" sense of *behalf* and *on* with the "support, defense" sense. This distinction has been observed by some writers but overall has never had a sound basis in actual usage. In current British use, *on behalf* (*of*) has replaced *in behalf* (*of*); both are still used in American English, but the distinction is frequently not observed.

ben·ton·ite \ˈben-tᵊn-ˌīt\ *n* [Fort *Benton,* Mont.] (1898) : an absorptive and colloidal clay used esp. as a sealing agent or carrier (as of drugs) — **ben·ton·it·ic** \ˌben-tᵊn-ˈi-tik\ *adj*

ben tro·va·to \ˌben-trō-ˈvä-(ˌ)tō\ *adj* [It, lit., well found] (1876) : characteristic or appropriate even if not true ⟨the story is *ben trovato*⟩

bent·wood \ˈbent-ˌwu̇d\ *adj* (1862) : made of wood that is bent rather than cut into shape ⟨∼ furniture⟩ — **bentwood** *n*

be·numb \bi-ˈnəm\ *vt* [ME *benomen,* fr. *benomen,* pp. of *benimen* to deprive, fr. OE *beniman,* fr. *be-* + *niman* to take — more at NIMBLE] (14c) **1** : to make inactive : DEADEN **2** : to make numb esp. by cold

benz- *or* **benzo-** *comb form* [ISV, fr. *benzoin*] : related to benzene or benzoic acid ⟨*benzo*phenone⟩ ⟨*benz*yl⟩

benz·al·de·hyde \ben-ˈzal-də-ˌhīd\ *n* [ISV] (1866) : a colorless nontoxic aromatic liquid C_6H_5CHO found in essential oils (as in peach kernels) and used in flavoring and perfumery, in pharmaceuticals, and in synthesis of dyes

benz·an·thra·cene \ben-ˈzan(t)-thrə-ˌsēn\ *n* [ISV] (1938) : a crystalline feebly carcinogenic cyclic hydrocarbon $C_{18}H_{12}$ that is found in small amounts in coal tar

Ben·ze·drine \ˈben-zə-ˌdrēn\ *trademark* — used for amphetamine

ben·zene \ˈben-ˌzēn, ben-ˈ\ *n* [ISV *benz-* + *-ene*] (ca. 1872) : a colorless volatile flammable toxic liquid aromatic hydrocarbon C_6H_6 used in organic synthesis, as a solvent, and as a motor fuel — called also *benzol* — **ben·ze·noid** \ˈben-zə-ˌnȯid\ *adj*

benzene hexa·chlo·ride \-ˌhek-sə-ˈklōr-ˌīd, -ˈklȯr-\ *n* (1884) : BHC

benzene ring *n* (1877) : a structural arrangement of atoms present in benzene and other aromatic compounds and marked by six carbon atoms linked in a planar symmetrical hexagon with each carbon attached to hydrogen in benzene itself or to other atoms or groups in substituted benzenes — compare META- 4a, ORTH- 4b, PARA- 2b

ben·zi·dine \ˈben-zə-ˌdēn\ *n* [ISV *benz-* + *-idine*] (1878) : a crystalline base $C_{12}H_{12}N_2$ prepared from nitrobenzene and used esp. in making dyes

benz·imid·azole \ˌben-ˌzi-mə-ˈda-ˌzōl, ˌben-zə-ˈmi-də-ˌzōl\ *n* [ISV] (ca. 1929) : a crystalline base $C_7H_6N_2$ used esp. to inhibit the growth of various viruses, parasitic worms, or fungi; *also* : one of its derivatives

ben·zine \ˈben-ˌzēn, ben-ˈ\ *n* [G *Benzin,* fr. *benz-*] (1835) : any of various volatile flammable petroleum distillates used esp. as solvents or as motor fuels

ben·zo·a·py·rene \ˌben-zō-ˌā-ˈpīr-ˌēn, -zō-ˌal-fə-\ *n* [*benz-* + *-a-,* denoting attachment of the benzene substituent at carbon atoms 1 and 2 of the pyrene molecule + *pyrene*] (1950) : a yellow crystalline carcinogenic hydrocarbon $C_{20}H_{12}$ found in coal tar — *a* often italicized and placed in parentheses or brackets or between hyphens

ben·zo·ate \ˈben-zə-ˌwāt\ *n* (1806) : a salt or ester of benzoic acid

ben·zo·caine \ˈben-zə-ˌkān\ *n* [ISV *benz-* + *-caine*] (1922) : a white crystalline ester $C_9H_{11}NO_2$ used as a local anesthetic

ben·zo·di·az·e·pine \ˌben-zō-dī-ˈa-zə-ˌpēn\ *n* [*benz-* + *di-* + *az-* + *-epine* (fr. h*ep*ta- + ^{2}*-ine*)] (1934) : any of a group of aromatic lipophilic amines (as diazepam and chlordiazepoxide) used esp. as tranquilizers

ben·zo·fu·ran \ˌben-zō-ˈfyu̇r-ˌan, -fyu̇-ˈran\ *n* (1946) : a compound C_8H_6O found in coal tar and polymerized with indene to form thermoplastic resins used esp. in adhesives and printing inks

ben·zo·ic acid \ben-ˈzō-ik-\ *n* [ISV, fr. *benzoin*] (1791) : a white crystalline acid $C_7H_6O_2$ found naturally (as in benzoin or in cranberries) or made synthetically and used esp. as a preservative of foods, in medicine, and in organic synthesis

ben·zo·in \ˈben-zə-wən, -ˌwēn; -ˌzȯin\ *n* [MF *benjoin,* fr. Catal *benjuí,* fr. Ar *lubān jāwi,* lit., frankincense of Java] (1562) **1 :** a hard fragrant yellowish balsamic resin from trees (genus *Styrax*) of southeastern Asia used esp. in medication, as a fixative in perfumes, and as incense **2 :** a white crystalline hydroxy ketone $C_{14}H_{12}O_2$ made from benzaldehyde

ben·zol \ˈben-ˌzȯl, -ˌzōl\ *n* [G, fr. *benz-* + *-ol*] (1838) : BENZENE; *also* : a mixture of benzene and other aromatic hydrocarbons

ben·zo·phe·none \ˌben-zō-fi-ˈnōn, -ˈfē-ˌnōn\ *n* [ISV *benz-* + *phen-* + *-one*] (1885) : a colorless crystalline ketone $C_{13}H_{10}O$ used chiefly in perfumery and sunscreens; *also* : a derivative of benzophenone

ben·zo·yl \ˈben-zə-ˌwil, -ˌzȯil\ *n* [G, fr. *Benzoësäure* benzoic acid + Gk *hylē* matter, lit., wood] (ca. 1855) : the radical C_6H_5CO of benzoic acid

benzoyl peroxide *n* (1924) : a white crystalline flammable compound $C_{14}H_{10}O_4$ used in bleaching and in medicine esp. in the treatment of acne

ben·zyl \ˈben-ˌzēl, -zəl\ *n* [ISV *benz-* + *-yl*] (1869) : a univalent radical $C_6H_5CH_2$ derived from toluene — **ben·zyl·ic** \ben-ˈzi-lik\ *adj*

Be·o·wulf \ˈbā-ə-ˌwu̇lf\ *n* : a legendary Geatish warrior and hero of the Old English poem *Beowulf*

(akin to Goth *tweihnai* two each); akin to OE *twā* two] (bef. 12c) **1 a :** by the common action of : jointly engaging ⟨shared the work ~ the two of them⟩ ⟨talks ~ the three —*Time*⟩ **b :** in common to : shared by ⟨divided ~ his four grandchildren⟩ **2 a :** in the time, space, or interval that separates **b :** in intermediate relation to **3 a :** from one to another of ⟨air service ~ Miami and Chicago⟩ **b :** serving to connect or unite in a relationship (as difference, likeness, or proportion) ⟨a one-to-one correspondence ~ sets⟩ **c :** setting apart ⟨the line ~ fact and fancy⟩ **4 :** in point of comparison of ⟨not much to choose ~ the two coats⟩ **5 :** in confidence restricted to ⟨a secret ~ you and me⟩

usage There is a persistent but unfounded notion that *between* can be used only of two items and that *among* must be used for more than two. *Between* has been used of more than two since Old English; it is esp. appropriate to denote a one-to-one relationship, regardless of the number of items. It can be used when the number is unspecified ⟨economic cooperation *between* nations⟩, when more than two are enumerated ⟨*between* you and me and the lamppost⟩ ⟨partitioned *between* Austria, Prussia, and Russia —Nathaniel Benchley⟩, and even when only one item is mentioned (but repetition is implied) ⟨pausing *between* every sentence to rap the floor —George Eliot⟩. *Among* is more appropriate where the emphasis is on distribution rather than individual relationships ⟨discontent *among* the peasants⟩. When *among* is automatically chosen for more than two, English idiom may be strained ⟨a worthy book that nevertheless falls *among* many stools —John Simon⟩ ⟨the author alternates *among* mod slang, clichés and quotes from literary giants —A. H. Johnston⟩.

usage Many people are puzzled about *bimonthly* and *biweekly*, which are often ambiguous because they are formed from both senses 1b and 2b of *bi-*. This ambiguity has been in existence for nearly a century and a half and cannot be eliminated by the dictionary. The chief difficulty is that many users of these words assume that others know exactly what they mean, and they do not bother to make their context clear. So if you need *bimonthly* or *biweekly*, you should leave some clues in your context to the sense of *bi-* you mean. And if you need the meaning "twice a", you can substitute *semi-* for *bi-*. *Biannual* and *biennial* are usu. differentiated.

bil·tong \ˈbil-ˌtȯŋ, -ˌtäŋ\ *n* [Afrik, fr. *bil* rump + *tong* tongue] (1815) *chiefly SoAfr* : jerked meat

bi·man·u·al \(ˌ)bī-ˈman-yə-wəl, -yəl\ *adj* (ca. 1889) : done with or requiring the use of both hands — **bi·man·u·al·ly** *adv*

bim·bo \ˈbim-(ˌ)bō\ *n, pl* **bimbos** [perh. fr. It *bimbo* baby] (1919) **1** *slang, usu disparaging* : MAN, WOMAN ⟨telling a thickheaded pitcher that the ∼ at the plate hasn't hit a curve in three seasons —Jay Stuller⟩ — used esp. of an attractive but empty-headed person ⟨we didn't want a blond ∼ in that role . . . we wanted her to be smart —Hugh Wilson⟩ **2** *slang* : TRAMP 1c ⟨evidence of how her hubby's been cheating on her with various ∼*s* —Dan Greenburg⟩

bi·met·al \ˈbī-ˌme-tᵊl\ *adj* (1924) : BIMETALLIC — **bimetal** *n*

bi·me·tal·lic \ˌbī-mə-ˈta-lik\ *adj* (1876) **1 :** relating to, based on, or using bimetallism **2 :** composed of two different metals — often used of devices having a part in which two metals that expand differently are bonded together — **bimetallic** *n*

bi·met·al·lism \(ˌ)bī-ˈme-tᵊl-ˌi-zəm\ *n* [F *bimétallisme,* fr. *bi-* + *métal* metal] (1876) : the use of two metals (as gold and silver) jointly as a monetary standard with both constituting legal tender at a predetermined ratio — **bi·met·al·list** \-tᵊl-ist\ *n* — **bi·met·al·lis·tic** \ˌbī-ˌme-tᵊl-ˈis-tik\ *adj*

bi·mil·le·na·ry \(ˌ)bī-ˈmi-lə-ˌner-ē, ˌbī-mə-ˈle-nə-rē\ *or* **bi·mil·len·ni·al** \ˌbī-mə-ˈle-nē-əl\ *n* (1850) **1 :** a period of 2000 years **2 :** a 2000th anniversary — **bimillenary** *adj*

bi·mod·al \(ˌ)bī-ˈmō-dᵊl\ *adj* (1903) : having or relating to two modes; *esp* : having or occurring with two statistical modes — **bi·mo·dal·i·ty** \ˌbī-mō-ˈda-lə-tē\ *n*

bi·mo·lec·u·lar \ˌbī-mə-ˈle-kyə-lər\ *adj* [ISV] (1899) **1 :** relating to or formed from two molecules **2 :** being two molecules thick ⟨∼ lipid layers⟩ — **bi·mo·lec·u·lar·ly** *adv*

^{1}**bi·month·ly** \(ˌ)bī-ˈmən(t)th-lē\ *adj* (1846) **1 :** occurring every two months **2 :** occurring twice a month : SEMIMONTHLY ***usage*** see BI-

^{2}**bimonthly** *adv* (1864) **1 :** once every two months **2 :** twice a month

^{3}**bimonthly** *n* (ca. 1890) : a bimonthly publication

bi·mor·pbe·mic \ˌbī-mȯr-ˈfē-mik\ *adj* (1942) : consisting of two morphemes

\ə\ **abut** \ᵊ\ kitten, F table \ər\ **further** \a\ **ash** \ā\ **ace** \ä\ mop, mar
\au̇\ **out** \ch\ **chin** \e\ bet \ē\ **easy** \g\ go \i\ **hit** \ī\ **ice** \j\ **job**

^{1}bin \ˈbin\ *n* [ME *binn,* fr. OE] (bef. 12c) : a box, frame, crib, or enclosed place used for storage

^{2}bin *vt* **binned; bin·ning** (1841) : to put into a bin

bin- *prefix* [ME, fr. LL, fr. L *bini* two by two; akin to OE *twinn* twofold — more at TWIN] : ^{1}BI- ⟨*bin*aural⟩

^{1}bi·na·ry \ˈbī-nə-rē, -ˌner-ē\ *n, pl* **-ries** (15c) : something made of or based on two things or parts: as **a** : BINARY STAR **b** : a binary number system

^{2}binary *adj* [LL *binarius,* fr. L *bini*] (1597) **1** : compounded or consisting of or marked by two things or parts **2 a** : DUPLE — used of measure or rhythm **b** : having two musical subjects or two complementary sections **3 a** : relating to, being, or belonging to a system of numbers having 2 as its base ⟨the ~ digits 0 and 1⟩ **b** : involving a choice or condition of two alternatives (as on-off or yes-no) **4 a** : composed of two chemical elements, an element and a radical that acts as an element, or two such radicals **b** : utilizing two harmless ingredients that upon combining form a lethal substance (as a gas) ⟨~ weapon⟩ **5** : relating two logical or mathematical elements ⟨~ operation⟩

binary fission *n* (1897) : reproduction of a cell by division into two approximately equal parts ⟨the *binary fission* of protozoans⟩

binary star *n* (ca. 1847) : a system of two stars that revolve around each other under their mutual gravitation — called also *binary system*

bi·na·tion·al \(ˌ)bī-ˈna-sh(ə-)nəl\ *adj* (1888) : of or relating to two nations ⟨a ~ board of directors⟩

bin·au·ral \(ˌ)bī-ˈnȯr-əl, (ˌ)bi-\ *adj* [ISV] (1861) **1** : of, relating to, or involving two or both ears **2** : STEREOPHONIC — **bin·au·ral·ly** \-ə-lē\ *adv*

^{1}bind \ˈbīnd\ *vb* **bound** \ˈbau̇nd\; **bind·ing** [ME, fr. OE *bindan;* akin to OHG *bintan* to bind, Gk *peisma* cable, Skt *badhnāti* he binds] *vt* (bef. 12c) **1 a** : to make secure by tying **b** : to confine, restrain, or restrict as if with bonds **c** : to put under an obligation ⟨~*s* himself with an oath⟩ **d** : to constrain with legal authority **2 a** : to wrap around with something so as to enclose or cover **b** : BANDAGE **3** : to fasten round about **4** : to tie together (as stocks of wheat) **5 a** : to cause to stick together **b** : to take up and hold (as by chemical forces) : combine with **6** : CONSTIPATE **7** : to make a firm commitment for ⟨a handshake ~*s* the deal⟩ **8** : to protect, strengthen, or decorate by a band or binding **9** : to apply the parts of the cover to (a book) **10** : to set at work as an apprentice : INDENTURE **11** : to cause or bring about an emotional attachment **12** : to fasten together ~ *vi* **1 a** : to form a cohesive mass **b** : to combine or be taken up esp. by chemical action ⟨antibody ~*s* to a specific antigen⟩ **2** : to hamper free movement or natural action **3** : to become hindered from free operation **4** : to exert a restraining or compelling effect ⟨a promise that ~*s*⟩

^{2}bind *n* (bef. 12c) **1 a** : something that binds **b** : the act of binding : the state of being bound **c** : a place where binding occurs **2** : TIE 3 **3** : a position or situation in which one is hampered, constrained, or prevented from free movement or action — **in a bind** : in trouble

bind·er \ˈbīn-dər\ *n* (bef. 12c) **1** : a person or machine that binds something (as books) **2 a** : something used in binding **b** : a usu. detachable cover (as for holding sheets of paper) **3** : something (as tar or cement) that produces or promotes cohesion in loosely assembled substances **4** : a temporary insurance contract that provides coverage until the policy is issued **5** : something (as money) given in earnest; *also* : the agreement arrived at

bind·ery \ˈbīn-d(ə-)rē\ *n, pl* **-er·ies** (1810) : a place where books are bound

^{1}bind·ing \ˈbīn-diŋ\ *n* (13c) **1** : the action of one that binds **2** : a material or device used to bind: as **a** : the cover and materials that hold a book together **b** : a narrow fabric used to finish raw edges **c** : a set of ski fastenings for holding the boot firm on the ski

^{2}binding *adj* (14c) **1** : that binds **2** : imposing an obligation — **bind·ing·ly** \-diŋ-lē\ *adv* — **bind·ing·ness** *n*

binding energy *n* (1932) : the energy required to break up a molecule, atom, or atomic nucleus completely into its constituent particles

bin·dle stiff \ˈbin-dᵊl-ˌstif\ *n* [*bindle,* perh. alter. of *bundle*] (1901) : HOBO; *esp* : one who carries his clothes or bedding in a bundle

bind off *vt* (ca. 1939) : to cast off in knitting

bind over *vt* (1610) : to put under a bond to do something (as to appear in court)

bind·weed \ˈbīnd-ˌwēd\ *n* (1548) : any of various twining plants (esp. genus *Convolvulus* of the morning-glory family) that mat or interlace with plants among which they grow

bine \ˈbīn\ *n* [alter. of ^{2}*bind*] (1727) : a twining stem or flexible shoot (as of the hop); *also* : a plant (as woodbine) whose shoots are bines

Bi·net–Si·mon scale \bi-ˌnā-sē-ˈmōⁿ-\ *n* [Alfred *Binet* †1911 and Théodore *Simon* †1961 Fr. psychologists] (1914) : an intelligence test consisting orig. of tasks graded from the level of the average 3-year-old to that of the average 12-year-old but later extended in range

^{1}binge \ˈbinj\ *n* [E dial. *binge* (to drink heavily)] (1854) **1 a** : a drunken revel : SPREE **b** : an unrestrained and often excessive indulgence ⟨a buying ~⟩ **2** : a social gathering : PARTY

^{2}binge *vi* **binged; binge·ing** *or* **bing·ing** (1910) : to go on a binge; *esp* : to go on an eating binge — **bing·er** \ˈbin-jər\ *n*

^{1}bin·go \ˈbiŋ-(ˌ)gō\ *interj* [alter. of *bing* (interj. suggestive of a ringing sound)] (1925) **1** — used to announce an unexpected event or instantaneous result **2** — used to announce a winning position in bingo

^{2}bingo *n, pl* **bingos** (1932) : a game of chance played with cards having numbered squares corresponding to numbered balls drawn at random and won by covering five such squares in a row; *also* : a social gathering at which bingo is played

bin·na·cle \ˈbi-ni-kəl\ *n* [alter. of ME *bitakle,* fr. OPg or OSp; OPg *bitácola* & OSp *bitácula,* fr. L *habitaculum* dwelling place, fr. *habitare* to inhabit — more at HABITATION] (1762) : a housing for a ship's compass and a lamp

^{1}bin·oc·u·lar \bī-ˈnä-kyə-lər, bə-\ *adj* (1738) : of, relating to, using, or adapted to the use of both eyes ⟨~ vision⟩ — **bin·oc·u·lar·i·ty** \(ˌ)bī-ˌnä-kyə-ˈlar-ə-tē, bə-\ *n* — **bin·oc·u·lar·ly** \bī-ˈnä-kyə-lər-lē, bə-\ *adv*

^{2}bin·oc·u·lar \bə-ˈnä-kyə-lər, bī-\ *n* (1871) **1** : a binocular optical instrument **2** : a handheld optical instrument composed of two telescopes and a focusing device and usu. having prisms to increase magnifying ability — usu. used in pl.

bi·no·mi·al \bī-ˈnō-mē-əl\ *n* [NL *binomium,* fr. ML, neut. of *binomius* having two names, alter. of L *binominis,* fr. *bi-* + *nomin-, nomen* name — more at NAME] (1557) **1** : a mathematical expression consisting of two terms connected by a plus sign or minus sign **2** : a biological species name consisting of two terms — **binomial** *adj* — **bi·no·mi·al·ly** \-mē-ə-lē\ *adv*

binomial coefficient *n* (ca. 1889) : a coefficient of a term in the expansion of the binomial $(x + y)^n$ according to the binomial theorem

binomial distribution *n* (1911) : a probability function each of whose values gives the probability that an outcome with constant probability of occurrence in a statistical experiment will occur a given number of times in a succession of repetitions of the experiment

binomial nomenclature *n* (1880) : a system of nomenclature in which each species of animal or plant receives a name of two terms of which the first identifies the genus to which it belongs and the second the species itself

binomial theorem *n* (1755) : a theorem that specifies the expansion of a binomial of the form $(x + y)^n$ as the sum of $n + 1$ terms of which the general term is of the form

$$\frac{n!}{(n-k)!\,k!}x^{(n-k)}y^{k}$$

where k takes on values from 0 to n

bint \ˈbint\ *n* [Ar, girl, daughter] (1855) *Brit* : GIRL, WOMAN

bi·nu·cle·ate \(ˌ)bī-ˈnü-klē-ət *also* -ˈnyü-\ *also* **bi·nu·cle·at·ed** \-klē-ˌā-təd\ *adj* (1881) : having two cellular nuclei ⟨~ hepatocytes⟩

bio \ˈbī-(ˌ)ō\ *n, pl* **bi·os** (1947) : a biography or biographical sketch

bio- — see BI-

bio·acous·tics \ˌbī-(ˌ)ō-ə-ˈkü-stiks\ *n pl but sing in constr* (1957) : a branch of science concerned with the production of sound by and its effects on living systems

bio·ac·tive \ˌbī-ō-ˈak-tiv\ *adj* (1965) : having an effect on a living organism ⟨~ molecules⟩ — **bio·ac·tiv·i·ty** \-ak-ˈti-və-tē\ *n*

bio·as·say \ˌbī-(ˌ)ō-ˈa-ˌsā, -a-ˈsā\ *n* (1912) : determination of the relative strength of a substance (as a drug) by comparing its effect on a test organism with that of a standard preparation — **bio·as·say** \-a-ˈsā, -ˈa-ˌsā\ *vt*

bio·avail·abil·i·ty \-ə-ˌvā-lə-ˈbi-lə-tē\ *n* (1971) : the degree and rate at which a substance (as a drug) is absorbed into a living system or is made available at the site of physiological activity — **bio·avail·able** \-ˈvā-lə-bəl\ *adj*

bio·ce·no·sis *or* **bio·coe·no·sis** \ˌbī-ō-sə-ˈnō-səs\ *n, pl* **-no·ses** \-ˌsēz\ [NL, fr. ^{2}*bi-* + Gk *koinōsis* sharing, fr. *koinos* common] (1883) : an ecological community esp. when forming a self-regulating unit

bio·chem·i·cal \ˌbī-ō-ˈke-mi-kəl\ *adj* [ISV] (1851) **1** : of or relating to biochemistry **2** : characterized by, produced by, or involving chemical reactions in living organisms — **biochemical** *n* — **bio·chem·i·cal·ly** \-k(ə-)lē\ *adv*

biochemical oxygen demand *n* (ca. 1927) : the oxygen used in meeting the metabolic needs of aerobic microorganisms in water rich in organic matter (as water polluted with sewage)

bio·chem·is·try \ˌbī-ō-ˈke-mə-strē\ *n* [ISV] (1881) **1** : chemistry that deals with the chemical compounds and processes occurring in organisms **2** : the chemical characteristics and reactions of a particular living system or biological substance (as chlorophyll) ⟨a change in the patient's ~⟩ — **bio·chem·ist** \-mist\ *n*

bio·chip \ˈbī-ō-ˌchip\ *n* (1981) : a hypothetical computer logic circuit or storage device in which the physical or chemical properties of large biological molecules (as proteins) are used to process information

bio·cid·al \ˌbī-ə-ˈsī-dᵊl\ *adj* (1949) : destructive to life

bio·cide \ˈbī-ə-ˌsīd\ *n* (1947) : a substance (as DDT) that is destructive to many different organisms

bio·cli·mat·ic \ˌbī-ō-klī-ˈma-tik\ *adj* (1918) : of or relating to the relations of climate and living matter ⟨~ adaptations⟩

bio·com·pat·i·bil·i·ty \-kəm-ˌpa-tə-ˈbi-lə-tē\ *n* (1971) : compatibility with living tissue or a living system by not being toxic or injurious and not causing immunological rejection — **bio·com·pat·i·ble** \-ˈpa-tə-bəl\ *adj*

bio·con·trol \ˌbī-ō-kən-ˈtrōl\ *n* (1967) : BIOLOGICAL CONTROL

bio·con·ver·sion \ˌbī-(ˌ)ō-kən-ˈvər-zhən, -shən\ *n* (1960) : the conversion of organic materials (as wastes) into an energy source (as methane) by processes (as fermentation) involving living organisms

bio·de·grad·able \-di-ˈgrā-də-bəl\ *adj* (1961) : capable of being broken down esp. into innocuous products by the action of living things (as microorganisms) ⟨~ trash bags⟩ — **bio·de·grad·abil·i·ty** \-ˌgrā-də-ˈbi-lə-tē\ *n* — **bio·deg·ra·da·tion** \-ˌde-grə-ˈdā-shən\ *n* — **bio·de·grade** \-di-ˈgrād\ *vb*

bio·de·te·ri·o·ra·tion \-di-ˌtir-ē-ə-ˈrā-shən\ *n* (1953) : the breakdown of materials by microbial action

bio·di·ver·si·ty \-də-ˈvər-sə-tē, -dī-\ *n* (1986) : biological diversity in an environment as indicated by numbers of different species of plants and animals

bio·dy·nam·ic \-di-ˈna-mik, -dī-\ *adj* (1939) : of or relating to a system of farming that uses only organic materials for fertilizing and soil conditioning

bio·elec·tric \-i-ˈlek-trik\ *also* **bio·elec·tri·cal** \-tri-kəl\ *adj* (1918) : of or relating to electric phenomena in animals and plants — **bio·elec·tric·i·ty** \-ˌlek-ˈtri-sə-tē, -ˈtris-tē\ *n*

bio·en·er·get·ics \-ˌe-nər-ˈje-tiks\ *n pl but sing in constr* (1912) **1** : the biology of energy transformations and energy exchanges (as in photosynthesis) within and between living things and their environments **2** : a system of physical and psychological therapy that is held to increase well-being by releasing blocked physical and psychic energy — **bio·en·er·get·ic** \-ˈje-tik\ *adj*

bio·en·gi·neer·ing \-ˌen-jə-ˈnir-iŋ\ *n* (ca. 1954) : biological or medical application of engineering principles or engineering equipment; *broadly* : BIOTECHNOLOGY 1 — **bio·en·gi·neer** \-ˈnir\ *n or vt*

bio·eth·ics \-ˈe-thiks\ *n pl but sing in constr* (1971) : a discipline dealing with the ethical implications of biological research and applications esp. in medicine — **bio·eth·i·cal** \-ˈe-thi-kəl\ *adj* — **bio·eth·i·cist** \-ˈe-thə-sist\ *n*

bio·feed·back \-ˈfēd-ˌbak\ *n* (1970) : the technique of making unconscious or involuntary bodily processes (as heartbeats or brain waves) perceptible to the senses (as by the use of an oscilloscope) in order to manipulate them by conscious mental control

bio·foul·ing \-ˈfau̇-liŋ\ *n* (1943) : the gradual accumulation of waterborne organisms (as bacteria and protozoa) on the surfaces of engineering structures in water that contributes to corrosion of the structures and to a decrease in the efficiency of moving parts

bio·gas \ˈbī-ō-ˌgas\ *n* (1974) : a mixture of methane and carbon dioxide produced by the bacterial decomposition of organic wastes and used as a fuel

bio·gen·e·sis \ˌbī-ō-ˈje-nə-səs\ *n* [NL] (1870) **1** : the development of life from preexisting life **2** : a supposed tendency for stages in the evolutionary history of a race to briefly recur during the development and differentiation of an individual of that race **3** : the synthesis of chemical compounds or structures in the living organism — compare BIOSYNTHESIS — **bio·ge·net·ic** \-jə-ˈne-tik\ *adj* — **bio·ge·net·i·cal·ly** \-ti-k(ə-)lē\ *adv*

biogenetic law *n* (1882) : a theory of development much disputed in biology: an organism passes through successive stages resembling the series of ancestral types from which it has descended so that the ontogeny of the individual is a recapitulation of the phylogeny of the group

bio·gen·ic \-ˈje-nik\ *also* **bi·og·e·nous** \bī-ˈä-jə-nəs\ *adj* (1913) : produced by living organisms ⟨∼ methane formation⟩

bio·geo·chem·i·cal \-ˌjē-ə-ˈke-mi-kəl\ *n* (1938) : of or relating to the partitioning and cycling of chemical elements and compounds between the living and nonliving parts of an ecosystem — **bio·geo·chem·is·try** \-mə-strē\ *n*

bio·ge·og·ra·phy \-jē-ˈä-grə-fē\ *n* [ISV] (1895) : a science that deals with the geographical distribution of animals and plants — **bio·ge·og·ra·pher** \-grə-fər\ *n* — **bio·geo·graph·ic** \-ˌjē-ə-ˈgra-fik\ *or* **bio·geo·graph·i·cal** \-fi-kəl\ *adj*

bi·og·ra·phee \bī-ˌä-grə-ˈfē *also* bē-\ *n* (1841) : a person about whom a biography is written

bi·og·ra·pher \-ˈä-grə-fər\ *n* (1715) : a writer of a biography

bio·graph·i·cal \ˌbī-ə-ˈgra-fi-kəl\ *also* **bio·graph·ic** \-fik\ *adj* (1738) **1** : of, relating to, or constituting biography **2** : consisting of biographies ⟨a ∼ dictionary⟩ **3** : relating to a list briefly identifying persons ⟨∼ notes⟩ — **bio·graph·i·cal·ly** \-fi-k(ə-)lē\ *adv*

bi·og·ra·phy \bī-ˈä-grə-fē *also* bē-\ *n, pl* **-phies** [LGk *biographia,* fr. Gk *bi-* + *-graphia* -graphy] (1683) **1** : a usu. written history of a person's life **2** : biographical writings as a whole **3** : an account of the life of something (as an animal, a coin, or a building)

bio·haz·ard \ˈbī-ō-ˌha-zərd\ *n* (1967) : a biological agent or condition that constitutes a hazard to humans or the environment; *also* : a hazard posed by such an agent or condition

bi·o·log·ic \ˌbī-ə-ˈlä-jik\ *or* **bi·o·log·i·cal** \-ji-kəl\ *n* (1921) : a biological product used in medicine

biological *also* **biologic** *adj* (1859) **1** : of or relating to biology or to life and living processes **2** : used in or produced by applied biology **3** : related by direct genetic relationship rather than by adoption or marriage ⟨∼ parents⟩ — **bi·o·log·i·cal·ly** \-ji-k(ə-)lē\ *adv*

biological clock *n* (1955) : an inherent timing mechanism that is inferred to exist in some living systems (as a cell) in order to explain various cyclical behaviors and physiological processes

biological control *n* (1923) : reduction in numbers or elimination of pest organisms by interference with their ecology (as by the introduction of parasites or diseases)

biological oxygen demand *n* (1945) : BIOCHEMICAL OXYGEN DEMAND

biological warfare *n* (1946) : warfare involving the use of living organisms (as disease germs) or their toxic products as weapons; *also* : warfare involving the use of herbicides

bi·ol·o·gism \bī-ˈä-lə-ˌji-zəm\ *n* (1924) : preoccupation with biological explanations in the analysis of social situations — **bi·ol·o·gis·tic** \-ˌä-lə-ˈjis-tik\ *adj*

bi·ol·o·gy \bī-ˈä-lə-jē\ *n* [G *Biologie,* fr. *bi-* + *-logie* -logy] (1819) **1** : a branch of knowledge that deals with living organisms and vital processes **2 a** : the plant and animal life of a region or environment **b** : the life processes esp. of an organism or group; *broadly* : ECOLOGY — **bi·ol·o·gist** \-jist\ *n*

bio·lu·mi·nes·cence \ˌbī-ō-ˌlü-mə-ˈne-sᵊn(t)s\ *n* [ISV] (1916) : the emission of light from living organisms; *also* : the light so produced — **bio·lu·mi·nes·cent** \-sᵊnt\ *adj*

bio·mark·er \ˈbī-ō-ˌmär-kər\ *n* (1982) : a distinctive usu. biochemical indicator (as a metabolite) of a biological or geochemical process or event (as aging, poisoning, fossilization, or oil formation)

bio·mass \ˈbī-ō-ˌmas\ *n* (1934) **1** : the amount of living matter (as in a unit area or volume of habitat) **2** : plant materials and animal waste used esp. as a source of fuel

bio·ma·te·ri·al \ˌbī-ō-mə-ˈtir-ē-əl\ *n* (1966) : material used for or suitable for use in prostheses that come in direct contact with living tissues

bio·math·e·mat·ics \-ˌma-thə-ˈma-tiks, -math-ˈma-\ *n pl but usu sing in constr* (1923) : mathematics of special use in biology and medicine — **bio·math·e·mat·i·cal** \-ti-kəl\ *adj* — **bio·math·e·ma·ti·cian** \-ˌmath-mə-ˈti-shən, -ˌma-thə-\ *n*

bi·ome \ˈbī-ˌōm\ *n* [²*bi-* + *-ome*] (1916) : a major ecological community type (as tropical rain forest, grassland, or desert)

bio·me·chan·ics \ˈbī-ō-mə-ˈka-niks\ *n pl but sing or pl in constr* (ca. 1933) : the mechanics of biological and esp. muscular activity (as in locomotion or exercise); *also* : the scientific study of this — **bio·me·chan·i·cal** \-ni-kəl\ *adj* — **bio·me·chan·i·cal·ly** \-ni-k(ə-)lē\ *adv*

bio·med·i·cal \ˌbī-ō-ˈme-di-kəl\ *adj* (1955) **1** : of or relating to biomedicine **2** : of, relating to, or involving biological, medical, and physical science

bio·med·i·cine \-ˈme-də-sən, *Brit usu* -ˈmed-sən\ *n* (1947) : medicine based on the application of the principles of the natural sciences and esp. biology and biochemistry

bio·me·te·o·rol·o·gy \-ˌmē-tē-ə-ˈrä-lə-jē\ *n* (1946) : a science that deals with the relationship between living things and atmospheric phenomena — **bio·me·te·o·ro·log·i·cal** \-rə-ˈlä-ji-kəl\ *adj*

bi·om·e·try \bī-ˈä-mə-trē\ *n* [ISV] (1831) : the statistical analysis of biological observations and phenomena — **bio·met·ric** \ˌbī-ō-ˈme-trik\ *or* **bio·met·ri·cal** \-tri-kəl\ *adj* — **bio·me·tri·cian** \-me-ˈtri-shən\ *n* — **bio·met·rics** \-ˈme-triks\ *n pl but sing or pl in constr*

bio·mi·met·ics \ˌbī-ō-mə-ˈme-tiks, -mī-\ *n pl but sing in constr* (1974) : the study of the formation, structure, or function of biologically produced substances and materials (as enzymes or silk) and biological mechanisms and processes (as protein synthesis or photosynthesis) esp. for the purpose of synthesizing similar products by artificial mechanisms which mimic natural ones — **bio·mi·met·ic** \-tik\ *adj*

bio·mol·e·cule \ˌbī-ō-ˈmä-li-ˌkyü(ə)l\ *n* (1901) : an organic molecule and esp. a macromolecule in living organisms — **bio·mo·lec·u·lar** \-mə-ˈle-kyə-lər\ *adj*

bio·mor·phic \ˌbī-ō-ˈmȯr-fik\ *adj* (1895) : resembling or suggesting the forms of living organisms ⟨∼ sculptures⟩ ⟨∼ images⟩

bi·on·ic \bī-ˈä-nik\ *adj* (1963) **1** : of or relating to bionics **2** : having normal biological capability or performance enhanced by or as if by electronic or electromechanical devices

bi·on·ics \bī-ˈä-niks\ *n pl but sing or pl in constr* [²*bi-* + *-onics* (as in *electronics*)] (1960) : a science concerned with the application of data about the functioning of biological systems to the solution of engineering problems

bio·phys·ics \ˌbī-ō-ˈfi-ziks\ *n pl but sing or pl in constr* (1892) : a branch of science concerned with the application of physical principles and methods to biological problems — **bio·phys·i·cal** \-zi-kəl\ *adj* — **bio·phys·i·cist** \-ˈfi-zə-sist, -ˈfiz-sist\ *n*

bio·pic \ˈbī-(ˌ)ō-ˌpik\ *n* [²*bi-* + ¹*pic*] (1951) : a biographical movie

bio·poly·mer \ˌbī-ō-ˈpä-lə-mər\ *n* (1961) : a polymeric substance (as a protein or polysaccharide) formed in a biological system

bi·op·sy \ˈbī-ˌäp-sē\ *n, pl* **-sies** [ISV ²*bi-* + *-opsy* (as in *autopsy*)] (1895) : the removal and examination of tissue, cells, or fluids from the living body — **biopsy** *vt*

bio·re·ac·tor \ˌbī-ō-rē-ˈak-tər\ *n* (1974) : a device or apparatus in which living organisms and esp. bacteria synthesize useful substances (as interferon) or break down harmful ones (as in sewage)

bio·re·gion \ˈbī-ō-ˌrē-jən\ *n* (1978) : a region whose limits are naturally defined by topographic and biological features (as mountains and ecosystems) — **bio·re·gion·al** \ˌbī-ō-ˈrēj-nəl, -ˈrē-jə-nᵊl\ *adj*

bio·re·gion·al·ism \ˌbī-ō-ˈrēj-nə-ˌli-zəm, -ˈrē-jə-nᵊl-i-\ *n* (1981) : an environmentalist movement to make political boundaries coincide with bioregions — **bio·re·gion·al·ist** \-list, -ist\ *n or adj*

bio·re·me·di·a·tion \-ri-ˌmē-dē-ˈā-shən\ *n* (1986) : the treatment of pollutants or waste (as in an oil spill, contaminated groundwater, or industrial process) by the use of microorganisms (as bacteria) that break down the undesirable substances

bio·rhythm \ˈbī-ō-ˌri-t͟həm\ *n* (1960) : an inherent rhythm that appears to control or initiate various biological processes — **bio·rhyth·mic** \-ˈrit͟h-mik\ *adj*

bio·safe·ty \ˌbī-ō-ˈsāf-tē\ *n* (1977) : safety with respect to the effects of biological research on humans and the environment

bio·sci·ence \-ˈsī-ən(t)s\ *n* (1941) : BIOLOGY 1; *also* : LIFE SCIENCE — **bio·sci·en·tif·ic** \-ˌsī-ən-ˈti-fik\ *adj* — **bio·sci·en·tist** \-ˈsī-ən-tist\ *n*

bio·sen·sor \-ˈsen-ˌsȯr, -ˈsen(t)-sər\ *n* (1962) : a device that is sensitive to a physical or chemical stimulus (as heat or an ion) and transmits information about a life process

-biosis *n comb form, pl* **-bioses** [NL, fr. Gk *biōsis,* fr. *bioun* to live, fr. *bios* life — more at QUICK] : mode of life ⟨para*biosis*⟩

bio·so·cial \ˌbī-ō-ˈsō-shəl\ *adj* (1897) : of, relating to, or concerned with the interaction of the biological aspects and social relationships of living organisms ⟨∼ science⟩ — **bio·so·cial·ly** \-ˈsōsh-lē, -ˈsō-shə-\ *adv*

bio·sol·id \ˈbī-ō-ˌsä-ləd\ *n* (1990) : solid organic matter recovered from a sewage treatment process and used esp. as fertilizer — usu. used in pl.

bio·sphere \ˈbī-ə-ˌsfir\ *n* (1899) **1** : the part of the world in which life can exist **2** : living beings together with their environment — **bio·spher·ic** \ˌbī-ə-ˈsfir-ik, -ˈsfer-\ *adj*

bio·sta·tis·tics \ˌbī-ō-stə-ˈtis-tiks\ *n pl but sing in constr* (1950) : statistics applied to the analysis of biological data — **bio·sta·tis·ti·cal** \-ti-kəl\ *adj* — **bio·stat·is·ti·cian** \-ˌsta-tə-ˈsti-shən\ *n*

bio·strati·graph·ic \-ˌstra-tə-ˈgra-fik\ *adj* (1947) : of or relating to the branch of paleontology dealing with the conditions and order of deposition of sedimentary rocks — **bio·stra·tig·ra·phy** \-strə-ˈti-grə-fē\ *n*

bio·syn·the·sis \-ˈsin(t)-thə-səs\ *n* [NL] (1930) : the production of a chemical compound by a living organism — **bio·syn·thet·ic** \-sin-ˈthe-tik\ *adj* — **bio·syn·thet·i·cal·ly** \-ti-k(ə-)lē\ *adv*

bio·sys·te·mat·ics \-ˌsis-tə-ˈma-tiks\ *n pl but sing or pl in constr* (1945) : experimental taxonomy esp. as based on cytogenetics and genetics — **bio·sys·te·mat·ic** \-tik\ *adj* — **bio·sys·tem·atist** \-ˈsis-tə-mə-tist, -sis-ˈte-mə-\ *n*

bi·o·ta \bī-ˈō-tə\ *n* [NL, fr. Gk *biotē* life; akin to Gk *bios*] (1901) : the flora and fauna of a region

bio·tech \ˈbī-ō-ˌtek\ *n* (1974) : BIOTECHNOLOGY 1

bio·tech·ni·cal \ˌbī-ō-ˈtek-ni-kəl\ *adj* (1938) : of or relating to biotechnology

bio·tech·nol·o·gy \ˌbī-ō-tek-ˈnä-lə-jē\ *n* (1941) **1** : biological science when applied esp. in genetic engineering and recombinant DNA technology **2** : ERGONOMICS — **bio·tech·no·log·i·cal** \-ˌtek-nə-ˈläj-i-kəl\ *adj* — **bio·tech·nol·o·gist** \-ˈnä-lə-jist\ *n*

bio·te·lem·e·try \-tə-ˈle-mə-trē\ *n* (1963) : the remote detection and measurement of a human or animal function, activity, or condition — **bio·tel·e·met·ric** \-ˌte-lə-ˈme-trik\ *adj*

bi·ot·ic \bī-ˈä-tik\ *adj* [Gk *biōtikos,* fr. *bioun*] (1868) : of or relating to life; *esp* : caused or produced by living beings ⟨∼ diversity⟩

-biotic *adj comb form* [prob. fr. NL *-bioticus,* fr. Gk *biōtikos*] : having a (specified) mode of life ⟨endo*biotic*⟩

biotic potential *n* (1935) : the inherent capacity of an organism or species to reproduce and survive

bi·o·tin \ˈbī-ə-tən\ *n* [ISV, fr. Gk *biotos* life, sustenance; akin to Gk *bios*] (1936) : a colorless crystalline growth vitamin $C_{10}H_{16}N_2O_3S$ of the vitamin B complex found esp. in yeast, liver, and egg yolk

bi·o·tite \ˈbī-ə-ˌtīt\ *n* [G *Biotit,* fr. Jean B. *Biot* †1862 Fr. mathematician] (1862) : a generally black or dark green form of mica that is a constituent of crystalline rocks and consists of a silicate of iron, magnesium, potassium, and aluminum — **bi•o•tit•ic** \ˌbī-ə-ˈti-tik\ *adj*

bio•tope \ˈbī-ə-ˌtōp\ *n* [^{2}*bi-* + Gk *topos* place] (1927) : a region uniform in environmental conditions and in its populations of animals and plants for which it is the habitat

bio•trans•for•ma•tion \ˈbī-ō-ˌtran(t)s-fər-ˈmā-shən, -ˌfȯr-\ *n* (1955) : the transformation of chemical compounds within a living system

bio•type \-ˌtīp\ *n* [ISV] (1906) : the organisms sharing a specified genotype; *also* : the genotype shared or its distinguishing peculiarity — **bio•typ•ic** \ˌbī-ə-ˈti-pik\ *adj*

bi•pa•ren•tal \ˌbī-pə-ˈren-tᵊl\ *adj* (1900) : of, relating to, involving, or derived from two parents — **bi•pa•ren•tal•ly** \-tᵊl-ē\ *adv*

bi•par•ti•san \(ˌ)bī-ˈpär-tə-zən, -sən, -ˌzan, *chiefly Brit* ˌbī-ˌpär-tə-ˈzan\ *adj* (ca. 1909) : of, relating to, or involving members of two parties ⟨a ~ commission⟩ — **bi•par•ti•san•ism** \-zə-ˌni-zəm, -sə-\ *n* — **bi•par•ti•san•ship** \-zən-ˌship, -sən-\ *n*
